Business is reported as above normal but many shipments are still held up owing to the congestion which resulted from the recent strike. However, shipping conditions are expected to show continued improvement from now on.

The United States Government have just placed an embargo on barb wire with the result that no more shipments will enter Canada till further notice. This will no doubt mean that many dealers will be without supplies, the output of Canadian mills under present conditions being inadequate to supply all demands made upon them.

Wrecking Bars Move Up; Alarm Tills, Too

Winnipeg.

WRECKING BARS, ALARM TILLS.—Another slight advance is recorded on wrecking bars, ¾ x 24 in., the price moving up from $5.40 to $5.75 per dozen.

Prices on alarm tills which have remained firm for some time again show an upward trend, recent advances by the manufacturers bringing to-day's resale price on No. 503 to $3.75 each.

10 Per Cent. Advance in Lamp and Lantern Burners

Winnipeg.

LAMP, LANTERN BURNERS.—Prevailing high prices on raw material and the extreme shortage of help are given as reasons for the present advances in lamp and lantern burner prices. These move up approximately 10 per cent. over former quotations. New prices just announced are given herewith:

Banner—A, $1.27; B, $1.60 dozen.

Security—A, $1.52; B, $1.90 dozen.

Regal—D, $3.30 doz.; Canada—A, $1.02; Lantern Burners—Banner, No. 1, $1.03; No. 2, $1.80 dozen.

Scales Reach Much Higher Levels

Winnipeg.

SCALES.—New prices just issued covering scales show one of the heaviest advances during the war, particularly on weigh beams which show an increase of approximately 30 per cent. Prices now in effect are given herewith:

Union scales, 240-lb., $11.85 each.

Platform scales, (each)—600-lb., $26.60; 1200-lb., $33.25; 2000-lb., $47.50.

Weigh beams (each)—100-lb., $7.60; 150-lb., $8.10; 200-lb., $8.30; 250-lb., $8.55; 300-lb., $8.80; 350-lb., $9.00; 400-lb., $9.25; 500-lb., $9.50; 600-lb., $10.20.

The usual stamping charges are in addition to the above prices, being $1.00 each on platform scales and 50c each on the balance.

Advance of $1.00 Dozen on Grain Scoops

Winnipeg.

GRAIN SCOOPS.—The recent advance in black iron sheets has been given as the cause of a further advance in the price of Manitoba grain scoops. These move up from $9.50 to $10.50 dozen, this price applying on both the fast and loose handle types.

Poultry Netting Moving Freely; Prices Firm

Winnipeg.

POULTRY NETTING.—Shipments of poultry netting have been exceptionally good recently and would indicate that people are doing considerable poultry raising. Prices on all lines remain firm and are quoted to-day as follows: 1-in. mesh x 24-in., $5.95; 30-in., $7.20; 36-in., $8.50; 2-in. mesh x 24-in., $2.90; 30-in., $3.40; 36-in., $4.05; 48-in., $5.25; 60-in., $6.55; 72-in., $7.80. Roll—Banner—24-in., $4.15; 36-in., $5.30; 48-in., $6.25; 60-in., $7.40; 72-in., $8.40 roll.

Linseed Oil and Turpentine Hold Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—Despite recent declines in flax seed prices on linseed oil hold firm. The demand is reported as very good. Prices in effect are as follows: Raw oil, $2.00 gal.; boiled oil, $2.03; gal. bbl. lots. Turpentine is reported as moving freely while prices continue to hold firm at former quotations, namely: Barrels, 80c gal.; ½ barrels, 83c gal.; 5-gal. lots, 85c gal.; 1-gal. lots, 85c gal., plus the usual extras for containers.

New Prices on Miscellaneous Hardware

Winnipeg.

MISCELLANEOUS HARDWARE.—Increased manufacturing costs are said to account for the recent advance in many lines manufactured by Canadian hardware manufacturers. The lines affected move up from 3 to 5 per cent., while others remain firm at former quotations. The following lines are all affected by the advance, new prices being as follows:

Hog tongs, No. 4, $4.50 doz.; cattle leaders, No. 51, $1.30; anti-rattlers, No. 42, 55c doz.; clothes line reel heads, No. 1, $18.60 doz.; No. 2, $20.40 doz.; Adams, $23.40 doz.; Mrs. Pott's sad irons, plain, $2.10 set; nickle plated, $2.25 set; sad iron handles, Mrs. Pott's, $1.60 doz.; universal, $2.10 doz.; foot scrapers, No. 14, $1.10 doz.; waffle irons, No. 89, $15.00 doz.; thumb latches, cast, No. 102, $1.20 doz.; No. 103, $1.25 doz.; steel, No. 2, $2.10 doz.; No. 3, $2.80 doz.; No. 4, $4.90 doz.; barn door latches, No. 5, $2.80 doz.; No. 8, $3.00 doz.; No. 9, $5.20 doz.; whip racks, No. 74, $2.00 doz.; No. 75, $10.20 doz.; gate hinges and latches, No. 60, $6.30 doz.; No. 65, $6.30 doz.; hat and coat hooks, No. 102, $10.80 gross; No. 103, $13.80 gross; No. 104, $16.80 gross; No. 21, $5.50 gross; harness hooks, No. 16, $2.35 doz.; No. 18, $6.00 doz.; saw vises, No. 80, $8.80; No. 81, $14.40; No. 105, $15.50 doz.; implement brackets, No. 29, $6.60 doz.; No. 31, $7.75 doz.; lamp brackets, No. 60, $2.30 doz.; No. 71, $4.50 doz.; quilting frame clamps, No. 2, 90c doz.; No. 4, $1.20 doz.; grindstone fixtures, 15-inch, $7.75 doz.; 17-inch, $8.30 doz.

PITTSBURGH MARKETS

PITTSBURGH, Pa., June 13.—A permanent basis for the distribution of pig iron and steel products was laid down by the resolutions of the War Industries Board of June 6. The arrangement differs in form, but not materially in essence, from the system that has been in vogue since the producers took their pledge of 100 per cent. efficiency for war work as a result of the meeting in New York April 26 between the Director of Steel Supplies and representatives of the industry.

There are three classes of pig iron and steel products: Material for war, material for more essential industries, and material for less essential industries. The last named term is a euphemism, used in place of "nonessential," because it is admitted that in the last analysis there is no material that would not in some slight degree help in winning the war, at least according to the arguments of those who desire the material.

The first class has been regulated for months past by the issuance of priority certificates by the priorities division of the War Industries Board. The second class has all along been given more or less special recognition by the manufacturers, of their own volition, and lately some industries using material of this class have been given special recognition by the mills as a result of the direct instructions by the War Industries Board.

The decision reached June 6 followed the temporary arrangement that existed under the 100 per cent. pledge (which of course remains in effect as to its general tenor) whereby the producers were distributing material to the more essential industries according to their own judgment, but it greatly amplifies the list of more essential industries. The decision also settles the somewhat vexed question as to the machinery by which material should be distributed to the more essential industries. There was a possibility at one time that the War Industries Board would distribute this material by a system of priority certificates. These, as in the case of war material, would refer to specific lots of material. If it did this it would be regulating the distribution of all pig iron and steel products, ton by ton, except such material as might be left over and could be shipped to anyone irrespective of the use to which it would be put. This possibility is now removed.

The arrangement now adopted is this, that all war material is to be controlled by priority certificates as formerly, and that material for the more essential industries is to be distributed by the producers themselves, but in accordance with precise regulations of the Board, decreeing the "purposes" which are to be given preferential treatment. If there is any material left over, it can go where the producers prefer to ship it.

While the resolution, which is quite lengthy, is entirely explicit in general form, it leaves one thing with respect to which there may be much divergence in practice from time to time. That one point is this, that "priority certificates" are dismissed with a few words, while the "schedule of purposes entitled to preference treatment" is quite lengthy. Thus there is no pronouncement as to the items for which priority certificates will be issued. Railroad requirements are named in the "schedule of purposes" and yet priority certificates can of course be issued for specific lots of material—for instance, for a given lot of locomotives or cars, or a given lot of rails. In general, however, the priority certificates cover war material ordered directly or indirectly by the United States Government for itself and its Allies.

The "schedule of purposes," which take preference after priority certificates are filled, includes shipbuilding, aircraft, fuel, food and collateral industries, clothing, transportation and public utilities.

Exports

It is, perhaps, not altogether clear whether the "schedule of purposes" contemplates the supplying of material for export as well as for use in the United States. This will probably be referred to in more detail in subsequent regulations. Steel for Canadian shell factories of course, would be the subject of a priority certificate. Steel for an agricultural implement is included in the "schedule of purposes," and as the agricultural implement makers have been put under license, the specific regulations laid down for them will doubtless cover the matter of what products they may export, and in the case of that industry the steel mills may have nothing to decide. Containers of food are included in the schedule, but the exportation of tin plate for making food containers may be controlled simply as formerly by export permits issued by the War Trade Board.

How Industries Will Fare

In the past few weeks there has been a distribution of pig iron and steel products much the same as that now provided by the new regulations, which are, however, more explicit and comprehensive. There has been opportunity therefore to observe in a measure how the system will work. Many consumers are of course incommoded because they have been denied steel entirely, but the total tonnage involved is not large by any means. If the present system had been imposed in 1913, or even in 1916, it would have created the most profound changes, but since the United States entered the war there has been a great diminution in the steel used for certain purposes, as, for instance, in building, while the great majority of manufacturing consumers have changed their products so that they are making war material instead of "less essential" things, and thus the dislocation is not so great after all. When building disappears and the railroads are given preferential treatment, it can be seen that would-be buyers who are denied material

(Continued on page 56.)

WEEKLY PAINT DEPARTMENT

Small Paint Orders Lead to Larger

Paint Specialties Are Very Important Link in Getting Paint Trade Started—Advertising Odd Lines Such as Floor Wax, Stains, Auto Enamels and Screen Paint Are Often a Wedge to Unearth Big Orders

THAT the sale of specialty lines of paints leads to other and larger sales of the more staple lines is a fact that has been demonstrated by some successful paint dealers. What makes the proposition an attractive one is the fact that the specialty lines in themselves carry a good profit. While the individual sales may not be as large as when the sale for sufficient paint to cover a house is made, still in the aggregate the amount can be made to reach a good figure. There is one prosperous paint dealer who seized the occasion in quiet months to develop the trade along these specialty lines. After hewing to the line for a considerable time he came to the realization that what was ordinarily the quietest month in the year came to be the second busiest month in the year. He found floor varnish, shellac, enamel, gold and aluminum paints, furniture polish, floor wax, stains, auto enamels, and screen paint very easy to turn into money. It was not necessary to carry heavy stocks of these lines and the money involved was not large. But by keeping them advertised they found a ready sale and the people of the town came to think of his particular store as the best place to obtain those articles.

CLOSELY RELATED TO STAPLE PAINTS

These specialty lines have a very close bearing to the sale of the staple lines of paints. If people have become educated to buying these odd lines throughout the year at your particular store the chances are that they will not transfer their allegiance when they come to make a purchase of paint sufficient to cover their entire house. The purchase of sufficient paint to cover the entire exterior is one that occurs not oftener than every other year at the most. In very many instances it has been deferred for a much longer period.

Of course it has been very poor economy for the householder to forego painting for a long period. The house shows a very material deterioration each year that it is allowed to ge beyond the point where it should have been painted. But whenever this investment in paint for the entire painting job is made it amounts to considerable. It is like the purchase of a range in the average household although perchance the average range will last much longer than the average coat of exterior paint.

But the sales are not made at frequent intervals the same as they are made in smaller articles. They come in the nature of occasional purchases. And it is very essential that the time between those occasional purchases should be bridged with other sales that will not allow the prospective purchaser to forget that your store is headquarters for a pint of all kinds.

SPECIALTIES IN STEADY DEMAND

The sale of specialty lines such as we have enumerated can be made steady sellers throughout the year, with one or two exceptions. Screen paint of course would not sell except at perhaps two seasons of the year—one when the screens are being put in during the spring and the other when they are being taken out. This, of course, is the season of the year to advocate that they be painted. It will protect the screens during the summer months. When they are removed in the fall it is necessary to paint them in order to protect the wire from the dampness that may be common during the winter months.

The advantage of keeping these specialty lines before the public lies in the fact that it keeps the paint users coming to your store regularly. In time they come to think of your store as the household paint store. If you are keeping up a ceaseless volley of sales talk about the advantage of using these various lines you are bound to win the attention of customers. In this way it is possible to create a need for these odd lines. With the staple lines of paint the dealer does not create that trade. He simply keeps in touch with the situation and is ready to seize it when it has ripened. The searing tendency of time is a faithful ally in creating anew a condition that should mean more sales of the staple lines. If the dealer fosters the sale of specialties he will be in line for the bigger orders.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 13.—Viewing the first phase of the painting season in retrospect it has been a very good one indeed. The early outlook was such as to cause some anxiety in the matter of securing such supplies as were required to provide the trade with their needs. This was fortunately overcome and as a consequence the painting season opened in good time and much painting has been done over the country. The oil situation has been somewhat of an anxious one for some time but it is thought that with due attention to needs the crushers will have enough oil to meet reasonable demand. The only question is that of seed supply and this is somewhat limited. Turpentine is very strong and the markets have not improved to an appreciable extent over the week-end. One importer secured delivery of a carload. All tendencies are of a firm nature.

New Prices for Enamels and Shellacs

Montreal.

SHELLACS AND ENAMELS.—Announcement was made last week that an advance was effective at once for shellacs. This applies to B. H. Anchor, and the prices are now as follows: Barrels, per gallon, pure white, $4.65; five gallons, per gal., $4.80; gallons, $4.90. Pure orange for corresponding quantities is priced to the trade as follows: $4.25, $4.40 and $4.50, while No. 1 orange is $3.95, $4.05 and $4.15. B-H gas engine enamels, made in black and eight shades, are also on a revised list. Quarts are $1.25 each, net; pints 65c, and half pints, 35c.

May be Ample Linseed Oil to go Around

Montreal.

LINSEED OIL.—There is less seed at the head of the lakes than there was a year ago. This is estimated at about half what there was in 1917 on June 1. Supplies have been coming to hand but in very limited volume and this is expected to be the case for some time. On such a high market it is considered unlikely that crushers are going to provide a large surplus against probable demand. The past week has witnessed some fluctuation of seed prices, and within the past three days 12c advance per bushel was made and the market closed Tuesday at $3.75, July option. Seed may yet reach or go over the $4 mark before the season ends, is the opinion of one or two interested parties here. Demand is not quite so heavy. One paint firm is quoting on the basis of $1.77 for raw in 10-barrel lots, this reduction being usually made by them after the peak of the season has been reached. Notwithstanding this the general situation rules very firm.

Linseed Oil	Raw Imp. gal.	Boiled Imp. gal.
1 to 4 barrels	$1.79-$1.86	$1.81½-$1.88½
10 barrels	1.77	....

Shipment Turpentine But no Prices Yet

Montreal.

TURPENTINE.—Every source reports the same condition save one, and that is that turpentine still is as scarce as reported for the last few weeks. One importer states that a car has been received but this will not go far toward relieving the needs of the trade and particularly in view of the shortage that has so long existed. The outlook is none too promising for it seems that there is so much need upon the part of the government for naval stores that the probability of securing adequate supplies here will continue uncertain. In view of the circumstances and because most sources are out of stock no prices whatever are yet being quoted. Improvement is still looked for within another week.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	....
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

Putty is Held on Unchanged Basis

Montreal.

PUTTY.—The markets are steady and there is the usual amount of trading. This is for such lots as are required to meet the routine trade demands, and while there is no revision of price all prices are fully maintained on a firm basis with every indication of the markets holding. Prices are as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Some White Lead in Oil is Selling

Montreal.

WHITE LEAD IN OIL.—There is not much interest to record as applying to the markets. Many express the increasing demand for mixed paints which seems to reflect in a decreased use of white lead in oil. The strong position of the oil markets is such as to discourage the extensive use of white lead when paint can be bought ready mixed on its present basis. Quotations still are as follows: Five ton lots per 100 pounds, $15.50; one ton lots $16, and less quantities $16.35.

Active Needs for Paint Have Been Well Met

Montreal.

MIXED PAINT.—The trade has been well taken care of this year, considering the difficulties faced by the paint men. The early shortage of certain basic materials was overcome and the retailer has been thus able to get his supplies from time to time with little delay ensuing. Normal or even above normal demand continues for the regular lines, and all have experienced an early season which gave results of a satisfactory nature. Prices are firm but unchanged.

TORONTO

TORONTO, June 13.—Interest centers in turpentine during the week which records an advance of 5c per gallon in addition to increased uncertainty with regard to the future. A narrowing of the range on linseed oil is also noticeable in quotations for the week, the decided strengthening of the seed market proving a factor in this. Mixed paints continue to move out freely with prices unchanged. Paris green is moving out now though some trouble in getting supplies is reported in some quarters. Business generally is considered excellent.

Range Narrows on Linseed Oil

Toronto.

LINSEED OIL.—The range of prices named on linseed oil shows a narrowing tendency during the week and the market is decidedly firm. One source intimated that on spot delivery of oil they

THE CANADA PAINT CO.

LIMITED

Makers of the

Famous Elephant Brand White Lead

572 William Street, Montreal 112 Sutherland Avenue, Winnipeg

If interested, tear out this page and keep with letters to be answered.

would not want to quote less than $1.92 for raw, which is 2c above highest quotation shown below. The movement of seed shows little improvement and crushers generally are behind with their orders. Cash prices on No. 1 N.W.C. flax on the Winnipeg exchange advanced from $3.58½ per bushel last Wednesday to $3.81 yesterday, this element proving a factor in stiffening quotations. Business is reported good, though shipments must depend on deliveries from the mills.

	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 bbls.	$1.86-$1.90	$1.88½-$1.93
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Records Substantial Advance

Toronto.

TURPENTINE.—A substantial advance has been made in the quotations prevailing on turpentine and the strength of the market at primary points would indicate that even higher levels are likely to be reached. The curtailment in production due to the diverting of the labor in Southern States to more specific war work is a decided factor in the present strength of the market. This may be further determined when it is known that some producers are not quoting at the present time at all. Some shipments of turpentine have reached the local market but supplies are not available in very liberal quantities. Quotations show the following range:

	Imp. Gal.
1 barrel	$0 78-$0 85
2 to 4 barrels	....- ....
5 gallon lots	....- 0 95

White Lead in Oil Holds Steadily

Toronto.

WHITE LEAD IN OIL.—The market on white lead in oil shows no further revision during the week and prices are holding steadily at figures named last week. A fair amount of business is moving but difficulty in securing ample supplies of linseed oil in some quarters is restricting sale of white lead in oil to some extent, it is said. The present range of quotations on pure, in ton lots is $16.25 per 100 pounds, with smaller quantities selling at $16.60 per 100 pounds.

Mixed Paints Enjoy Continued Activity

Toronto.

MIXED PAINTS.—Sales of mixed paints are very actively maintained and reports from all sources indicate a very satisfactory volume of business being transacted. Retailers seem to be going after trade far more aggressively and their liberbal buying is a tribute to the success they are having with their various selling campaigns. Prices have shown no change during the week, figures being as shown in current market quotations.

Glass Trading Light; Putty Unchanged

Toronto.

GLASS, PUTTY.—Trading in glass is rather quiet at the present time and dealers are experiencing no difficulty in taking care of orders. Stocks are in very fair shape and some shipments are coming along, sufficient to maintain the range of sizes under present conditions. The discount remains the same at 25 per cent. with lists unchanged, as shown in current market quotations. No new item of interest has developed in the situation as regards putty. The demand is only fair and prices unchanged at levels established last week as follows: Standard bulk in casks, $4.60; 100 lb. drums, $5.35-$5.45; bladders in barrels, $5.50-$5.70 per 100 lbs. Pure putty takes an advance over standard of $2.00 per 100 lbs.

Paris Green Moving; Supplies Held Up; Brooms

Toronto.

PARIS GREEN, BROOMS.—A splendid movement of Paris green has been apparent during the past couple of weeks, but in some sources there are indications that supplies are somewhat hard to get through. The big sale of this develops during the next few weeks, and efforts to get all booked orders away to retailers are being aggressively adopted. The situation in respect to brooms continues firm and it has been found necessary by some manufacturers to eliminate all the better grades temporarily at least, until the new crop of corn is harvested. Further advances in prices are hinted at but no definite action has yet been taken in this regard.

WEEKLY MARKET REPORTS

(Continued from page 51.)

do not represent any very large percentage of the total output.

Production

Production of pig iron in May was at the rate of about 40,900,000 gross tons a year, or somewhat less than was estimated in many quarters, estimates of the average rate running up to 42,000,000 tons. However, the May rate was the greatest on record, barring October, 1916. On the basis of pig iron, it may be estimated that the output of steel ingots was at the rate of at least 43,000,000 tons a year. Under the new order of things, brought about by the 100 per cent. pledge for war efficiency, the production of ingots is stimulated while the production of finished rolled products is curtailed, relative to ingots. This comes about by the mills melting up as scrap such material as shell discard steel and sheet bar crop ends, whereby this material is weighed over again in ingot form whereas under former practice the material was rolled into merchantable form, shell discard steel making light rails, concrete reinforcing bars, bedstead angles, etc., while sheet bar crops were piled and rolled into sheets suitable for certain purposes, not particularly exacting.

Manufacturing conditions in the iron and steel industry as a whole are fairly satisfactory, and somewhat better than was expected last winter could be the case at this time. Transportation facilities are practically adequate. Coke supplies to blast furnaces are a trifle scant, but the large amount of new by-product coking capacity about to come in should entirely right that situation. Labor supply is not altogether adequate and is probably restricting production by a very few per cent. The iron and steel industry, however, is running at only about 5 per cent. below the best it could do were all conditions altogether favorable.

No Black Sheets for Canadian Jobbers

"There appears to be no provision whatever for ordinary jobbing or manufacturing requirements in steel sheets until such time as the recent order of the United States government is withdrawn or modified," stated A. T. Enlow, president of the Dominion Sheet Metal Company, Limited, of Hamilton. "We understand Canadian requirements will receive the same treatment as those originating in the United States. The order of the War Industries Board announces that all steel-producing plants are taken under government control in regard to the production of steel and distribution will be given preference according to the following schedule: (a) Ships, aircraft, munitions; (b) military and navy supplies and operations; (c) steel for production of fuel for essential uses; (d) steel for production of food and for collateral industries; (e) steel for manufacturing, railroads, public utility."

To Standardize Tire and Rim Sizes

Formal approval was given recently at a joint meeting of the directors of the National Automobile Chamber of Commerce and the war service committee of the rubber industry to the plan to simplify and standardize pneumatic tire and rim sizes. This suggestion was made by the commercial economy board of the Council of National Defence. This plan reduces the number of sizes from approximately 200 to 28, thereby conserving manufacturing facilities, reducing capital invested in raw materials and finished products and giving better service to automobile owners by eliminating a lot of unnecessary sizes and styles.

Sometimes it is not possible to give him a range to choose from. It is advisable to restrict the range as much as possible. There should be enough variety, but not too much.

MORE IMPORT EMBARGOES ON THE WAY?

IMMEDIATE effect on your business of the existing embargoes on imports from the United States is rightly your first consideration to-day, but shrewd business men are looking ahead so as to prepare for what may happen. By studying the purpose of these embargoes, and their relation to the Victory Loan, and the Banks you will gain valuable fore-knowledge of conditions affecting Canadian business in the near future. Here is something to know which will help you:

In THE FINANCIAL POST dated June 8th there appears a special front page article under the title

"Exchange Rate Goes Up in Face of Embargoes"

From this article you can get quickly a thorough grasp of the situation. It may mean real money to a keen business man to read this article, and size things up for himself from the accurate facts there given. But THE POST contains much more in the way of really valuable factful help for business building under present conditions. Just run over these headlines from the issue of June 8th:

Canadians Cut Wood and Carry Water to Pay Alien Taxes.
The West is Exercised Over the Fruit Prohibition.
New Breaking Checked in West — Labor Problem Serious.
Graft Charges Against Heads of Canadian Car.
Readjustment of Wages—An After-War Labor Issue.
Canada's Credit Being Shaken by Legislation.
War Tax Cutting into Dominion Steel Profits.
News of Securities—15 Columns of Essential Facts.
Policy of Banks Regarding Loans to Farmers.
Shipbuilding and After-the-War Adjustment.
Farm Land Values Must Not be Inflated.
Canada and U.S. Trade Position Improving.
Boom Days for Canning Plants—Coast to Coast.

These are by no means all THE POST'S contents of interest to alert men of business. Here is what a business organizer in one of the most important industrial sections of Canada says of THE POST:—

"I would not miss your paper for a very great deal. I find it really all that is necesary to keep me very intelligently posted on such Dominion-wide considerations as really matter."

Try THE POST by subscription for a time and note its power to help your business development. Get THE POST each week and go into it thoroughly. Just fill out this form for trial subscription:—

SPECIALISTS

Some doctors are just doctors. Some doctors are specialists. Did you ever go to a doctor who prescribed for you, and the beastly stuff cost you $3.00, and after shaking and taking you felt worse? Another visit and the doctor said: "We will try something else"—another $3.00 and results as before.

One visit to a specialist who can diagnose your case correctly and prescribe what is necessary and all is well.

There are doctors and specialists in every business. A Specialist in white metal alloys never needs to experiment with his customer. All experimenting has been done long ago and that is why we

THE CANADA METAL CO., LTD., ARE SPECIALISTS.

All experiments are conducted by our own chemists in our own laboratories, and whether you are interested in

BABBITT METALS—SOLDER—SHEET LEAD—LEAD PIPE

or any other white metal alloy, you cannot do better than get in touch with us. You will never be advised to "try something else." You will get exactly what you want the first time.

Mr. Potato Bug is on his annual rampage

The bug season is on and it's up to you to have your stock of Paris Green in shape to meet the heavy demand that is bound to be made upon it. Last year the supply was far below the requirements with a resultant heavy loss of potatoes. This unfortunate experience will cause a heavier-than-usual demand this year. Dealers best prepared will net the most sales.

We are the manufacturers of

Munro's Pure Paris Green

which is of greater strength than the Government Standard requires. Our advice to you is to order *at once*. The supply is limited and the demand will be unusually heavy.

Munro's Pure Paris Green is put up in ½ and 1-lb. papers, ½ and 1-lb. tins, 25 and 50-lb. drums, 250-lb. kegs and 600-lb. barrels.

Order to-day either direct from us or from any jobber listed here.

Empire Mfg. Co., Limited
London Toronto

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Avenue, Montreal

YOU'LL MAKE MONEY ON THESE BECAUSE—

BLACK DIAMOND Tarred Felt
JOLIETTE and CYCLONE Brands
Sheathings, Roofings and all lines of Building Paper are of the best material and sure to secure repeat orders.

Saves money for your customers. They'll reciprocate—by giving you their business in other lines.
We also sell you wrapping papers of all descriptions.
All kinds of Sheathing made at our own mills. Our reputation is behind all these Brands.

Each Succeeding Spring Means a *greater* Paint Turnover ?

Repeat orders and new business that swell Stephens Sales are merely the results we anticipated from the good-will begun the first day Stephens Paints were manufactured.

Year after year sales increase in volume — each succeeding year means a greater Paint turnover than ever before. And we always knew it would.

Stephens

If you are not satisfied with your paint for this Season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

Let us explain the Stephen proposition and tell you what it is doing for other dealers.

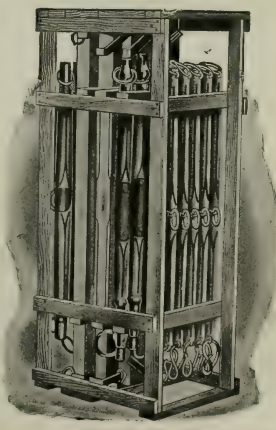
WINNIPEG, MANITOBA LIMITED

Protected by the Westwo Guarantee

Selling Westwo Painted Waggon, Implement and Plow Sets is satisfactory and profitable. They are made from selected No. 1 quality Oak and Hickory, are carefully painted (2 coats), striped and varnished, and are absolutely guaranteed against defects in material and workmanship. The best way to order Westwo Painted Sets is in crates of six sets. Then you're sure of getting them in perfect condition. —no bruised woods—no marred finish.



Guarantee

All Westwo Sets are guaranteed, and any defective part will be replaced free.

Send to-day for the Westwo folder that describes the various Westwo lines.

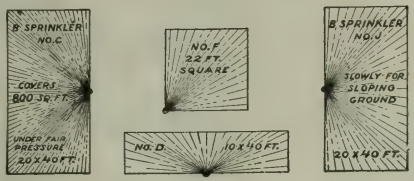
SPRINKLERS



Order the style that best fits your lawn. Stock Style D, F & J.

B. Sprinklers are made in four styles so that different shaped lawns may be irrigated. They do not throw water on side to which hose is attached; therefore, may be picked up and moved without turning off the water.

The only Sprinkler that will irrigate the lawn right to the edge of the sidewalk without wetting the walk.

Thos. Birkett & Son Co.
LIMITED
OTTAWA, ONTARIO

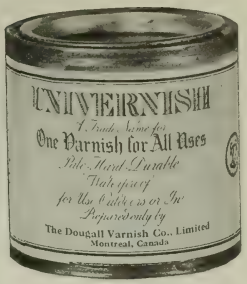
"PEP" AND PULLING POWER

The interior of your store is the first impression the public gets of you, Mr. Merchant—your business methods—your stock of merchandise. If your goods are piled haphazard on "pine shelving," with no attempt at display, the buying public goes elsewhere to purchase. You must keep the vitality of your business high by putting "Pep" and Pulling Power into your store interior. It's mighty poor policy in this "day and age" to "stand pat" with old-fashioned shelving.

DULUTH SECTIONAL HARDWARE STORE FIXTURES have an irresistible "pulling power"—they attract the right kind of trade—trade that is worth while. Our expert Hardware Store Architects—without charge—will show you how to put "Pep" into your store.

Ask for our handsome catalog No. 10C—and also our Special Store Planning Blank.

DULUTH SHOW CASE COMPANY
DULUTH, MINNESOTA, U.S.A.



UNIVERNISH

"the varnish that lasts longest"

This varnish beats them all. You can pour boiling water on it, spill hot tea, coffee, ammonia or alcohol. Nothing harms it. Nothing turns it white.

It is uniform in quality and color.

Buy a can now and in six months it is the same. You will get the same satisfying results with it.

This is the VARNISH a dealer should always have in stock.

Order a case to-day.

We will gladly send you our proposition on request.

"That's it—Muresco!"

The wall finish that doesn't peel, crack or rub off—the wall finish that makes possible the most elaborate color scheme in residence or public building.

You can put Muresco on your paint counter in perfect confidence that every sale will mean a satisfied customer.

Muresco will make you big profits. Ask about our agency proposition.

BENJAMIN MOORE & CO., LIMITED
West Toronto

Twelve Cents Per Word!

Several weeks ago a firm in Vancouver, B.C., telegraphed a want ad to Hardware and Metal. They wanted a clerk in a hurry and wished to catch the earliest issue.

The cost of a telegram from Vancouver to Toronto is ten cents per word, added to this was our charge of two cents per word.

This firm had faith enough in Hardware and Metal's Want Ad column to pay *twelve cents per word,* for an announcement in this column. This little story speaks for itself. Mail or wire your want ads, we will accept them until Thursday noon for the current issue.

Hardware and Metal Want Ad Dept.

AUTO FUNNELS AND FILLERS

This is a line, Mr. Dealer, you should not neglect. Practically every farmer to-day buys gasoline. This six-quart Automobile Funnel has a one hundred mesh gauze in the tube and also an attachment for a chamois cloth which is very convenient. The filler also has a one hundred mesh gauze in the funnel and is so shaped that it is easy to pour gasoline into a tank in any position. They are made from the best grade of Aluminum Coated Galvanized Iron.

A Good Thing Free

HARDWARE AND METAL has secured another supply of pamphlets, containing the four Stockdale lectures, for free distribution to the trade.

Under the following captions one of America's foremost Retail Merchandising Experts gave in a clear, lucid style the why and wherefores of the success and failures in retail stores:

"Many Businesses Wrecked by Details"
"How to Make Figure Facts Earn Profits"
"How to Measure the Value of Turnover"
"How to Get the Information the Customer Wants"

We have had these printed for our readers and will gladly supply copies free upon request, so long as our supply lasts. Send for your copy now.

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

There's nothing like selling the best of everything. Good profits in our handles, too.

J. H. Still Mfg. Company

ST. THOMAS -:- ONTARIO

Tree Pruners

The great efforts to increase food production which will be made this year will tend to increase sales of tree pruning tools. Every grower will be anxious to give his trees every assistance to bear well.

You can do your part by being prepared to supply the most approved type of pruners. We have many styles all positively guaranteed against defects in material and workmanship.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

YOUR WANTS

are many here below. Use HARDWARE & METAL want ad. page and get rid of a few of them.

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

INCREASE
Your Selling Capacity

Our Carrier Service will increase your selling capacity without adding to the number of your salesmen. The statement is concisely, though fully, explained in our four-page leaflet. By its analysis the matter is at once seen—as it really is—to be practical and so simple that it is often overlooked, chiefly through the long and studied arguments of those who are interested in introducing more costly machinery and complicated methods. The leaflet for the asking. Write for it to-day.

GIVE HIM THE BOOK

A Builder of Good-Will for YOU

When a Gargoyle Mobiloils dealer distributes the book "Correct Lubrication" among his customers, he finds that it is a great builder of good-will.

For instance: A motorist says: "My engine is knocking. What is the matter?"

The dealer opens the booklet to page 27 and says: "There you are. You see there are eleven conditions which can make an engine knock. Take the book along with you; it's well worth reading through."

The customer finds that he has been given a booklet which contains a great deal of valuable help and many interesting facts.

He sees eight pages listing all engine troubles and the remedies for each. He has seven pages of interesting reading on economical maintenance. There are six pages giving him information on oil tests and their relation to correct lubrication. Two pages explain why he should clean his crank-case frequently.

GARGOYLE

Mobiloils

A grade for each type of motor

And so it goes,—good advice on Transmission Lubrication, a Chassis Lubrication Chart, Chassis Troubles—their Causes and Remedies, and finally—the Complete Chart of Automobile Recommendations recognized as the scientific guide to correct lubrication.

Motorists appreciate help of this kind. "Correct Lubrication" goes into the tool box, not into the waste basket. (It advertises your stock of all grades of Gargoyle Mobiloils and Greases. It emphasizes the fact that you are an up-to-date merchant).

If you have not made proper use of the booklet "Correct Lubrication," look through a copy now and you will see how it will impress the average motorist who comes to you.

Write us at Room 704, Imperial Oil Building, Toronto, for a copy of this valuable "Assistant Salesman" and for full information regarding our proposition to dealers.

The T-235 Gilbert & Barker Automatic Return Five Gallon Curb Pump.

THIS PUMP GIVES YOU ALL THE PROFIT POSSIBLE IN GASOLINE SALES

If you sell gasoline to motorists, this pump will increase your profits by preventing spilling waste, giving quick service, saving your own and the customer's time. Exact measurement fairly treats both dealer and customer; indicator shows customer what he's getting; pump discharges five gallons at one stroke in twenty seconds, or single gallons, as desired. Mechanism always enclosed; absolutely dust and dirt-proof. No fire hazard.

If you are not handling gasoline, you are not only losing easy profits, but also additional profits on motor accessories that motorists buy where they get their gasoline. Install a Gilbert and Barker Gasoline Pump; it attracts trade. Get your share of the gasoline profits which growing commercial motor transportation makes bigger every day.

Write for our catalogue of gasoline and oil storage equipment for progressive dealers. Full information can be secured from

MICHELIN Tires Are Worth More Than They Cost

Although Michelin Tires are *not* cheap they *are* economical. They embody the utmost durability that can be built into a line, or that has as yet been produced by any tire maker.

Dollar for dollar, the motorist gets more mileage from Michelin Tires than from any other make—and in addition he receives the extra value which attaches to Michelins because of their well-known superiority in resiliency and freedom from tire trouble.

Hence it is that "Once a Michelin User, Always a Michelin User".

Write for Michelin's Dealer Proposition.

What Will You Do For Help?

FARM help is scarce, but this condition can be relieved to a marked degree by using machines that accomplish more work in a given time with less man power.

Why should the farmer cling to horses—a slow, expensive means of power—when every other business is adopting the truck and thereby reducing the cost of hauling, speeding up deliveries, and saving for human needs the food that the horses would otherwise consume?

The motor driven truck can work constantly at maximum load under the burning summer sun, or in the coldest weather. Unlike the horse it needs no rests while working, it eats only while in actual use, and when the day's work is done it requires very little attention, and leaves you free for other "Chores" about the place. Then, it can be housed in one-quarter the space of the horses, wagon and harness it replaces.

It is a mistaken idea that a truck is useful only for driving upon paved roads. The Ford can be driven all over the farm, and used for hauling grain, potatoes, fruit, roots, fertilizer, wood, stock, milk or any other product. The speed it travels, the time it saves, and its low upkeep cost appeal very strongly to all users of the Ford Truck. If you need help, order your Ford One Ton Truck today.

All prices subject to war tax charges, except trucks and chassis

Miniatures of illustrated letters (in colors) mailed to a list of your customers. Booklet enclosed

Your letterhead and signature used. No cost to you—not even postage

An advertising campaign in your city—

The final gentle push that sends the business to you

MANY motorists will admit that the brakes on their cars need relining. To sell them brake lining it is only necessary to call the matter to their attention.

We have prepared these attractive illustrated letters that act as a final reminder that brings these customers in to you.

These are personal letters from you to your customers. They will advertise your business.

The letterhead will be identical with your own. Your signature will be shown at the bottom. On the outside, the illustrations shown above will be reproduced in colors.

These letters are a part of the co-operative plan free to dealers who stock Thermoid. Back of this plan is a product that makes satisfied customers. Thermoid Brake Lining makes good business for you for three reasons.

More material, greater service

1. There is over 40% more material and 60% more labor used in the manufacture of Thermoid Hydraulic Compressed Brake Lining than in any woven brake lining. This abundance of material and labor means longer wear.

Grapnalized

2. Thermoid Brake Lining is Grapnalized, an exclusive process which creates resistance to moisture, oil and gasoline. Moisture causes brake lining to swell, making it grab or slip.

Hydraulic compressed, uniform throughout

3. Every square inch of Thermoid is hydraulic compressed at a pressure of 2,000 pounds. Thermoid is uniform all the way through. It cannot compress in service. There are no soft spots to wear out quickly. It will give uniform service until worn cardboard-thin.

Our new book, "The Brake Inspection Movement and What It means to Dealers," tells in detail how we have planned to advertise your store direct to the car owners of your city—over your name. It is jammed with interesting and profitable ideas for increasing your business.

If you have not received your copy of this book, write for it to-day. Write also for a sample of the illustrated letters.

When you sell Thermoid you are protected by our guarantee: ***Thermoid will make good—or WE WILL.*** It is positively guaranteed to outwear and give more satisfactory service than any other brake lining.

Brake Inspection Movement

Prominent officials, leading clubs and organizations and motorists everywhere have endorsed this big national movement to reduce automobile accidents by having all brakes inspected before the touring season begins, and regularly thereafter. Give it your support. Tie it up with your store.

$\frac{V^2}{10.8}$ Will your car do this?

Automobile engineers have proved that when brake mechanism is right and road conditions average, any car should stop at distances and speeds given by the chart.

V^2 means the square of the velocity or speed of your car. 10.8 is the proved factor of retardation under average road conditions. This factor decreases on smooth slippery roads to 6.7 and increases as high as 17.4 on rough worn roads. The chart represents the average condition and other conditions can readily be figured by changing the factor within the given limits.

Remember that your brake mechanism is not "right" unless its brake lining has the ideal co-efficient of friction. The better the brake lining the quicker your stop.

Thermoid Brake Inspection Chart

Cuts, rips, scales. Blade folds into handle. Locks when open. Can be carried in pocket --or open in sheath. List price now $1.25.

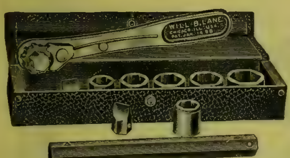
Marble's Auxiliary Cartridges

In great demand now because they cut the cost of rifle practice or small game shooting with a big game rifle. Shoot pistol cartridges just as accurate as regular rifle ammunition—and saves 75% or more of the cost. Does not harm rifle. List price, 75c.

PROTECT YOURSELF.

By placing a liberal order with your jobber now. You can't make an extra 10% on your money easier and surer than by investing in Marble's specialties.

Marble Arms & Mfg. Co., 5350 Delta Ave., Gladstone, Mich.



FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

"Leaders In the Field"

The purchase price of Diamond Tires would be among the **highest**, if tires were sold at so much per delivered mile. **Diamonds cost LESS to buy, and Diamond Tires cost less to run.**

In all kinds of service throughout the United States and Canada Diamonds are cutting tire "upkeep," for after all the purchase price of a tire **means nothing if it does not wear well.**

In buying Diamonds your customer begins to cut "tire upkeep" costs from the first minute. He keeps on cutting "upkeep" **the more he runs it.**

Just tell this to Mr. Prospect:
"When your car is equipped with four Diamonds you are cutting tire 'upkeep' **four ways at once.**"

MOSSBERG

ALL STEEL WRENCHES AND TOOLS

Mossberg Assortments of Popular Sellers

Display board, open end wrenches.

As a part of the progressive Mossberg policy of producing the leading standard repair tools, the most popular sellers in the line have been grouped and are offered on Display Boards and in Chests.

These silent salesmen are doing effective work for hundreds of dealers. They are offered free with a first order, and are an addition to any store. Why not let these efficient displays work for you?

Dealers, write for catalog and prices on complete Mossberg line. We have an interesting co-operative proposition for you.

No. 300 Socket Wrench Chest. An excellent store fixture and business builder.

Our simple sales policy is to deserve your business.

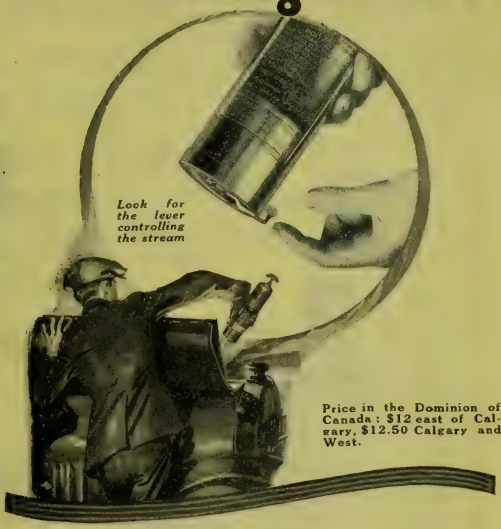
Johns-Manville Fire Extinguisher



A fire-fighter that sells itself on points---like all Johns-Manville Accessories

Any fire extinguisher is half sold in the shelf because people—particularly motorists—fear fire. Here is a machine to which every refinement has been added—two methods of operation, assuring mastery over any fire, make it a faster selling article in your stock.

It is not only safer, surer and more effective in fighting fire, but it is handsome in appearance—distinctive and attractive show case goods.

You can stock this machine with the fullest confidence that, regardless of the quantity you buy, it costs you no more than it costs the gross-lot buyer. Like all other Johns-Manville accessories, it is distributed on a clean-cut jobber dealer basis designed for your protection.

Unlike any other fire extinguisher the Johns-Manville can be discharged by compressed air previously pumped and temporarily stored. It is optional with the operator whether he employ this method or the ordinary one of pumping the stream.

MISCELLANEOUS

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

MANUFACTURERS DESIRING REPRESENtation in Montreal and the Province of Quebec are requested to send catalogs and to communicate with Imperial Supply Co., 104 Delorimier Ave., Montreal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

AN EXPERIENCED SALESMAN WOULD LIKE high grade lines for Montreal and Province of Quebec. Replies to Box 400, Hardware and Metal, 128 Bleury St., Montreal.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

WANTED--A GOOD MAN

Man with good knowledge of hardware trade who can prepare trade literature, write sound business letters, and prepare articles on the big questions which are constantly arising and which affect the hardware trade. Must be able to interview big men in the trade, and discuss intelligently present-day problems as they affect various branches of the hardware trade, both at home and abroad. A good salary will be paid to the right man.

Apply Box 209.

HIGH-CLASS TOOLS

The measure of your success is governed by the class of goods you have to sell, for there is something in the appearance of a well-made tool which carries to the mind a conviction of its efficiency. *That is "Selling Force," while the actual working qualities keep it sold.*

Particularly true is this of the **Disston Saws and Tools,** and in calling special attention to the

DISSTON
PLUMBS and LEVELS

you will find they stand in a class apart from others in regard to Quality of Material, Workmanship, Efficiency and Beauty of Finish.

The simplicity of the adjustment feature is one which will appeal to all users. Operated by double jamb-screws, easily accessible, the adjusting requires but a moment's time, is firm and secure, there being no spring tension to get out of order, nor can the screws rust in position.

The stocks are made of selected lumber, long and well-seasoned. All brass ends are of solid drop-forged metal, not hollow castings.

Announcing a new saw, "The Cavalier" Made especially for our trade—

Caverhill, Learmont Mail Orders

We take pleasure in announcing to the trade our new saw, "The Cavalier." It is made to sell at an attractive, low price. When quality, material and finish of this saw is considered, it will be seen *why* it should be a fast seller from the first.

"The Cavalier" is made from refined silver steel with skew back and fine, roomy handle. Has a well-balanced "hang" —accurate grinding and taper back.

Stocked in the following sizes:

Panel 18, 20 and 22 inches.
Hand 24 and 26 inches.
Kip 26 inches.

When ordering, remember we carry everything in harvesting accessories.

The mail order house with the reputation for 100% *reliable service, rapid delivery.*

The Motoring Public Constitute the Jury

Motorists say that National No. 805 Gliding and Swinging Garage Door Set is an exceptionally easy-working Garage Door Set—a push and the doors are open; a pull and they are closed. There is absolutely no binding friction.

When closed, doors fit snugly, swinging into the jamb against stops. Doors are perfectly weather-tight and as they open inwards, snow and nice cannot interfere with opening and closing.

When open, doors fold and slide against wall, occupying a minimum of space in the garage. One door is so hung as to open independently, giving free access to garage at all times.

Set No. 805 includes—No. 29 Latch, 1 Swivel Hanger, 6-foot Braced Rail, 4½ pair 4 x 4 Jap. No. 505 T.P. Butts, 1 No. 820 Chain Bolt, 1 No. 830 Foot Bolt, 1 No. 5 Pull, 1 4½" No. 30 Safety Hasp, all necessary bolts and screws.

Order a few sets of these and put them where they'll be seen. They'll soon go.

Crescent Brushmop

MORE PROFIT

because of

LESS SELLING EXPENSE

Show the prospective customer the advantage of buying a mop that will hold a scrub brush, making it unnecessary to get on the knees to scrub and the sale is made.

The "Canada"

The Crescent Brushmop

has an all-steel head and holds a mop cloth and scrub brush which may be used separately or both at one time.

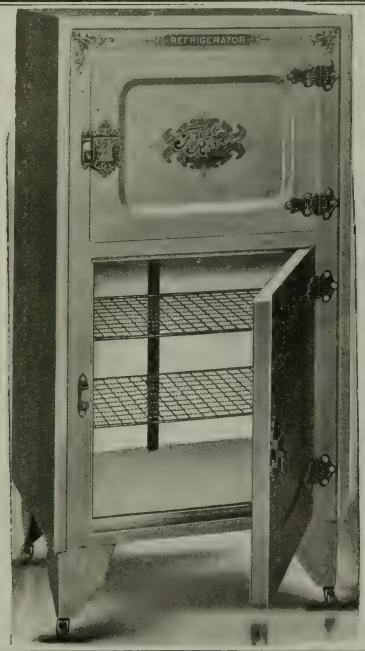
The "Canada" has a cast head and holds a mop cloth only. High grade copper-ed steel wire springs are used which hold securely and allows a quick and easy adjustment.

Metal parts are japanned to resist rust. Fitted with hardwood handle.

Manufactured by

Canada Steel Goods Co., Limited

HAMILTON, CANADA



Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned French Grey, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

Genco RAZORS

A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

THE space occupied by this Genco Razor Display Case is about one square foot. Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.

The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.

All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.

We are making a special proposition which included one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

BT Ready-to-Ship Pumps

Seven Perfect Pumps

The BT line includes seven pumps—seven pumps that satisfactorily meet with every demand—seven pumps, better in design, better in workmanship and better in price than any other pumps of their kind. BT Pumps are ready to ship, ready to sell, and practically ready to instal. For house or barn, engine or windmill, outside cisterns, shallow wells and deep wells.

And they are easy to handle. You buy and stock and sell them as you please—the service we always give makes the selling easy and convenient for you.

PUMP CYLINDERS

Our ready-to-ship idea cut down our cylinder varieties to only 67 sizes. This is of benefit to us, the dealer and consumer. We are now making them better and cheaper and selling them for less money.

BT Pump Leathers are cut, formed and finished with the greatest care. Only best portions of hides are used, and will keep in stock for years without deterioration.

Our catalog explains thoroughly advantages of selling BT Ready-to-ship Pumps, Pump Cylinders and Pump Leathers.

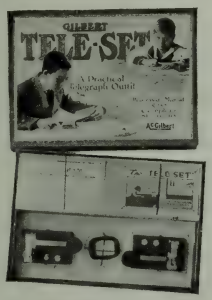
GILBERT TOYS

Here are some of the newer toys which have been added to the Gilbert line. They appeal to the large number of boys who are interested in electricity and offer them an opportunity to study many different applications of this wonderful force. A manual of instructions, written in good plain boy language is included with each outfit explaining its possibilities so that the boy's interest is aroused and held.

These toys will be nationally advertised this year along with all Gilbert Toys and boys in your town are going to want them. Be sure your stocks are complete.

We will gladly send you our complete catalog or have our representative call upon receipt of your request.



TELE-SET

A new addition to the Gilbert Electrical Toys. It comprises two complete telegraph outfits with interesting and instructive manual on telegraphy, at a price where all boys who are electrically inclined can afford to buy it.

Retails in Canada $2.65

PHONO-SET

Another new Gilbert Electrical Toy. A practical set of two miniature telephones. Will operate from cellar to garret or from house to house. Entirely different from other electrical toys.

Retails in Canada $5.95

ELECTRICAL SETS

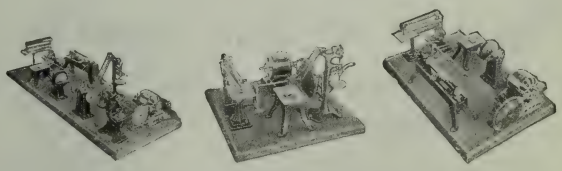
These sets are the foundation of the Gilbert Electrical Toy line. They have been improved every year until now they represent the best value for the money on the market. They give a boy an excellent elementary course in electricity. You should have a quantity of each size on hand.

Retails in Canada .....$1.50 to $15.00

WIRELESS TELEGRAPH OUTFIT

This outfit contains complete apparatus together with illustrated manual of instructions for teaching a boy the fundamentals of Wireless Telegraphy. Complete with two sending and receiving stations. Operates with buzzer instead of ticker. An excellent seller.

Retails in Canada $7.50



MINIATURE MACHINERY

The latest addition to Gilbert Toys. A complete line of actual working Toy Machinery. With these toys a boy can have a complete machine shop or a single machine. They are sold separately, or with direct drive motors, or as a completely set up shop with motor power attached. Made of cast iron black enameled finish, with nickel plated parts, they look real and have a big appeal to the boy who is mechanically inclined.

The usual big advertising on Gilbert Toys will include these new items and many of your boy customers will want them.

Retails in Canada .....$1.50 to $37.50

The REASON

For the Creation, the Fall, and the Rise

The original creation of a flexible back hack saw blade was the outgrowth of the dissatisfaction arising from the constant breaking of the "all hard" blade.

While an "all hard" blade may have a perfect cutting edge, the blade itself is so hard or brittle, that a twist is liable to break it.

Users strongly objected to this continual breakage.

Then came the flexible saw. While it would not break, neither would it cut. Most manufacturers forgot all about the "cutting ability" of a blade and devoted their efforts to making it "flexible."

As a result of this "extremity" in the desire to produce a flexible blade without due regard for its cutting edge, mechanics and users everywhere lost faith in all flexible blades—and even in this advanced age thousands of men still hold to their old-time prejudice against a flexible hack saw blade.

"The Victor Flexible" won't break and will cut"

But we Victor folk, after exhaustive research work and the creation of a scientific process have developed a hack saw blade that *won't* break — and *will* cut! It not only cuts when it is new, but continues to cut until the blade is worn out. Further, we guarantee it to cut as well as any "all hard blade" on the market; and under reasonable conditions, we guarantee it not to break!

Victor "Flexible" Hack Saw Blades are intended for hand frame use only. They are not intended for power machine work.

Victor "All Hard" Blades are used for both hand frames and power machines.

"VICTOR FLEXIBLE"

The Hack Saw of True Economy

Economy does not consist in the reckless reduction of first cost. On the contrary, such a course usually leads to inefficiency and increased expenditures.

This is more true of Flexible Hack Saw Blades than any tool we know of.

Some people believe that the spirit of the times is "Rush." But it isn't. The dominant spirit of the times is effectiveness. Anything done effectively is done quickly because no time is lost.

We make Victor Flexible Hack Saw Blades for the kind of work that a "Flexible" saw will perform better than any other blade.

"The Victor multiplies efficiency"

For the kind of work that a Flexible blade is intended to do, the "Victor Flexible" is the most effective and economical Hack Saw Blade ever produced. This blade multiplies the efficiency of the man who uses it; and therefore it multiplies the efficiency of everyone connected with that man's work.

A Victor Flexible Blade is a very small thing. It looks very much like all other hack saws. But put it to an actual metal cutting test, and the difference will soon be apparent.

The Victor Flexible is made exclusively for hand frame work

This Victor Flexible Blade is made exclusively for hand frame work.

For power machine work, we recommend our Victor All Hard Blade. But as this booklet is intended to set forth the merits of our "Flexible," we will concentrate our talk on this one style of blade.

ESTABLISHED ORDER CHANGED

In the past there have been some Flexible Blades on the market which would not do as much work as "all hard" blades. For this reason some mechanics have concluded that no Flexible Blade could be as efficient as an all hard blade.

VICTOR SAW WORKS, Ltd.

HAMILTON, CANADA

If interested, tear out this page and keep with letters to be answered.

The efficiency of "Victor Flexibles" has changed the established order of things. Here are some of the virtues of this Super Hack Saw Blade:

1. Victor Flexible Blades are made from a high-grade alloy steel containing Tungsten, Silicon, Manganese and Carbon. We *do not use spring tempered steel.*

2. Some of the principles employed in the construction of our Flexible Blade are the same as we employ in the construction of our all hard blades. For example: All teeth in Victor Saws are milled, not punched. The "punching process" rounds the edges of the teeth and tends to crooked cutting. "Milling" is the slower and more expensive method, but it is also more "effective" —and in the long run, it pays.

3. If you bend a "Victor Flexible" excessively, the edge will show a clean break for about ⅛ in. from the cutting base of the teeth. But the back of the blade will not break, as it is scientifically tempered to a flexible degree. This proves that the blade is hardened just where it should be hard —and that it is flexible where it should be flexible. In our Victor Flexible Blade the teeth are set by our patented process. We have gained by this process a very definite advantage—and it is largely responsible for distinguishing the Victor Flexible Blade as the "Super-Saw" for hand frame use.

When sawing in ash and rosewood, it will not break

4. Ends are tempered by a special process. This insures increased tensile strength—and prevents the ends from breaking or eyes pulling out.

5. Victor Flexibles are constructed on the same principle as a cold chisel; for the cutting edge *only* is hard.

6. The reason for the popularity and success of the Victor Flexible is this: Regardless of cost, we have always preferred to make the blade scientifically right. Victor Flexible Blades are popular because they are sturdy in the hands of unskilled as well as skilled workers, returning the greatest value per dollar on the buyer's investment.

Does it help any to hear the owner say: "Patch' him up, doctor

When a loose brick falls from a chimney and lights on your head, does it help you any to hear the owner of the building say: "Patch him up, Doctor, I'll pay the bill."

Wouldn't it have been better to construct the chimney right in the first place?

Some people are willing to spend a lot of money to untangle errors and make up for lost efficiency. But the wiser course has always been ours; we make Victor Flexibles right in the first place. We believe in prevention, rather than reparation.

WE MAKE NOTHING BUT HACK SAWS

One reason why Victor Hack Saws have attained their position of dominance is that for over twelve years we have concentrated all our energies on the perfection of *hack saws.* We do not scatter our attention; we have focused all our powers and research work on one tool.

To-day, more than at any other time in the history of the world, people are interested in economy. Everyone is beginning to realize the wicked extravagance of doing things twice, when a little care surrounding the "first effort" would have accomplished the desired result.

Its success is due to intelligent research work"

Intelligent research work, hard thinking, preparedness, concentration! These have been the watchwords of the Victor Institution; and it has been the fundamental principle back of these words, that has, according to all tests, made the Victor Hack Saw, the most economical saw in the world.

"Ask Your Jobber"

Satisfaction to Your Customer

and its relation

To Your Profits

Satisfaction has a much broader meaning than appears on the surface.

Satisfaction is not only synonymous with success, but it determines whether you will remain in business or not.

Satisfaction in razors presupposes the AutoStrop—why?

Because the

AutoStrop Safety Razor

is the only razor that sharpens its own blades automatically—it is the only one which is always "on deck"—always ready to give *your customer* a clean, comfortable, velvety shave, which is the only satisfactory shave.

Satisfaction! This means satisfaction to your customer? Service of this kind means that the satisfied customer will return again and again to your store for the things he requires. It means that, in addition to making a handsome profit on your sale of an AutoStrop Safety Razor, you will also make satisfactory profits on his *repeat business*.

It pays, and pays well, to push—energetically—the AutoStrop, the only Safety Razor which never fails to give real, more business-producing satisfaction.

Order through your Jobber or Direct.

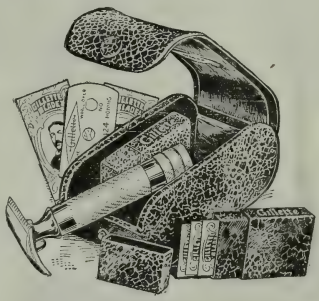
Making Ten Blades of Steel Grow Where One Grew Before

We have simply had to do it!

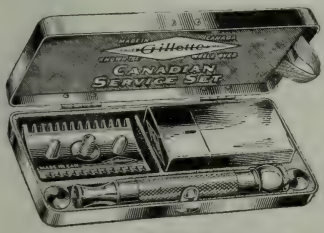
The normal peace-time expansion of the Gillette Safety Razor business might have seemed remarkable in other industries—though we had grown accustomed to expect and provide for it. But the expansion brought by the war has gone far beyond our expectations.

Never before have the men of many nations lived together so intimately as in the Allied Armies Overseas. Never before has there been such an exchange of ideas. Never had we dreamed of such enthusiastic man-to-man boosting for the Gillette Safety Razor as is going on "over there."

We are sharing with the Gillette factory in Boston the task of supplying the Allied armies—and the Allied world—with Gillette Razors and Blades. Our share includes the British Isles, Australasia, India, South Africa, Fiji, and as many Overseas troops as we can supply—in addition to the rapidly growing Canadian demand.



Bull Dog Set



Canadian Service Set

This demand—from you and the thousands of other Canadian dealers who are the backbone of the Gillette business—we are determined to take care of, come what will. So we have been doubling and redoubling our output as fast as we can put in new machinery and devise new processes. In this we have been so successful that we are literally producing ten Gillette blades now for every one we made before the war.

Besides that, we have perfected the three new Military Sets that have made such a hit with the men now joining up and going overseas. So go after the trade these new conditions are producing—we'll back you with goods to the limit.

SAMUELS' "CANADA" Dustless ASH SIFTER

The Sifter with a Multiple Sales Argument

An entirely new and exclusive ADDITION has been made to the numerous features which have already given the Samuels' reputation as the sifter with a multiple Sales argument.

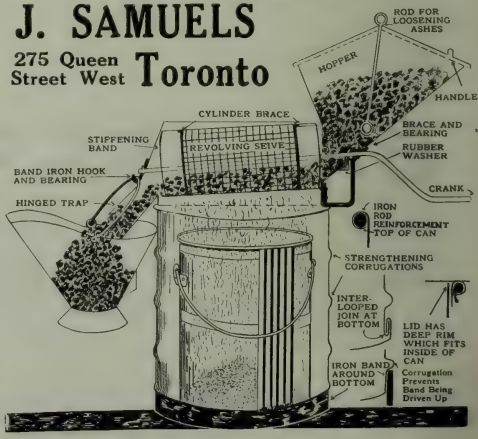
The stiffening bands on the revolving sieve have been so widened as to cause all the screenings to fall to the centre of the can. Finer screen has been adopted in making the sieve which saves much more of the fine cinders and is stronger. As the illustration indicates, a smaller ash can or pail may be placed inside the waste can and so catch all the screenings, which can then be removed more easily than if the larger can had to be carried out. This feature also makes for longer life for the Samuels' Sifter, since the waste can is not subject to the ashman's abuse.

Previously the Samuels' Sifter had the most convenient receptacle for unsifted ashes, the simplest and least laborious method of screening the ashes and the handiest means of collecting the cinders. Now, with this new method of collecting the screenings, it leaves all other sifters hopelessly behind.

The Samuels' is undoubtedly the sifter for sales and satisfaction, both from your own and your customers' point of view.

Let us know your requirements.

J. SAMUELS
275 Queen Street West Toronto



"Financial Post" says:

"Canada's grain crops exceed in area anything heretofore grown. The outlook is as good as in the bumper 1915 crop."

"That crop areas in Canada have increased fully 9 per cent., representing a total of 1,934,950 acres over the crop of 1917, is reported officially by the Dominion Bureau of Statistics, which never errs on the side of optimism."

Makes a Perfect Permanent Repair

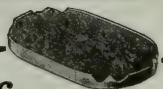
6 Round Patch & Heat Units for Punctures

Complete Outfit

$2.00 in Canada

Includes

12 Patch & Heat Units



6 Oblong Patch & Heat Units for Cuts and Tears

The Patch & Heat Unit consists of a chemically treated combustible disc on one side and a pure para rubber patch on the other. This fits over the puncture and a match is applied to the chemical disc. Without blaze or flame this disc furnishes the proper heat, which seals the cut in the tube with the new rubber, making a permanent repair.

The Patch & Heat Unit is all ready to clamp on the tube. The fuel in its metal container and the rubber patch itself are all assembled. No different parts to lose or complicated application to the tube. Simply put the unit over the puncture, clamp it down and apply the match.

SHALER

5 Minute Vulcanizer

The fact that over 500,000 motorists are now using the SHALER 5-Minute Vulcanizer is convincing proof of its ever-increasing popularity. Every motorist is a prospect for one of these handy tube vulcanizers—it should be in every car owner's tool kit—for use anywhere—on the road or in the garage.

Sell the SHALER 5-Minute Vulcanizer. Every sale of a 5-Minute Vulcanizer gives you a good profit. Besides, the big resale of patch-and-heat units furnishes you a continuous profit—it brings motorists to your place for SHALER supplies—and for all sorts of other accessories.

The SHALER 5-Minute Vulcanizer with 6 Round and 6 Oblong Patch & Heat Units packed in attractive display carton.

ORDER FROM YOUR JOBBER *NOW!*

Don't delay! The enormous demand for this popular vulcanizer makes it necessary to place your order early if you want to be sure of prompt shipment. Any jobber in the United States can supply you. Our large catalog describes the complete line of SHALER Vulcanizers for motorists' use—also complete equipment for garages and tire repair shops. Mailed free on request.

Sharples—Easy to Sell

WARREN V. DEYO

Coal, Lumber, Builders' Material, Farm Machinery, Paints, Fertilizers, Auto and Fire Insurance

Wallkill, N.Y., Mar. 23, 1918

THE SHARPLES SEPARATOR CO.
West Chester, Pa.

Gentlemen:

Mr. Eli Mackey, of Wallkill, N.Y., came in my store yesterday and said: "I want to buy a separator and separate all the milk that I feed my calves. The calves will do just as well and then by putting that cream in the rest of the milk I sell I will get a bigger price for my milk on account of the extra butterfat.

"I want a Sharples because it skims clean at any speed."

And so he took a No. 2 Sharples Suction-feed right along with him—wasn't that easy?

Well, your advertising makes it easy to sell the Sharples Separator because they know all about it before they come to my store.

Yours very truly,
(Signed) W. V. DEYO.

Mr. Deyo's experience is not unusual with Sharples dealers. Sharples national advertising educates the farmer. Sharples sales helps enable the dealer to "cash in" on Sharples advertising. Why not get these working for you? The Sharples Separator contract offers an excellent proposition for dealers. Write nearest office about it.

NEW SAFETY STOVE PIPE

It *Cannot* Pull Apart

This stove pipe locks automatically—needs no wiring—and **cannot** pull apart. It is absolutely leak-proof, too, and so easy to put up.

Stove pipe season will soon be here again.

Note the marked superiority of this pipe—then send your order in and be sure of a timely delivery for the coming season.

Patenaude and Berini pipe costs the same as ordinary pipe.

Made in 6 and 7-inch sizes. Made of 29 Gauge Iron. Telescope Pipe does away with half lengths. Pipe is nested, saving freight rates and storage room in store. New patent lock effects saving on each pipe, making a saving of one length in every 12 of ordinary pipe. Can be used any place where ordinary pipe is used, or can be used along with ordinary pipe. Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Son, Toronto, Ont.

Just what you need for bigger sales.

Patenaude & Berini - Toronto, Ont.

Manufactured by Fairgreave & Sons, Toronto, Ontario.

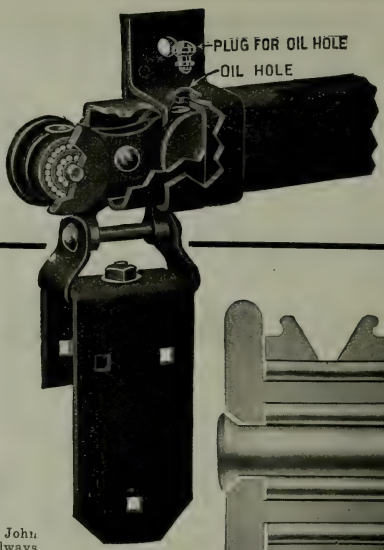
ALLITH MODEL 1914



ALLITH MODEL 1915

That desire to try something

Have you ever noticed how John Smith or Bill Jones will always take a turn at a washing machine handle or the crank of an emery wheel when they are set up some place handy to get at?

Motion—it's in everybody's blood and must come out—that desire to see things in action.

You can cash in on this really human side of your customers, and this is the way.

Sectional view of 1915 Bearing showing oil hole at the top.

This shows the sectional view of the Allith Model 1915 bearing. The oil hole is shown at the top.

Set up a section of ALLITH SQUARE TRACK

between two posts in your store and equip it with an

ALLITH FOUR-WHEELED TROLLEY HANGER

—let them all take a try at working it. Let them see how easy it operates, how impossible it is to keep it from working—then watch the results in sales.

Water finds its own level and if Jack or Bill is interested in Barn Door Hangers they will naturally gravitate toward this part of your store and will try it out. This is where you come in with some of the following arguments to close the sale.

1st—Allith Nos. 1914 and 1915 Hangers are fitted with four round faced milled wheels, 2¼ inches in diameter, which ensures smooth running.

2nd—In Model 1915 wheels are independent of each other; not riveted together by the smaller axle as are all other hanger wheels, and having double sets of roller bearings and sufficient play allows a freedom in travelling even if the track is slightly bent as is often the case when wall to which track is bolted or attached is not perfectly true.

3rd—The weight of the door keeps the wheels of the hanger in the bottom of the groove and the shape of the groove (round) keeps the side of the wheel from scraping on the inside face of the track, thus reducing friction to a minimum.

4th—The round turned up groove adds strength to the track—the supports are also shaped to the track giving added strength.

5th—The Allith Square Trolley Track is made of 16-gauge steel with round grooves. The supports are adjustable, i.e., they may be moved anywhere along the track to escape a knot or bad spot in the wall thus ensuring each support doing its full share of the work. **It will pay you to order the Allith 1914 and 1915 Hangers to-day. Send for a set of each and put them up in your store. Salesmen will find them as easy to sell as they are to operate.**

Model 1915 Hanger has the distinctive advantage in that it may be oiled directly into the bearings at any time when hanging on the door.

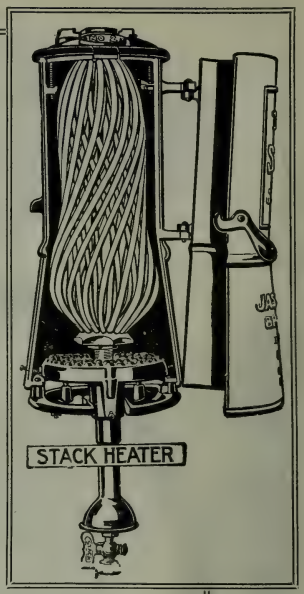
Prospects quickly grasp the "Why" of Stack efficiency

Stack Heaters operate so simple that anyone can quickly grasp the principle on being shown the interior of this superior heater.

The copper tubes rising almost perpendicular break the water up into small columns entirely surrounded by heat from the gas flame. Rapid circulation carries the water out of the heater without giving time for the deposit of sediment, thus preventing the tubes from being coated and losing their efficiency.



Stack sales are quick sales and permanent sales—always.

Down goes cost of gasoline

The Powerlight Manifold Heater for Ford Cars—Guaranteed to save 25% to 40% on gasoline. The most useful accessory ever put on any car.

Installed in a few minutes.

Price $7 complete with full directions for installing.

Four Outstanding Advantages.

1. The Powerlight Manifold Heater for Ford Cars will save from 25 to 40 per cent. on gasoline, which means more mileage.

2. It heats the gasoline after it leaves the carburetor and as it enters the manifold intake so that it will enter into the cylinders in a dry, intensely combustible state. Every cylinder will receive the same quality gas, for every particle of the gasoline has been thoroughly vaporized and will cause a much better mixture. In consequence, more power.

3. It will reduce by 50 per cent. the carbon deposits in the cylinder walls, valves and spark plug, for where there is no heating device of any sort the gasoline enters the cylinders in a semi-liquid state, causing a red, smoky flame. This is especially true of the low grade gasoline of to-day. Result, perfect firing.

4. It will do way with spark plug and valve troubles and lessens the chances of leaky valves, doing away with the necessity of grinding valves or burning out the cylinders, and causes a much smoother running of the engine, therefore, longer life for the engine.

Favor Trade-Marked Goods

Result of Thirty-three Interviews Show 88 Per Cent. of Merchants Think Trade marked Goods Help Them Make Sales—Large Percentage Give Preference for Trade Marks in Ordering Goods

AS a result of thirty-three interviews which HARDWARE AND METAL obtained with merchants in various parts of the country it is apparent that hardware dealers have a high opinion of trade-marked goods. To these hardware merchants the following question was put: "Do you think trade-marks help you sell goods?" Of the above number twenty-nine replied "Yes" that trade-marks did help them sell goods. Four replied in the negative. These figures show that 88 per cent. of those interviewed were of the opinion that their sales were helped by handling trade-marked lines, while only 12 per cent. were of the contrary opinion. The weight of evidence is overwhelmingly in favor of the trade-marked goods. There were various qualifying phrases used in connection with the answers given, however, which show an interesting sidelight on the question of trade-marked goods.

"Yes, trade-marks help sell goods. That is, advertised trade-marks that advertise the goods, not the mark. These goods are 80 per cent. sold and in these lines we are only order takers. We have found also that where manufacturers have set and advertised a resale price it is also helpful." In these words the proprietor of one of the large hardware firms in the northern part of Ontario gives his opinion with respect to trade-marked goods. This same merchant also says that where a manufacturer advertises his line extensively they are pretty near compelled to put in his line if he desires to accommodate his trade.

Give Preference to Trade-Marked Lines

The same hardware merchants were asked whether they gave preference in ordering trade-marked goods from their jobber. Of the thirty-three some twenty merchants stated they did give preference to the trade-marked goods when ordering from their jobber. In other words, about 60 per cent. of the merchants interviewed made it a point to specify trade-marked goods when making out their orders. That is, of course, where the trade-marked goods were available in the lines required. Some of the merchants in question bought direct from the manufacturers, and so did not need to specify to the jobber. In some cases the opinion was expressed in unmistakable terms that trade-marked goods were given the preference when ordering from the jobber. One firm in Fort William when asked the question, replied "Most decidedly."

THAT hardwaremen have a high opinion of trade-marked goods there can be no doubt. Following article is based on interviews with a number of merchants in different parts of the country. They were overwhelmingly in favor of trade-marked goods, especially where those goods are advertised to the consumer and where the merchant in turn is given the selling points in connection therewith.

Another firm stated that they give preference in ordering trade-marked goods from the jobber only when the goods make good and have been found to be what the manufacturers claim for them. When the quality has proved satisfactory and there is a reasonable margin of profit this hardwareman states that he gives preference to trade-marked goods.

What Trade Mark Stands For

Manufacturers for many years have been feeling their way toward some distinguishing mark for their goods, and to this end have evolved the trade mark. It has invariably been the manufacturers, who were jealous of the name of their goods, who have been instrumental in developing their trade marks. They have been desirous of getting some badge or token or mark that would set their goods apart from similar makes. It has been their aim to make quality count for something in the manufacture of their goods. They did not want to lose the advantage secured through the excellence of their goods, hence they needed some easy and handy way of having their goods identified. The name of the company itself would perhaps have been sufficient for this purpose, but in many instances the purchaser will forget the name of a particular maker, especially if the name of the company be a long one.

The trade-mark occupies much the same position as a slogan. People do not forget it once they have come to recognize it through its quality and value. A trade-mark is a simple method of helping them to identify the goods. A trade-mark will often stick where the name of the company cannot be recalled. The trade-mark and the name of the company are inseparable. Meaningless trade-marks or names in themselves do not stand for anything. They will not make a sale for the goods when other things are lacking. Back of the trade-mark must stand the reputation of the goods. When the manufacturer advertises quality in his goods and is prepared to back that up by putting his brand or trade-mark thereon it is usually evidence of his own strong faith in his goods. Sometimes it happens that even with a trade-mark the goods will be found to be lacking in what is claimed for them. Here again it serves a purpose, for it enables those goods more readily to be identified. By a process of elimination they are passed into the discard. Hence it becomes the survival of the fittest. As one hardware merchant put the case: "We do not give preference to trade-marked goods if they do not live up to the claims of the owners. But we do give them preference if the quality has proved satisfactory."

Something to Identify

The question largely hinges on whether the goods have merit—quality. If they have merit the manufacturer needs some easy method of having his goods

distinguished, and the dealer needs some easy method of identifying them. That is where the trade-mark comes in and fills a very important part in the scheme of merchandising. It is usually the symbol that the manufacturer is not afraid to have his goods identified. He courts getting them known by the trade-mark because he realizes that in the great number of commodities which are on the market his own has greater chance of being remembered and identified if there is some simple and easy way of above, it is much easier to remember a distinguishing the same. As stated slogan than to remember a great long dissertation about the quality of the goods. The quality of the goods must speak for itself, and the trade-mark is the emblem by which those goods, with all their good and bad qualities, can be identified.

It is not the manufacturer that has absolute faith in his goods who is afraid to have them identified. It is the manufacturer who is not so sure about his own goods who hesitates about putting something thereon that will make them easily recognizable.

Percentage Asked for by Name

One of the other interesting questions that was put to merchants by HARDWARE AND METAL was: "What percentage of trade-marked goods are asked for by customers according to the name or trade-mark?" Of the number who replied, fourteen stated that the number ranged from 50 per cent. up as high as 90 per cent. Six who answered the question gave the number from 20 to 50 per cent. of those inquiring for goods. This question should not be misinterpreted. It does not mean that from 20 to 90 per cent. of all goods asked for were trade-marked goods. It means rather that of the various trade-marked lines carried by hardwaremen some twenty-four dealers out of thirty-three placed the number who called for those goods by their particular trade-mark name as ranging from 20 per cent. all the way to 90 per cent. Seven dealers placed the figure at 75 per cent., while three stated that in their instance it would run as high as 90 per cent. This point indicates the interest which is taken in trade-marked goods by the consumer, and shows the advantage to be secured by the dealer who handles lines which are well known by the consumers.

Dealer an Important Factor

But the part which the dealer plays in making the sale of these various trade-marked articles should not be lost sight of. One merchant put the situation thus: "The public is not inclined to experiment with the goods unless we or some of their friends know something about them." In other words, the consumers will go to their local merchant for his advice on certain lines. They have confidence in him because they know him and know his worth as a business man. Another merchant states the case in this manner: "We find most customers take our word before the flashy claims put forth in newspapers and magazines which reach the consumer."

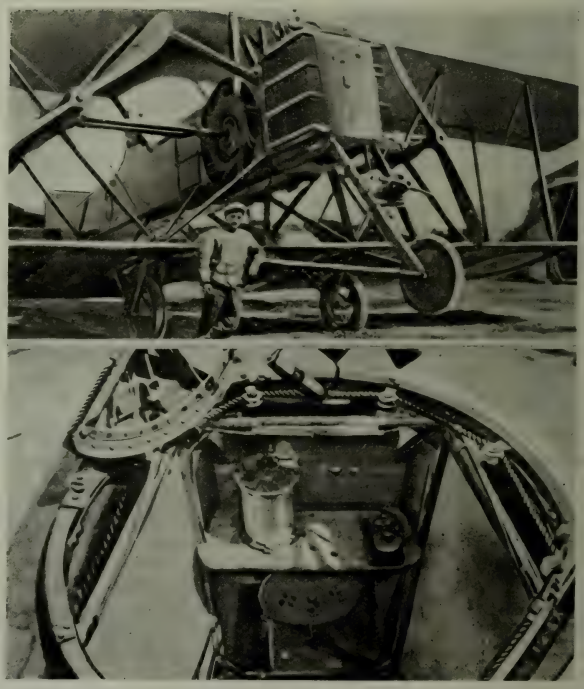
In these cases it resolves itself into the claims set forth by the manufacturer, who is far removed from the consumer as against the opinion and word of the merchant who is on the field and can give personal advice. It is needless to say that he must first be convinced of the merits of a particular article before

Current Events in Photograph—No. 23

THE EYES OF THE GUNS IN FRANCE

The accompanying photographs represent one of the type of large aeroplanes used for registering the effect of gunfire. These aeroplanes are equipped with wireless that is supplied with power generated by a small fan that is shown in the top photo, just below the engine.

The lower photo gives some idea of the interior of one of these planes, showing the handle of the machine gun. The wireless post is shown directly in front of the aviator; on the left is the antenna coil, and on the right the key.



he will recommend it to his customers. Herein is an intimation to the manufacturer that it is good business policy on his part to see without shadow of a doubt that the merchant is "sold" on his line in such a way that he will sell it to his customers in turn with all confidence that they will return to buy similar articles again.

First Sale Only the Beginning

Merchants should not lose sight of the fact that when the sale of a trade-marked article is made and the consumer is given satisfaction that it is much easier to sell him goods of the same style. When the consumer has tried them and is convinced that he has obtained his money's worth it is much easier for him to think of those goods by their trade-marked name than it is when they have no trade-mark. "Our lines of trade-marked goods run in tools, shelf hardware and paints mainly," stated one dealer. "We try to buy lines in which trade marks have some backing—that is, in which the maker informs the trade and the consumer in some manner of advertising of the reasons why his trade-marked goods are of a superior quality. Then we back him up in our selling talk. As an instance of this the varnish company whose goods we handle recently mailed circulars and color cards, etc., with selling talks to our customers and prospects. In ten days thirty-three purchases of this particular varnish were made by direct request for it. The result will be, provided the quality is there and as described, that those thirty-three customers will be added to our list of permanent purchasers of those particular lines."

From this instance it will be seen that the trade-marked articles have an eye on future trade—a steady, ever-returning stream of purchasers. This is the kind of trade that is worth while. Once the trade lines have been laid and the customer is once sold he or she should be a steady buyer of those goods. It should not be necessary to sell him anew every time he comes to make a purchase of that particular item. "Once sold, always sold," should be the motto. Trade-marked goods permit this, because they do not lose their identity after each sale is made. They have an individuality all their own because they are carried under a brand name. The trade-mark should stand like a beacon light or an old friend—both are easily recognizable.

Clerk is a Real Buying Force

Invariably Consulted by Proprietor When Latter Comes to do Buying — Some Stores Arrive at Decision Jointly After Discussing Articles to Buy With Clerks— Pointed Out That it Increases Their Ability as Salesmen

CLERKS KNOW WHAT ARE BEST SELLERS

"To a certain extent we consult our clerks. The advice of any clerk is good, otherwise there is no use keeping him as a clerk. Anyone meeting the trade must be asked for things not stocked. If his advice is not thought anything of no one could blame him for not offering it."—J. H. Slater, Ridgetown, Ont.

"I consult clerks when repeating or ordering new goods. They know what are the best sellers."—Garnet K. Wigle, Sackville, N.B.

"We ask clerks' co-operation. It helps to increase their interest in the business and we get fresh ideas."—I. G. W. Park, Swift Current, Sask.

"After I have had a clerk long enough to value his opinion I give him every opportunity to express it."—R. H. Cowan, Alexandria, Ont.

THAT the clerk in the average hardware store is a powerful factor in the buying of goods is not always taken into consideration. But it is a fact that cannot be disputed, as the opinion of some sixty hardware merchants in various parts of the Dominion give ample testimony to the fact. With a view to finding out the influence of the clerk in the purchasing of goods, HARDWARE AND METAL took occasion to make inquiries and from sixty merchants six replied that the clerk did not in any way assist them, while fifty-two replied that the clerks in their establishment were consulted. In some cases the buying is even left to the clerks. In a number of instances the heads of various departments in some of the larger stores send all their specifications to the manager or to the proprietor. These replies ranged from a direct affirmative reply to many amplifications of statement. With some stores the matter of buying is made a sort of co-operative affair. "Clerks are always consulted and decision made between us." Here is an instance where the proprietor is glad to get light from whatever source he can to assist him in his buying. The buying becomes a composite opinion of the various members of the firm and in this way all have a share in the important matter of selecting goods. It is fitting that the manufacturer and jobber should bear these facts in mind when endeavoring to make sales to any hardware firm. It shows the importance of these various interests reaching the clerk if they would reap the benefit of the buying power of the clerk.

He may not at all times be a conspicuous person in the store when the manufacturer's representative or the travelling salesman is there, but he exercises a decided influence on any buying that is done by that store.

The question asked was: "Do your clerks assist you in deciding what goods you will order, either on repeat business or new lines and to what extent?"

Here are the replies given to this question, which will enable the trade to see the importance which the average hardware merchant attaches to the opinion of his clerks in this matter:

"Yes." (Eighteen merchants replied in this direct affirmative way.)

"Always consulted and decision made between us."—George Taylor Hardware Co., Cochrane, Ont.

"Clerks mark down in the want book what goods we run out of. They do not assist in ordering goods."—Belauss Bros., Lancer, Sask.

HARDWAREMEN VALUE OPINION OF THEIR SALES FORCE

"Any new lines are always submitted to the clerks and advice asked. In buying a larger quantity than usual they are consulted. We find this best as they are more anxious to make good and dispose of the quantity." — J. F. Crosby, Highgate, Ont.

"We consult clerks with respect to new goods. I have found clerks take more interest in your business when they feel that they are one of the firm, which proved satisfactory in most cases."—A. A. MacDonald, Kingsville, Ont.

"After our clerks have had about a year's experience we consult them on some new lines. We have a want book and have notes put therein regarding any goods inquired for and not in stock and then consult about the purchasing of them."—Brewer & Harrison, Parkhill, Ont.

"I always counsel with my head clerk and find it helps me in my purchases."—E. E. Johnston, Lansdowne, Ont.

"Consult clerks on repeat orders and new lines."—E. McEvers, Niagara Falls, Ont.

"Assistant manager assists on repeat business or on new lines."—V. G. Boyd, Empress, Alta.

"Yes, they are consulted, more particularly on new lines, and quite frequently on repeat orders as to quantity."—J. A. Anderson, Drinkwater, Sask.

"Buying rests with me with but a few exceptions."—W. W. Rockwell, Kentville, N. S.

"No, unless we ask them. Manager and myself do the buying."—Hodson Hardware Co., Maple Creek, Sask.

"Our head clerks assist in all buying."—Moose Jaw Hardware Co., Moose Jaw, Sask.

"The head clerk is held responsible in all departments for purchases and sales made, and all orders placed are O.K.'d at office."—A. R. Colquhoun & Sons, Broadview, Sask.

"We are guided largely by the ideas of our salesmen regarding purchases in both new and old lines of goods."—Fennell & Chandler, Charlottetown, P.E.I.

"Clerks are taken into consultation with regard to new lines."—W. A. May, Creemore, Ont.

"On new lines I generally ask for their opinion."—H. J. Smith, Springhill, N.S.

"Yes, to a limited extent. I ask if they know of anything required not already on want list. Also ask for suggestions."—R. Hawkins, Smith's Falls, Ont

"Yes, clerks are consulted. Very often they have a better knowledge of many articles."—Edward Tuffy, Cobden, Ont.

"Yes, both on repeat business and new lines. And I don't buy without having my selling staff with me when it is possible."—Henri Jalbert, Chicoutimi, Que.

"We give certain departments to our head clerk In new lines we generally discuss the merits but decide for ourselves."—Gerry's Hardware, Fort William, Ont.

"Yes, in all lines, and have them buy direct from the travellers when they are capable of doing so."—J. J. Cain Alliston, Ont.

"My clerks generally assist me in buying goods."—J. B. Dionne, Coaticook, Que.

"Yes, each department manager makes out his own specifications."—George Taylor Hardware Co., Cobalt, Ont

"We use a common want book and order our own goods from want books, although incidentally we are open to ideas from our clerks as we rush along."—Madole Hardware Co., Napanee, Ont

"Yes, each head of department assists in buying goods for his own department."—Cowan Hardware Co., London, Ont.

"We take advice from our clerks as to what goods are moving and what merchandise is asked for that we do not carry."—Ryan & Co., Amherstburg, Ont.

"Clerks are usually consulted, especially on new business."—D. Mistele, Rodney, Ont.

"My clerk does most of the buying."—R. R. Woods, New Liskeard, Ont.

"Our clerks do not assist in buying either for repeat business or new lines."—Guest & Fishenben, Renfrew, Ont

"Yes, very often."—Potsford & Nicol, Kingston, Ont.

"Clerks do not assist in ordering goods."—C. Poitras, Verner, Ont.

"Usually do all purchasing myself."—W. F. McPherson, Prescott, Ont.

"We consult clerks."—Connor & Jones, Marmora, Ont.

"Sometimes consult head salesman as to quantity and also on new lines."—A. N. Fenn, Parry Sound, Ont.

"Clerks do not assist in ordering."—J. A. Robert, Grand Mere, Que

"We find the best policy is to let one man do the buying and look after it completely. In case some lines do not sell the clerks notify the buyer."—Jordan & Virtue, Oshawa, Ont.

"Do the buying myself. Staff very small."—G. H. Roblin, Brighton, Ont.

"Decidedly we consult."—Mowat Hardware Company, Trenton, Ont.

"Clerks do all buying in their departments on repeat orders and are consulted on new lines."—W. H. Richardson, Essex, Ont.

"We are always glad to consider suggestions from our clerks and have sometimes received very valuable ones."—Campbell & Best, Peterboro, Ont.

"Ask clerks' advice on new lines added, talking them over with traveler introducing such lines so they will understand them when they arrive."—A. Outram, Port Hope, Ont.

"Yes, on some lines."—St. Mary's Hardware Co., St. Mary's, Ont.

"I do the buying mostly myself."—E. Lendon, Leamington, Ont.

"My son is the only clerk. He some-

(Continued on page 67.)

ALWAYS GETS CONFIDENTIAL CLERK'S OPINION

"I never buy goods, especially a large amount, from a traveler without my confidential clerk's opinion on said goods. I am of the opinion that a good up-to-date clerk knows the goods required just as well or possibly better in some cases than the owner or manager, as the case may be."—N. D. Smith, New Waterford, N.S.

"Yes, in all matters of this kind the clerks are consulted and in most cases we find it a very good policy owing to the fact that they are in better position to know the requirements. I think in consulting the clerks along these lines it makes them take a greater interest in the affairs of the business, increases their ability as salesmen and by so doing materially helps any business to prosper."—F. W. Williams, Port Arthur, Ont.

Current Events in Photograph—No. 24

SCREENING THE SEADOGS

Nowhere has the art of camouflage been more successfully used than in the spectacular attack on the U-Boat bases of Zeebrugge and Ostend. Under a screen of smoke the ships of the fleet were enabled to get close enough to bottle up the U-Boats. This photograph was taken on board the Iris, one of the covering ships used in the Zeebrugge raid. One of the officers is turning on the tap to release the smoke that made a screen like a mist between the attacking ships of the fleet and the land batteries.

Practice in Selling Goods to Employees

Canvas of Hardware Trade in Considerable Number of Instances Shows Majority of Concerns Sell to Employees at Reduction From Regular Retail Prices—Ranges From Laid Down Cost to Regular Retail Prices

IT has been a matter of interest as to what the general practice is with respect to selling goods to employees in the average hardware store. With this in view HARDWARE AND METAL made inquiries from merchants in various parts of the country and from sixty-two replies received it was shown that nineteen of those concerns sold their goods to employees at cost plus 10 per cent., while 21 merchants sold to their employees at cost. Three merchants sold at cost plus 15 per cent. Five sold goods at a reduction of 10 per cent. below regular retail prices. Nine simply stated that they sold to their employees at a reduction, while five reported that they sold to their employees at the regular retail prices. It will therefore be seen that the more common practice is to sell either at wholesale cost, which is understood to be laid down cost, or at cost plus 10 per cent.

Replies of Various Merchants

"Any purchases made by clerks under $1 are charged at regular price. Over that amount our custom has been to charge them 10 per cent. over cost."—J. F. Crosby, Highgate, Ont.

"The rule we follow is 10 per cent. on cost to employees, which was satisfactory to the employees, as help is a great consideration in any business.—A. A. MacDonald, Kingsville, Ont.

"We usually let employees have goods at about half way between cost and regular retail prices so as to meet the running expenses on said goods."—Brewer & Harrison, Parkhill, Ont.

"Ten per cent. advance on cost laid down."—J. H. Slater, Ridgetown, Ont.

"We have discontinued selling to employees at reduction in price. Employees pay same as customers pay."—I. G. W. Park, Swift Current, Sask.

"At an advance of 15 per cent. over cost."—R. H. Cowan, Alexandria, Ont.

"I sell my help goods at cost. I mean invoice price, plus freight and truckage."—N. D. Smith, New Waterford, N. S.

"It is our policy to charge all employees the laid down cost plus 15 per cent., which is figured to be the cost of doing business."—F. W. Williams, Port Arthur, Ont.

"I sell to my employees at an advance of 10 per cent. over cost."—T. J. McManus, Pembroke, Ont.

"About ten per cent. over cost."—Potsford & Nicol, Kingston, Ont.

"Wholesale cost."—C. Poitras, Verner, Ont.

"We sell at laid-down cost to employees."—W. F. McPherson, Prescott, Ont.

"Goods are supplied to employees at 10 per cent. above wholesale cost."—Connor & Jones, Marmora, Ont.

"Ten per cent. reduction from regular retail prices."—A. N. Fenn, Parry Sound, Ont.

"At reduction on regular retail prices."—J. A. Robert, Grand Mere, Que.

"We sell clerks and employees goods at cost plus freight or expenses as the case may be."—Jordan & Virtue, Oshawa, Ont.

"Wholesale cost."—R. Rowland, Clinton, Ont.

"My employees always get goods at cost."—George H. Roblin, Brighton, Ont.

"At cost."—Mowat Hardware Co., Trenton, Ont.

"At wholesale cost."—W. H. Richardson, Essex, Ont.

"At a reduction from regular prices, probably averaging 10 per cent."—Campbell & Best, Peterboro, Ont.

"It has been customary to give the employees goods at cost."—Adams & Van Dusen, Picton, Ont.

"At present market cost plus 10 per cent."—George Taylor Hardware Co., Cochrane, Ont.

"Ten per cent. above cost."—Wood, Vallance & Leggett, Vancouver, B.C.

"At wholesale prices."—Belauss Bros., Lancer, Sask.

"Clerks at wholesale price plus 10 per cent.; helpers at 10 per cent. off retail price."—C. Snyder, Westerham, Sask.

"I sell to them at cost, believing they appreciate same in not being classified with regular customers."—E. E. Johnston, Lansdowne, Ont.

"About 10 to 20 per cent. above cost, according to goods, amount, etc."—E. McEvers, Niagara Falls, Ont.

"Sell employees at a reduction from retail prices."—V. G. Boyd, Empress, Alta.

"I sell goods to clerks at 10 per cent. above delivered cost."—J. A. Anderson, Drinkwater, Sask.

"At a reduction from retail prices."—H. S. McDonald, Chatham, N. B.

"At wholesale prices."—Henri Jalbert, Chicoutimi, Que.

"Sell goods to employees at a reduction of 10 to 15 per cent., according to how long they have been in our employ."—Gerry's Hardware, Fort William, Ont.

"At wholesale cost."—J. J. Cain, Alliston, Ont.

"I sell goods to my employees at 10 per cent. above invoice cost."—J. B. Dionne, Coaticook, Que.

"At actual laid down cost."—George Taylor Hardware Co., Cobalt, Ont.

"At the regular retail price; in fact, we pay the same ourselves."—Madole Hardware Co., Napanee, Ont.

"Wholesale cost."—Cowan Hardware Co., London, Ont.

"We sell to our employees at cost—that is, wholesale cost plus freight or expenses."—Ryan & Co., Amherstburg, Ont.

"Sell to clerks at about 10 per cent. on cost."—D. Mistele, Rodney, Ont.

"At wholesale cost."—R. R. Woods, New Liskeard, Ont.

"Employees pay regular prices, except in cases where a large purchase is made."—Guest & Fishenben, Renfrew, Ont.

"Our clerks buy goods out of stock at 10 per cent. over laid-down price."—Alf. Outram, Port Hope, Ont.

"About 10 per cent. from retail price."—St. Mary's Hardware Company, St. Mary's, Ont.

"We sell to employees at 10 per cent. less than retail prices."—F. Lendon, Leamington, Ont.

"At a reduction from the regular retail prices."—W. H. Dustan, Bowmanville, Ont.

"Depends somewhat on conditions. If ordered specially for them, usually put in at slight advance on cost. If taken from stock, usually at a reduction from retail price, say, 10 per cent."—Frank Defoe, Madoc, Ont.

"Ten per cent. advance on cost."—G. B. Hanes, Gananoque, Ont.

"At a reduction from regular retail prices."—W. W. Rockwell, Kentville, N.S.

"At about 10 per cent. over invoice and transportation charges."—Fortier & Seauchesne, Sturgeon Falls, Ont.

"At cost."—Hodson Hardware Co., Maple Creek, Sask.

"We sell goods 10 per cent. above laid-down cost to employees."—Moose Jaw Hardware Co., Moose Jaw, Sask.

"We give all employees a reduction and charge them 10 per cent. above actual cost for all purchases."—A. R. Colquhoun & Sons, Ltd., Broadview, Sask.

"Sell employees at laid-down cost."—Fennell & Chandler, Charlottetown, P.E.I.

"We sell at reduction from regular retail price."—W. A. May, Creemore, Ont.

"I give any person working for me to understand that they pay regular retail prices at all times."—H. J. Smith, Springhill, N.S.

"At slight advance on wholesale cost." R. Hawkins, Smith's Falls, Ont.

"At reduction from retail price."—S. B. Speer, Sussex, N.B.

"Clerks get goods at 10 per cent. over cost."—Edward Tuffy, Cobden, Ont.

Use of Electros Increased Business

Hardware Firm at Oakville Has Come to Realize the Benefits to be Derived From Consistent Advertising Well Illustrated—Four Generations of Hardwaremen in Same Location—Big Sale of Oil Stoves

View Showing Store H. E. Moore, Oakville

THE H. E. Moore hardware at Oakville, Ont., has become firmly convinced of the advantage to be secured through well directed advertising and the consistent use of electros or small cuts to illustrate their advertising. "While we have not been able definitely to attribute a certain percentage of increase to our advertising, still I feel confident that our trade during the past year has increased at least ten per cent. as a result," said H. E. Moore recently to a HARDWARE AND METAL representative. "My son Arthur was the first to become enthusiastic over the advertising idea. At first I gave my assent somewhat unwillingly to the proposition of taking considerable space in the local paper, but my son was persistent in his attitude that it was advisable to tell the people what we have to sell and to illustrate the same.

"We have used the small electros supplied by HARDWARE AND METAL and they have been of very material assistance in making our advertisements attractive and readable. Formerly we carried only a very small advertisement in the local paper. It was in fact nothing more than a business card. I feel sure that the advertising done in such a small way did little or no good. But we have had proof from our customers that our advertising as carried on now is of real benefit because they have told us direct that they wanted to buy certain articles which we advertised; they have even said they did not know we carried them."

Sold 300 Oil Stoves

One of the direct fruits of their sales methods is to be seen in the trade secured in oil stoves during the past two years. During that time this firm has sold no less than three hundred oil cooking stoves. The shortage of coal during the past winter in itself gave a great impetus to the oil stove business. This initial advantage was backed up by timely newspaper advertising, by window displays and by an interior display of the goods in the store. "We had a stove in which we felt confidence and that was a big factor in helping us get the business. The price at which we were enabled to sell was also a deciding factor."

Specializes in Stoves

The business of the H. E. Moore hardware, when started some ninety years ago, was originally a tinsmithing business almost exclusively. At that time the founder of the business, John Moore, had a tinsmithing shop in which as many as twenty-one workmen were employed at times. While the business has of late years been developing more along the lines of a general hardware store it naturally follows that the bent given to the business along the line of tinware and stoves should still persist.

Four Generations Follow Business

The Moore hardware was established some ninety years ago at Oakville by John Moore. The founder, as stated previously, devoted his attention largely to the tinsmithing business. The method of selling tinware in those days was to carry the stock on wagons and travel for many miles throughout the country. Feathers, rags and skins were collected from the settlers and Indians and tinware given in exchange therefor. In those days the trade route of the Moore Hardware extended as far north as Owen Sound and west to Windsor, with a considerable distance to the east.

Known as First Newspaper

There were very few newspapers in those days, and about the only means of getting news from different parts of the province was through the traveling salesman. The visits of John Moore were keenly anticipated by the settlers along his route, for he was able to tell them something of what had been going on in various parts of the province. No matter how crowded conditions might be at a farm house, accommodation could always be found for John Moore. He was known as the first newspaper in the district between Toronto and Hamilton. The stories were always listened to with more than passing interest because they were told by a man who knew them firsthand.

Mr. Moore located in Oakville because it seemed a more promising place than Hamilton at that time. Being on the lake it was one of the important ports of call for lake vessels and was a distributing point for the district round about.

In succession as proprietors of the business came Charles Moore, son of John Moore, who was in turn followed by Harry E. Moore, the present proprietor and grandson of John Moore. Associated with the present proprietor is his son, Arthur Moore, who makes the fourth generation to be connected with the business. Arthur Moore is at present directing the advertising campaign of the firm along the lines indicated previously. Part of the advertising campaign comprises a four-page circular which is to be distributed to the householders and farmers of the Oakville district. This circular is to draw attention to some of the spring lines. Illustrations are used along the line of those carried in the newspaper advertising. This concern has found that advertising when carried on in the right way will bring results. Their experience should be an eloquent hint to other hardwaremen who are desirous of increasing their trade.

Thinks Building Will Be More Expensive

Little Stimulation in Building Has Used Up Reserve Supply of Lumber—Will be Big Demand for Houses Since There Has Been Practically None Built Since War

THAT the increase in the cost of building has not yet reached its limit, is the opinion of A. A. Smith, Toronto manager of the Canadian Aladdin Co., Limited. Mr. Smith is of the opinion that the trouble with people now is that they compare prices of to-day with prices of yesterday whereas they should compare them with prices of to-morrow.

"People think because building was cheap before the war and is costly now that it would be foolish to build now. On the other hand all indications are that building will be very necessary for the next three or four years—to house what seems certain to be a growing population—and that it will be more expensive a good deal than it is at the present time.

"Since the outbreak of war chemicals have advanced far over 100 per cent. So have food products and clothing products, although not quite to the extent of chemicals. Lumber, on the other hand, has advanced only about 50 per cent. It has failed to go higher because a comparatively small demand has been felt until just recently. Now, however, the demand for lumber is getting very great and the output is very much reduced. Practically all the logging companies are operating with only a fraction of their before-the-war staff. They are doing this partly because they cannot get the men and partly because there has not, until recently, been the demand and they were not able to finance far in advance.

"Now they are facing a greater difficulty than ever in getting men and on the other hand the reserve supply has been used up and the demand for lumber is getting very heavy, partly because there has been a little stimulation in building and much more because there is a huge demand now for lumber for shipbuilding.

"When the war ends there will be a large flow of population to Canada, partly from our own soldiers, and there will in all probability be an influx from other countries as well. However, even if there is no real gain from immigration there will be a very big demand for houses since practically none have been built for four years. There will be no adequate supply of lumber to meet this demand and so, for the fundamental reason that the demand is large and the supply small, prices will go up."

Mr. Smith feels that it will be impossible to produce any supply of lumber sufficient to check the soaring prices of the lumber in less than three years. The men will come back from the front slowly. They will be slow to get back to old industries. It would take nearly a year to get the logging companies working at their old pressure. Then it would take another year to get the logs out and cut, and another year still for the lumber to dry before it is fit to be used. This means practically three years from the day war stops until a normal supply of lumber will be coming forward and until therefore the supply can something like catch up with the demand.

Mr. Smith also feels that there will be a huge demand for exportation of lumber to such countries as Belgium, France and other of the belligerents. His opinion, therefore, is that we are in for a long period of very high lumber and, as this is a great factor in building, in for a long period of rising prices in building—at least for a long period of prices considerably higher than they are at the present time.

CLERK IS REAL BUYING FORCE

(Continued from page 64.)

times did the buying, but he has signed up and is now in camp."—W. H. Dustan, Bowmanville, Ont.

"Depends on the line, also on the experience clerks may have had. Usually do most of it myself."—Frank Defoe, Madoc, Ont.

"Yes, I always consult them, then decide for myself."—T. J. McManus, Pembroke, Ont.

The above replies were taken as they were received by HARDWARE AND METAL. They give an excellent survey of the regard in which the clerks are held by the average hardware merchant in various parts of the Dominion.

"SAMSON" Garden Tools Are Fully Guaranteed

H. E. MOORE HARDWARE

Samson Garden Tools for the Cardener who is Proud of his Tools

To Plough, Dig, Cultivate and Plant is the Order Of The Day.

In these days of altered standards and difficult conditions it is good to know that goods with the "SAMSON" label are just the same as they have always been—an unvarying standard of high quality maintained to meet the confidence reposed in them.

"Samson" Lawn and Garden Rakes

At this season the rake is very necessary to clean up the yard, the flower bed and the lawn. Our assortment is good, consisting of malleable steel and wire, suitable for all kinds of work

Each 35c, 65c, 85c, 90c, $1.00

Hand Sprayer

We have in stock a large quantity of handy sprayers, made of heavy tin with glass jar painted. It will pay you to take advantage of this offer and secure one of these useful sprayers for your bushes, trees and potato plants

Each, 70c.

Samson Garden Hoes

The garden hoe is a very necessary tool to have in your garden tool set. Samson Hoes are built for hard service. The handles are selected wood and securely fastened to the blade

Each, 35c, 65c, 70c.

Samson Potato Drags

"Samson" Potato Drags have four tines 7 inches long, made in oval or round, and are carefully tested as to balance, hang and set

Each, $1.00

Garden Trowels

A very handy tool for planting bulbs, etc. Made of good strong steel with shank securely fastened to the handle

Each, 10c, 15c

Grass Shears

You cannot afford to be without one of these handy Grass Shears. Made of stamped steel, with spring handle and blades; easy to operate with one hand and trim those places the lawn mower cannot cut.

Each, 45c.

Give Your Lawn Plenty of Water

In places like Devonshire, England, where there is plenty of rain, the lawns are the most beautiful in the world. Mother Nature shows the way. Lawns should never go dry.

Plain Hose per foot.....12c
Hose Nozzles.....60c
Hose Reels.....$1.35, $3.25
Lawn Sprinklers.....40c to $2.25

Samson Garden Forks

Here is the handiest garden tool you can buy. Every gardener should have one. It is so useful to spade up the solid earth in your flower and vegetable beds. Get busy this year and plant your own potatoes.

Each, $1.45.

Hand Cultivators

Have you used one of our diamond pointed Hand Cultivators? They have fine forged steel tines, securely fastened to a hardwood handle. This tool will do your cultivating in half the time and do it right.

Each, $1.00.

Garden Spades

Neatly polished, highest grade steel Spades, fitted with selected handles. This spade is very useful for gardeners' use, because it is light in weight, yet strong enough for general use.

Each, $1.10.

Ask for Samson Garden Tools.

Unexcelled for Service. Absolutely Guaranteed

Summer Months are Electrical Months

Because of Necessity for Eliminating Heat and Unnecessary Work, Electrical Lines Offer Big Field for Sales—Very Suitable as Presents for June Bride

BECAUSE of the necessity for eliminating unnecessary work and keeping the home as cool as possible "summer months are naturally electrical months." That is, they are the months when the largest sale of these articles should result. Electricity is above all a great saver of time and labor. These are very essential in order that people may be able to get out into the great outdoors and enjoy the sunlight. The electric iron is a saver of countless steps between stove and iron board. It is not so wearing on the housewife. For she can drive through and get the ironing out of the way in the cool of the morning. And it is not necessary to heat the whole house up in order to have the ironing done. The electric iron is efficiency personified. Only enough power is used to do the work of heating the iron and in keeping it hot. By the old methods of ironing there is much waste of fuel, waste of time, waste of the housewife's energy because her strength is sapped by being in a hot kitchen. These are all talking points which the hardware merchant can make use of in his sales talk or in his advertising of electrical lines.

Boon of Electric Washers

To the housewife with an electric washer the terrors of wash-day have been removed into the distant past. She has had to struggle with the problem of getting a washerwoman perhaps. In many cases she has been unable to get one, even after spending much time in the search and after being disheartened times without number through the fruitlessness of her efforts. Hardware merchants in some sections of the country have made a successful appeal for sales by placing the advantages of the electric washer before their customers. They have reasoned thus with them:

"Why not eliminate the terrors of wash-day by getting an electric machine. You can do the work yourself then if necessary. You can eliminate the cost of the washerwoman—perhaps $1.50 per week at least. That will amount to $75 per year—enough to buy a washing machine. You will have it paid for in one year in the amount you would save, and you will then be free from the worry of hired help. It is no trouble to do a washing with an electric machine. You switch the button and it works while you watch it. Furthermore, you know that it will not slight its work. It will keep pegging away at the dirty spots until they are made clean.

"It is reliable. It is dependable. You know that it will be there every week in the year to look after your washing. The washerwoman may get sick. She may decide to change her place of business and forget to come around to your place. But with an electric washer in your cellar you can forget all the former troubles you used to have on wash day."

Cooking by Electricity

It is useless to point out the advantages of cooking by electricity. They are apparent to the least observant. But it does not hurt to impress the fact on all prospective customers for electric ranges and cooking apparatus of various kinds. Here again the saving of labor is the big desideratum. You switch

a button and you get your heat. It is simpler even than the use of gas and is not nearly as dangerous. When the gas flame is turned low under a boiling pot there is always a chance that the contents will boil over and put the gas flame out. Then the gas commences to escape. This has been a common experience with many users of gas.

But it is entirely different with the user of electricity. An even heat is obtained and it cannot be put out until it is turned out. The amount of heat that escapes from the electric range is down to the minimum. Cooking in summertime loses much of its disagreeable features when electricity is used. The summer time is the time par excellence to press for the installation of electric ranges. Toasters, grills, electric fans, are all summer lines. They eliminate labor. They eliminate unnecessary heat. Therefore they are lines which should appeal to the average housewife.

No more acceptable gifts can be given to the June bride than something electrical. Hardwaremen should not fail to utilize the opportunity. Electrical lines make sensible and practical gifts. The new home should be more completely electrical than the one that was started some five or ten years ago. Window displays which are put forth as suggestions for the June bride's gifts should start the gift buyers thinking in the right direction. It is always possible to make a very attractive display of the electrical goods for this purpose. A very striking example is shown herewith.

And it is not in the presents to the bride alone that there are possibilities. When the young couple starts in their housekeeping that is the time when they should be imbued with the necessity for making their home an electrical home. Every article that they can possibly install that will do the work with electricity will be a blessing to them in disguise. It is the age of electricity. And the hardwareman who through his solicitations gets the young couple started using electrical lines in their home will for ever have a hold on their trade. For they will thank him in the quietness of their home when in aftertime they come to realize what a saving it has meant to them.

New Brass Foundry Located in Welland

The Welland Iron & Brass Foundry has been organized in Welland for the purpose of making brass, copper, aluminum and bronze castings. The manager of the new concern is E. J. Anderson, who was for ten years mechanical engineer with M. Beatty & Sons, Limited, another Welland concern. Six furnaces have been installed and the equipment permits of the making of castings up to five tons in iron and 24 tons in brass and copper. The company has acquired by lease the shops of the M. Beatty & Sons, Limited, on North Main Street, which were vacated some years ago by the latter concern when it moved to new premises.

ELECTRICITY Will Help You Solve Household Problems

Every housewife is disturbed these days by the difficulty of Getting Help, and by the scarcity and advancing Cost of Fuel. Have you considered what Electricity will do to help you? It's both cheap and plentiful, and can be turned to many uses. To show the ladies of Orillia some of these, we've arranged for a

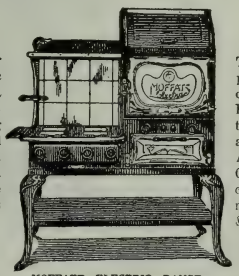
Special Demonstration

— ON —

Thursday, Friday and Saturday

MAY 16th, 17th and 18th

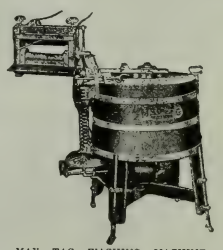
We have the agency for the Moffatt Electric Ranges, at from $50 up. Also for the 1900 Cataract Electric Washing Machine at $145, and the May Tag at $85. The Eureka Vacuum Cleaner—the best—we sell at $48, attachments extra.



MOFFATT ELECTRIC RANGE

There will be Three Expert Demonstrators — one for Moffatt Electric Ranges, one for Electric Washing Machines, and one for Hot Point Appliances, such as Grills, Ovenettes, Percolators, Toasters, Immersion Heaters, Irons, &c

EUREKA VACUUM CLEANER



MAY TAG WASHING MACHINE

The price of current is now so low, and the price of coal and wood so high, that you can make a big saving by using electricity for cooking and household work. Come and talk it over with the Experts.

We are ready to install an Electric Washer or Electric Vacuum Cleaner on trial. Could you ask more?

REMEMBER THE DATES, AND BE AT OUR STORE. WATCH FOR ANY FURTHER PARTICULARS NEXT WEEK.

Ingram & Davey, Hardware Merchants of St. Thomas, Have Been Doing Some Effective Newspaper Advertising in Which Electrical Lines Are Featured for the June Bride's Presents.

Turpentine Flurry Petered Out

Apparently Will be no Wholesale Withdrawal of Labor From Producing Districts of South—Resolved Itself Into Patriotic Appeal to Operators to Release Labor For Essential Industries

APPARENTLY there is to be no wholesale withdrawal of labor from the turpentine producing districts of the Southern United States, according to despatches that have come from that section. The conference in New Orleans between Cliff Williams, supervisor of the sixth labor district, comprising the States of Louisiana, Mississippi, Alabama, Georgia and Florida, and the naval stores interests resulted in entire accord. The conference lasted two hours, and is said to have been the largest gathering of naval stores operators held in that city in years. Practically every section of the turpentine belt was represented.

The Labor Commissioner is reported to have stated that he was ready to cooperate with the operators to the full, and that he was anxious to keep the labor just where it was most needed. The operators were gratified at his promise that no labor would be allowed to leave the district, and that such as was moved from one section to another would be returned at the proper time. He asked for their co-operation in putting the idler to work, and pointed out ways in which this could be done by creating a proper sentiment in the community.

There is already a serious shortage of labor in the producing areas of the South as the result of removal of workers of their own accord to the more profitable industries in the North. As a result of this condition it is estimated the crop of naval stores will be reduced from 35 to 40 per cent. as compared with last year. In some quarters in the New York market it was hinted that the "scare" was engineered in the interests of a bull market. Whether there is any ground for such belief cannot be stated. The fact remains that a meeting called ostensibly to lay before the turpentine interests a plan to withdraw all labor from the industry as non-essential ended after two hours' discussion, in which the operators are stated to be gratified over the situation and in "entire accord."

Discuss Question of New Steel Prices

A meeting of representatives of the various iron and steel trades was held in New York on Wednesday of this week for the purpose of formulating their views to lay before the general committee of the Iron and Steel Institute which is to meet in Washington on Friday of this week. It is understood some of the representatives favored higher prices because of increased cost of production. After the meeting Judge E. H. Gary, chairman of the general committee, gave out the following:

"As the War Industries Board has asked the general committee of the American Iron and Steel Institute to appear in Washington on Friday of this week to consider prices of iron and steel products, commencing July 1, representatives of the different lines of the industry met to discuss the situation. After the views of a number of gentlemen were expressed it was unanimously voted to place the whole situation in the hands of the general committee, with power."

Says Canada is in Need of Cash

The New York "Sun" places the financial position of Canada in an interesting light. She is in the position of a wealthy man who has all kinds of money due him, but who needs the actual cash to pay his own bills when they fall due. It says:

"Canada is in a singular financial position at the moment. It is that of a very wealthy man who cannot collect enormous sums due him, sums he is absolutely certain to get some day, and who is none the less obliged to pay out immediate cash for things he must have. He is not merely solvent; he has a tremendous, solid surplus wealth—not a mere future possibility of gaining wealth, but wealth already earned. Yet he cannot put his hand on it at once. The obvious solution is a grant of greater credit and relief from too insistent cash demands.

"The balance of trade in favor of Canada is very heavy, if it could be liquidated at once. She is certainly more than $200,000,000 "to the good," in spite of her enormous war expenditures. But most of this is due her from Great Britain, and Great Britain cannot make immediate payment. Meanwhile Canada owes the United States at least $200,000,000, which is less than half England's debt to her. But it makes cash payments necessary here and puts the exchange rates sky high.

"There are three possible solutions: to import less from us, to export more to

us, or, thirdly, to secure larger credits here. The first is practically out of the question, as Canada's imports from this country are now pretty well down to necessaries; chiefly things needed for her war work. They cannot be reduced. Nor is the second choice available at the moment, though it can be looked forward to when the new crops are ripened and ready to move. Until then, however, Canada has little to send to us. Her chief exports must in any case go to Europe. There remains only the third way out.

"It is hard to see why there should be any difficulty about adopting it. It is impossible to imagine a safer loan than one to the Canadian people at the present time. Surely our bankers and our Government itself can find some way to relieve the momentary stress upon our nearest ally and closest friend. It involves no sacrifice and is 'good business.' It is more than that. It is a plain duty."

Steel Company's Plant Damaged by Fire

The rolling mills plant of the Steel Company of Canada at Hamilton was damaged by fire to the extent of $10,000 to $15,000 on June 19. It is believed the fire started from a spark from the cupola of the moulding shop. The damage was confined largely to the wheel fan and transformer buildings, where electrical apparatus is housed. It will be necessary to close that part of the plant for about a week. Loss is covered by insurance.

AN UNFORTUNATE APPOINTMENT

Professor Goodwin, speaking at the annual meeting of the Canadian Manufacturers' Association, quoted from a Canadian technical paper to prove some interesting information he was presenting to the Association, and said: "The fact that we now have a technical paper devoted to the chemical industry in Canada is a most encouraging factor in the development of this most important feature of Canadian life."

Yet, M. E. Nichols, for whom Hon. Wesley Rowell says he hand-picked Canada to fill the $6,000 job of Director of Public Information, after careful investigation says that technical papers are of no value, and that they should not be admitted to the Canadian newspaper mails. A man who made such a gigantic failure of his own newspaper property is hardly an authority on Public Information, much less on Technical Information. Any man who can supply the public with general, special or technical news, such as they want, can make a success. Mr. Nichols failed to give the people of Montreal what they wanted in the way of news. He squandered over $500,000 of friends' money in trying to establish *The Mail* in opposition to *The Gazette*, but the latter came out of the fight stronger and more reputable than ever.

Canadians Discover New Cutlery Material

An important part of the address of Professor W. L. Goodwin before the Canadian Manufacturers' Association at Montreal last week was the professor's account of the value to Canada of research work in chemistry. As an illustration of this Professor Goodwin told of the development of the new material, "Festal," from iron, chromium, and cobalt. Chemists after considerable research work have succeeded in effecting the combination of these materials which makes a metal very easy to work, and suitable for the manufacture of the finest forms of cutlery. The substance has been named "Festal," and is shortly to be on the market in commercial quantity, according to Professor Goodwin's remarks.

Professor Goodwin is the chairman of the Canadian section, Society of Chemical Industry. His accounts of the tremendous field for intensive work to devise uses for waste products since the war were heard with great interest by the manufacturers. The efforts of the chemists and chemical engineers are directed towards getting a higher degree of extraction of useful substances from ores and waste products, and further to finding new uses for waste products. Canadian chemists, working in Canada, were responsible for the discovery of Festal, which is a peculiarly Canadian product.

Winners Announced Next Week

Winners in the contest for salesmen which HARDWARE AND METAL has been conducting will be announced next week. Some good sales ideas have been received. It is anticipated in the remaining days of the contest still others will come forward.

Replies that are mailed to us by Saturday, June 22, and which reach us not later than June 25, will still be eligible for entry. Mr. Salesman, there is still an opportunity to tell how you made a success of selling some particular commodity.

For the best answer a prize of $10 is offered and for the second best answer a prize of $5. For each reply that does not receive a prize and which we are able to use in our news columns we will pay $1.

Those who have not already entered, do so now. You cannot make $10 *as easily in any other way.*

EDITORIAL COMMENT

EDITORIAL BRIEFS

TRADE connections should be kept alive even though there may be a shortage of goods. Manufacturers must live for the morrow as well as for to-day.

* * *

HIRAM WALKER & SONS, of Walkerville, former distillers, are going to turn their attention to the manufacture of aniline dyes and chemicals. Under the gentle persuasion of prohibition a good business firm is getting started in a really useful industry.

* * *

SOME 50,000 tons of light rails, spikes, angle iron and spare parts of engines and cars are piled up on the wharves at Vancouver awaiting transshipment orders to Russia. We should be allowed to make use of this at home if the Russians are unable to do so.

* * *

JOBBERS of iron, steel and hardware have been called to meet the Priorities Board in Washington in order to consider how warehouse stocks can be applied to essential uses. There must be some iron and steel cached away in the warehouses, as the dealers have been recognized as a factor.

* * *

THERE is a decided improvement in the building situation in Canada as indicated by the large increase in building permits for May as compared with May of last year. Urgent need for buildings is making people forget about the prices that used to prevail for materials. This is another age in which we are living.

* * *

NO accurate estimates can be made of the United States Government's requirements of iron and steel in the coming year. This shows what an uncertainty is bound to exist in the minds of manufacturers of articles considered as non-essential to the war. The Government's requirements must first be supplied before other users get any.

RETAIL SALESMAN'S NUMBER

THIS issue of HARDWARE AND METAL is the "Trade-Mark and Retail Salesman's Number." Many advertisers have, in this issue, outlined selling points which can be used to splendid advantage by retail salesmen. The significance of various trademarks is made more clear to the trade, and by studying the advertisements the retail salesmen will secure a better knowledge of many lines which they are called upon to sell.

There never was a time in the history of Canadian business when there was a greater demand for high grade, high salaried salesmen. Efficient retail salesmen are in great demand. Modern business requires the services of the highest type of salesmen. The most efficient salesmen are constantly acquiring a greater knowledge of the goods they have for sale. Hundreds of the livest retail salesmen in Canadian hardware stores secure many of their best tips and selling talks through the advertising pages of HARDWARE AND METAL. This issue will appeal strongly to good, live salesmen, because of the splendid assistance offered by manufacturers and wholesalers throughout the advertising pages.

CLERK IS A BUYING FORCE

THAT the retail salesman or clerk in the average hardware store has a big influence on purchases made by the merchant is demonstrated by the opinion of a considerable number of hardware merchants who have expressed themselves on this point.

In this week's issue HARDWARE AND METAL gives the result of a canvas made among hardware merchants to see what their practice has been with respect to asking the advice of clerks in the matter of making purchases. Invariably the answer has been that the clerks are consulted.

This consultation has taken the form of absolute reliance in some instances, going so far as to leave the buying entirely in the hands of the clerk at the head of each department. Others again consult their clerks to find what lines are good sellers and for their opinion on the salability of new lines of goods.

Hardware merchants have shown themselves keen to take advantage of the knowledge and experience of their clerks. Information which the clerks alone possess is valuable to the proprietor and the proprietors give evidence that they realize the possibilities in this store of knowledge.

MANUFACTURERS TEMPER THEIR VIEWS

AT the recent convention of the Canadian Manufacturers' Association the subject of the tariff was one of the uppermost points in the discussions. There was a reaffirmation of the policy of manufacturers in their stand upon the tariff as being essential to development of Canadian industry.

The retiring president, S. R. Parsons, intimated however, that some readjustments in the tariff could be made here and there. Under the influence of the

strong demand for free trade that has arisen in the West the manufacturers undoubtedly have tempered their views somewhat with respect to the tariff.

Mr. Parsons is of the opinion that there should be a tariff board to go into the matter of readjustments and strongly urged the advisability of mutual conferences and understanding between capital, labor and agricultural interests. Tariff bids fair to be a live issue in the not distant future.

PRACTICE IN SELLING TO EMPLOYEES

INFORMATION gathered from merchants in various parts of the Dominion indicate that the more general practice with respect to selling goods to employees has been to sell either at cost or at an advance of 10 per cent. on cost. Of a great many replies received to this question in the neighborhood of 66 per cent. either sold at cost or at cost plus 10 per cent.

The great majority of merchants give some sort of reduction to their employees, ranging from 10 per cent. below regular retail prices to actual cost of goods.

In a number of instances the information was given that this was done as a matter of courtesy to their employees, as it was felt that the employees appreciated such a reduction and showed their appreciation by increased loyalty and desire to look after the interest of the firm.

In one instance the merchant stated that he charged the regular retail prices to his employees, as he paid regular retail prices for any goods that he took out of his store himself.

This practice undoubtedly shows that careful account is taken of every sale made, even to goods taken out of stock for one's own personal use. Hardwaremen are not all as careful as in the instance noted.

TURPENTINE SITUATION ONE OF STRENGTH

IT is now apparent that there will be no wholesale restriction on labor to be used in the turpentine industry of the Southern United States. Advices from that district indicate that an understanding was reached by the United States district labor representative whereby there would be no attempt made to curtail labor on the turpentine farms.

The prospect of the withdrawal of the labor caused excitement in the naval stores market and prices started to go upward. When it was evident that labor was not to be withdrawn the upward swing was stayed but there was no recession toward previous levels.

Reports from the South indicate that there will be a greatly restricted production of naval stores in the South during the present year through a natural chain of circumstances. Labor is becoming scarce for the turpentine farms owing to the fact that it is drifting to more profitably-paid work in the North and other parts of the country.

Estimates so far indicate that production will be reduced from 35 to 40 per cent. as compared with last year. In the face of this condition there has been a steadily rising market in the South. During the past month there has been an increase of 10c per gallon, and the position is one of firmness.

With restriction of output and with a big afterwar demand that is pretty sure to come turpentine bids fair to be one of the commodities that will see increases in prices corresponding to prices in other commodities.

CANADA'S FINEST RAW MATERIAL

STRONG emphasis was laid on the importance of technical training of young men by two announced speakers at the Canadian Manufacturers' Convention in Montreal last week. Sir John Willison, Chairman of the Toronto Executive Committee, Canadian Industrial Reconstruction Association, declared that Canada has allowed herself to slip at least two years behind the United States and Great Britain in this respect.

"We must give greater attention than we have been giving to technical education and scientific training of our young men," he said. "That which was called German efficiency has passed to the States. I do not believe there are anywhere in the world institutions for technical and scientific training to compare with those of America."

Sir John went on to point out that at least fifty great American firms had set aside large sums for the sole purpose of improving technical training of help and aiding industrial research. "We in Canada are far behind them," he said.

The same subject was even more strongly and fully dealt with by Professor W. L. Goodwin, Chairman of the Canadian Section, Society of Chemical Industry, who has been observing American methods of research recently. Prof. Goodwin indicated the extreme shortage of thoroughly trained chemists, showing the value of their work in adding big percentages to the extraction of valuable substances from waste products or raw ores, and in finding new uses for known substances hitherto considered of small value.

After suggesting the immensity and value of Canada's supplies of raw materials of many kinds, Professor Goodwin said: "But the finest and most precious raw material Canada possesses consists of the young men of Canada capable of being trained technically to the highest powers. The pity is that this splendid material should be still so raw, and compelled to remain so for lack of opportunities for technical and scientific training."

The manufacturers endorsed steps towards remedying the condition in the Dominion as to technical training through Government action to be set in motion.

Window Displays Have Great Selling Power

The Mills Hardware, of Hamilton, Ont., believes strongly in the selling power of the window display. They change the display twice and sometimes three times each week. Above photo shows one of their selling windows used during the past spring in their campaign to urge the sale of garden tools and incidentally to help production.

Additional Report on Half Holidays

FOR the past two weeks HARDWARE AND METAL has given lists of towns and cities in various parts of the Dominion where the weekly half holiday is observed during the summer months. Following is an additional list reported during the past week. A list of these towns has been prepared in booklet form for the accommodation of travelers and others, copy of which may be had free on request.

FOREST, Ont.—Hardware stores close 12 o'clock Wednesday during June, July and August. Close evenings 6 o'clock.

WALKERVILLE, Ont.—Majority of stores do not observe half holiday. Close evenings, except Saturday.

STOUFFVILLE, Ont.—Stores close 12 o'clock Friday, May, June, July and August. Close Monday, Wednesday and Friday evenings 6.30 o'clock.

WALLACEBURG, Ont.—All stores except hardware stores close 12 o'clock Thursday. Hardware stores close evenings at 6 o'clock, except Wednesday and Saturday.

FENELON FALLS, Ont.—All stores close 12 o'clock Wednesday. Open evenings.

COLDWATER, Ont.—Half holiday not observed. Close evenings, except Saturday.

PORT DOVER, Ont.—Hardware stores close 12.30 Thursday, June, July, August and September. Close evenings 6 o'clock, except Saturday throught year. Open Wednesday evening during spring, summer and fall.

GRAVENHURST, Ont.—Hardware stores do not observe half holiday. Close evenings, except Saturday.

ATWOOD, Ont.—Half holiday not observed. Close Monday, Wednesday and Friday evenings at 6 o'clock.

LITTLE CURRENT, Ont—Half holiday not observed. Close Tuesday and Thursday evening at 6 o'clock.

MATTAWA, Ont.—Stores close Wednesday 12 o'clock, May 1 to October 31. Open evenings.

HAWKESBURY, Ont.—Half holiday not observed. Close Tuesday and Friday evenings at 7 o'clock.

SARNIA, Ont.—Half holiday not observed. Close evenings at 6 o'clock, except Saturday.

COLBORNE, Ont.—Stores close Thursday 12 o'clock, May, June, July and August. Open evenings.

PORT COLBORNE, Ont.—All stores close Wednesday 1 o'clock, June, July and August. Close evenings 6.30 o'clock.

THOROLD, Ont.—Hardware stores close Wednesday 12 o'clock. Close evenings at 7 o'clock.

STRATFORD, Ont.—Hardware stores probably close Wednesday 1 o'clock. Close evenings.

ELK LAKE, Ont.—Hardware stores close Thursday 1 o'clock. Close evenings, except Saturday.

VICTORIA HARBOR, Ont.—Half holiday not observed. Close evenings 7 o'clock, except Saturday.

STRATHROY, Ont.—Half holiday not observed by hardware stores. All other stores close 12.30 Wednesday. Hardware stores close 6.30 evenings, except Saturday.

MOUNT FOREST, Ont.—Half holiday not observed. Close evenings, except Saturday.

Stove Makers May Reduce Number of Styles

The War Industries Board of the United States authorizes the following:

Representatives of the stove and furnace manufacturers have been conferring with the conservation division of the War Industries Board regarding a programme that is necessary to meet war conditions and enter into the saving of iron and steel, fuel, transportation, and labor.

The furnace manufacturers have already suggested action which would mean a reduction of 75 per cent. of the styles and sizes of furnaces now on the market.

The stove manufacturers suggested that no new styles or sizes of stoves be placed on the market for the period of the war, and representatives are now working out a detailed program of eliminating styles and sizes that are not really necessary. This, of course, will be taken up with the retail dealers before any definite action is taken.

This is especially important as a means of saving iron and steel, so essential to the country at the present. It will also enable the stove and furnace manufacturers to adjust their business to war conditions and to prepare for any war emergency that may come. Such action taken now may make unnecessary more drastic steps or prevent any serious situation later.

Stocks of dealers will be smaller and move more rapidly, and less capital will stand useless because tied up in inactive stocks.

Similar lines of conservation have been worked out in shoes, clothing, paints, etc., with others planned for the near future. Shellac and varnish manufacturers and users have just begun conferring with this division with a view to working out some programme of conservation, but have not yet reached a stage where any report could be made.

Hides and Leather Cannot Be Shipped Out

An order-in-Council has been passed at the instance of the War Trade Board prohibiting the export from Canada of hides and leather. An extensive export has been going on in these commodities owing to the big demand for them in the United States. Heavy leather of the kind suitable for making artillery harness has been going out of Canada in considerable quantities and the supplies available for harness and for belting in this country have naturally been greatly depleted.

In order to safeguard our own requirements the War Trade Board felt constrained to place an embargo on the export of same. Another order has also been passed prohibiting the exportation of tires for motorcycles and motor vehicles, as well as all other tires containing rubber, except under license. Owing to the restriction of the amount of raw rubber allowed to come into the United States there is a necessity that Canada should safeguard her available stocks.

Letters to the Editor

14*th June*, 1918.

The Editor,
"Hardware and Metal,"
143 *University Ave., Toronto.*

Dear Sir,

Will you kindly make a note in your reading columns to the effect that I desire to get in touch with manufacturers' agents who wish to obtain the Ontario agencies of United Kingdom firms now or after the war? I should also be glad to discuss with them, and others interested, the encouragement of British trade in Ontario, and the elimination of enemy goods after the war, and the sale of British goods in their place. Samples of German or Austrian merchandise sold here before the war, and which can be spared by importers and agents, will be of great service to my office. Any assistance you can render in your journal by placing me in touch with these parties will be greatly appreciated. Our office is at 260, Confederation Life Building, Toronto.

Thanking you in anticipation,
Yours very faithfully,
Fred W. Field,
H. M. Trade Commissioner.

The Sheet Metal Products Company has taken out a permit for a two-story brick addition to their factory on Gerrard Street East, Toronto, cost to be approximately $6,800.

EVENTS IN THE TRADE

Business Changes

Saskatoon, Sask.—A. Douglas, hardware, has discontinued.

Ottawa, Ont.—John Stewart Co., hardware, has closed Somerset street branch.

Galahad, Alta.—B. D. Brown, hardware merchant, has sold out his interest in the business.

Edmonton, Alta.—J. W. Rutherford & Son, hardware and groceries, have disposed of their business.

New Norway, Alta.—J. Nozick, who has conducted a general store and hardware business in New Norway, is closing out.

Kingston, Ont.—J. B. Bunt & Co., hardware merchants, has dissolved. Oliver Chown is no longer connected with the company.

Obituary

C. E. Nellie, hardware merchant, Stoughton, Sask., is dead.

Personals

Charles Shaw, Kleinburg, Ont., hardware merchant, spent a day in Toronto during the week.

G. A. Binns, hardware, Newmarket, Ont., was in Toronto one day this week on business.

James Dandy, Streetsville, Ont., was a visitor in Toronto during the week on his way through to Hamilton, where he was to attend a meeting of the Oddfellows as Grand Lodge representative from his town.

News Notes

Gordon Wall of the Dresden Hardware Co., of Dresden, spent the week end in London on business.

Mr. Brewer, of Brewer and Harrison Hardware, of Parkhill, has been absent from the store during the past month on account of ill health. He resumed his duties at the store this week.

Geo. A. McMurtry, hardware merchant of St. Thomas, has completed enlarging his store basement and has shelved half of it. The alterations were necessary to take care of a larger stock. Two of the new lines Mr. McMurtry has added lately are a complete stock of auto accessories and a good line of bicycles.

The hardware merchants of London have decided to hold their annual picnic to the lake at Port Stanley as usual. The event will take place on Wednesday, July 31. In connection with the picnic the hardwaremen aim to raise $500 to give to the Queen Alexandra Sanitarium at Byron. The money will be raised by selling tickets for a draw on a fine piece of silver tea service which the members of the London Retail Hardware Association bought and donated for this purpose.

D. H. HOWDEN
President and Managing Director of D. H. Howden & Co., Wholesale Hardware Merchants, London, Ont., Who Died Suddenly During the Past Week.

Well-Known Wholesaler Dies in London

D. H. Howden, head of the firm of D. H. Howden & Co., wholesale hardware merchants of London, Ont., died unexpectedly at his home in London, after a short illness, on Tuesday evening, June 18. Mr. Howden suffered a stroke of paralysis while riding on a Grand Trunk train on Sunday as he was returning from visiting his daughter, Mrs. J. J. Stewart, at Hamilton. Mr. Howden was born at Watford, Ont., 58 years ago, in which place he conducted a general store for some time. We went to London some 30 years ago and became associated with John Bowman & Co., wholesale hardware merchants. Sixteen years ago he established the wholesale hardware house of D. H. Howden & Co. During the course of this business career he has become widely known as a man worthy to be held in high regard. He is survived by two brothers, who live in Watford; two sisters, Miss Howden and Mrs. W. D. Eckert, of London; one daughter, Mrs. J. J. Stewart, of Hamilton; and one son, Norman H. Howden, of D. H. Howden & Co.

Montreal News Notes

Royal Cluxton, manager of the Canada Paint Co., was in various points across the line last week, including Cleveland and Syracuse.

D. H. Corner, hardware merchant of Bedford, Quebec, was a Montreal visitor this week.

J. W. Richardson, buyer for the firm of Caverhill-Learmont & Co., is holidaying at present at points south of Montreal.

Arthur Laberge, of Chateauguay, Quebec, hardware merchant, was this week in Montreal on business.

Mr. McEwen, superintendent of the Imperial Varnish Co.'s plant at Toronto, was in Montreal the first of the week.

Incorporations

Lawrence's Limited, has been incorporated to carry on a furniture and hardware business at Maple Creek, Sask.

The Page Wire Fence Company of Canada, Limited, has been licensed by the Province of Ontario to carry on business within the province, provided that the company does not use any larger amount of capital than the sum of $40,000. The company is already incorporated under the laws of the Dominion of Canada.

Letters patent have been granted to the Canadian Stoves, Limited, with head offices at the city of Toronto, for the purpose of carrying on the business of manufacturers of and dealers in furnaces, stoves, ranges, boilers, lavatories, baths, basins, sinks, laundry and toilet wares, cisterns, tubes, pipes for water, gas, sanitation and drainage.
The capital of the company is placed at $40,000.

Rubber Company to Build at Brampton

Operations have started on the building of the plant for the Hercules Rubber Company at Brampton, Ont. It is stated the first building will be 60 by 120 feet in dimensions and that other buildings will be added as rapidly as the needs of the company require. Brick and other materials have already been placed on the site at McMurchy Avenue in that city. It is stated the machinery is already on order for the plant.

St. John Manager of Robertson Co. Dies

T. McAvity & Sons, Limited, St. John, are flying a service flag bearing 149 maple leaves in honor of the men of their staff who have gone overseas. The leaves are of blue, with the exception of eleven which appear in gold in recognition of those members who have given their lives in the war.

Lieut.-Col. J. L. McAvity, president of McLean, Holt & Co., Ltd., has been appointed commandant of Camp Sussex, the summer training camp for New Brunswick forces.

The McLennan Foundry & Machine Works, Limited, of Campbellton, N.B., are preparing to enter the shipbuilding business. They have secured a long-term lease of a suitable site at Duncan's Point on the Restigouche River and have secured the right to erect a large wharf in connection with their plans.

of only a few hours on June 13.

Mr. John Keeffe, manager of the St. John branch of the James Robertson Co. Ltd., died suddenly after an illness of only a few hours on June 13. Mr. Keeffe, who was a life-long resident of St. John, had worked his way up with the company until he had won promotion to the office of manager, which he has held for many years. In business circles he held a high reputation as an able executive and a man of sterling integrity. In the Board of Trade he was an influential member whose opinions bore weight and whose assistance in any plans for the upbuilding of the city and commercial and industrial interests could be counted upon. For several years he was a member of the International St. John River Commission which settled many matters which had been at issue between the United States and Canada for generations.

Mr. Keeffe is survived by his wife, two daughters and two sons, one of the latter being Major George Keeffe, who was associated with his father in the business until he joined the expeditionary forces and who, after being invalided home, has continued in military service with the training staff.

New Experiment for Montreal Gun Club

In the various parts of the West there is much interest in trap shooting. This is conducted very largely during the evening hours, where the long daylight permits of a real enjoyment of this pastime by those who are attracted by the traps. It is not uncommon to find, in parts of Saskatchewan and Alberta, and also elsewhere very considerable numbers enjoying their evening pastime, even in towns with a population of very few hundreds.

Since the introduction of daylight saving it has been considered possible to make use of the long evenings in like manner and just now the experiment is being tried out by the Montreal Club. Those interested have stated to HARDWARE AND METAL that there is reason to look for much success. There are many who will doubtless prefer to have an evening at the trap and others again who can go at this time but who are prevented from attending in the earlier part of the day.

W. H. PLEWES

A member of the firm of Plewes, Ltd., manufacturers' agents, Winnipeg, returned home last week, having been wounded in France. Mr. Plewes joined the Cycle Corps in 1915, and left Canada in 1915 for Europe. He went through several severe engagements including Passchendale, and was twice sent to hospital for treatment. Mr. Plewes was with the Northern Electric Co. for two years, later with the Canada Metal Co., entering his father's business in 1914, but left the following year for France.

Captain Marshall Married in England

Advice has been received announcing the marriage of Captain George Reginald Marshall, son of George A. Marshall, of G. A. Marshall & Co., manufacturers' agents, Toronto, to Miss Lily Parton, eldest daughter of Mr. and Mrs. A. E. Parton of Meadow Bank House, Sheffield, England. The ceremony was performed in St. Andrew's Church, Sharrow, Sheffield, on June 14. Captain Marshall joined the Royal Flying Corps in October, 1916, and has been overseas since that date. For conspicuous work with the service he was recently promoted to the position of captain.

Former Distillers to Manufacture Dyestuffs

Announcement was made during the week that the firm of Hiram Walker & Sons, distillers, of Walkerville, Ont., is to engage in the manufacture of dyestuffs and chemicals and will shortly start the erection of a $1,000,000 plant on the waterfront at Sandwich. One of the products they intend to manufacture is toluol, the basis of trinitrotoluol. A new company will be chartered under the name of the Hiram Walker & Sons Chemical Company, with a capitalization of $500,000. The decision to engage in this line of manufacture came about as the result of several months' consultation with experts from England and the United States.

New Montreal Firm of Manufacturers' Agents

A new manufacturers' agency with headquarters in Montreal, to sell hardware specialties at factory prices to the jobbers of Eastern Canada, is announced this week under the name of Richardson & Bureau. The firm is made up of John Richardson and Ernest Bureau. Mr. Richardson is a native of Sheffield, England, where for many years he was associated with large cutlery and hardware interests. Mr. Bureau has been a salesman connected with Lewis Bros. Ltd., Montreal, for the past fifteen years. He was a director of the Canada Hardware Company. Richardson & Bureau will be the direct Eastern representatives for Canadian, English and American factories. Their present postal address is 627 Querbes Street, Montreal.

Toronto Hardware Picnic July 17

The Toronto retail hardware merchants, in conjunction with the city salesmen, held a meeting Wednesday of this week in connection with the holding of their third annual picnic. This year the picnic will be held on July 17 at Lambton Park, and committees were appointed to take care of all details. A fee of $2 for each retail store is to be charged, this fee to include all the members of the firm and their employees. A. E. Manley has charge of the entertainment; there will be a dance in the evening.

A good list of sports is being arranged for, and there will be a baseball game too. The refreshment committee intimate that in spite of the restrictions of the Food Control Board they will provide enough to satisfy even the hungriest of the hungry.

The committees appointed to take care of the welfare of those attending are:

Programme—J. E. Booth, John Caslor, O. F. Morrison.

Prize — Messrs. Lake, McGee, F. Jackson, Bailey, McFadden, Atkinson, J. W. Jackson.

Parade—N. Baden, S. Buscombe, J. E. Booth, W. Cotton.

Refreshment—Mr. and Mrs. Ibbotson, Mrs. Platt, Mr. and Mrs. Boyd, Mr. and Mrs. McGillvray, and Mr. B. Platt.

To Hold Bicycle Races August 10

The Toronto Bicycle Dealers' Association plans to conduct at least eight bicycle races on a local half-mile track on August 10, and a number of dealers have already offered prizes or donations to a fund to help the meet. The majority of the events will be open scratch or handicap races. Out-of-town racing men are being invited to compete and at least one hundred and fifty different entries are expected.

CATALOGUES and BOOKLETS

Catalogue on Gas Stoves

The Burrow, Stewart & Milne Co., Limited, Hamilton, has just issued a very attractive catalogue comprising 82 pages in which their various lines of Jewel gas stoves and glass appliances for cooking and heating are shown. The catalogue is well illustrated and contains much valuable information with respect to their various lines. It is printed on a high quality calendared paper and presents a very attractive appearance. The cover is printed in three colors and shows the young housewife in the act of taking some apparently deliciously cooked food products from the oven of the gas range.

Catalogue of Surface Coils

McIntyre & Taylor, 501-3 Queen Street West, Toronto, have issued an eight-page booklet on M. & T. Extended Surface Coils which shows their line in these articles in an attractive manner. The illustrations of their various types and patterns of coils are well printed and give an excellent idea of what the coils look like. Some other lines are also included in the catalogue such as asbestos stove lining, asbestos stove cement and stove-pipe enamel. The catalogue is for distribution to the trade and may be had on request.

Booklet on Oil Systems

The S. F. Bowser & Co., Inc., of Fort Wayne, Ind., has issued an attractive and handy booklet for distribution to the trade. One of the features of this booklet consists in the fact that the outer cover is stitched and has space for carrying address to person to whom it is to be sent. On the back cover a return postal card is attached which can be easily torn away along perforated line. This postal makes request for information respecting their oil storage plan. The booklet is attractively printed and makes a forceful appeal for oil storage systems as compared with storage in barrel. Conservation is the keynote of the booklet.

Catalogue on Electrical Supplies

The National Electric Heating Co., Limited, Toronto, has issued a very artistic catalogue showing their various lines of heating and cooking appliances. It is designated as Catalogue "C" and is a fine product of the printer's art. The introductory page is followed by three pages of illustrations showing the various processes of manufacture of electrical goods. Pages describing electric irons, toasters, chafing dishes, hot plates, electric ranges, hot water heaters, heaters, radiators, and electric parts follow. These various lines are all finely illustrated with complete description of each article. The catalogue is printed on highly calendared paper and cover is embossed and done in three colors, brown, green and dark red. They are for distribution to the trade.

Western Crop Conditions Good

E. B. Plewes, of Plewes, Limited, Reports Conditions Similar to Those in 1915 When There Was a Bumper Crop

AFTER spending several weeks on an automobile trip in Saskatchewan and Southern Manitoba, in which he covered over two thousand miles, E. B. Plewes, head of Plewes, Ltd., Winnipeg, manufacturers' agents, has returned to head office. He reports that with the exception of a small area, he found crop conditions everywhere the best in years; since his return, however, rain has fallen in that particular section, so that they too will be enjoying the prospects of a good crop.

Mr. Plewes, speaking to a representative of HARDWARE AND METAL, drew attention to an important fact, viz., that the grain roots are down five inches in some cases on account of the cool spring. This results in the same condition as prevailed in 1915, when there was a bumper crop. Farmers claim to have sufficient moisture to mature the grain even though there was no more rain, as there is lots of frost in the ground.

Mr. Plewes reported that in view of the fact that an end of the war might come at any time, and with the end of the war lower prices, dealers were looking towards buying at lower prices, and were only making such purchases as would serve them for the immediate future. There was plenty of evidence that they were desirous of seeing the goods before ordering them. On account of the extremely high prices, dealers do not feel like having to carry goods over for twelve months.

Sending Sample Window Trims

The Canadian National Carbon Co., Limited, Toronto, is sending out a very attractive circular to trade calling attention to their new window trims. One of the novel features is an enclosure in miniature of the window trim itself. "Instead of sending you a picture of the new 'Colonel Batt' window trim, we thought we'd send you a little dummy window this time. Then you can see exactly what the trim is like. All you need to do to get the lithographed material for this window is to sign the card and mail it. Why not do that right now?" Above is the foreword to the pamphlet describing the window trim.

HARDWARE LETTER BOX

Manufacturers of Chemical Closets

J. R. Myers & Sons, Stratford, Ont.—Kindly advise us of the names of manufacturers of chemical closets.

The Kaustine Co., Limited, Toronto, Ont.; The Red Cross Sanitary Appliance Co., Brantford, Ont.; Steel Trough & Machine Co., Tweed, Ont.—Ed.

Steel Wire Cable Manufacturers

The Johnston Brokerage & Drayage Co., Sherbrooke, Que.—Please advise us of the names of manufacturers of steel wire cable.

B. Greening Wire Co., Hamilton, Ont.; Canada Wire & Iron Goods Co., Hamilton, Ont.; Dominion Wire Rope Co., Montreal; The Wire & Cable Co., Montreal, Que.—Ed.

Makers of Sewing Machines

Des Rochers, Ltd., Montreal, Que.—Please advise us who is the maker of the White sewing machine.

The White Sewing Machine Co., Guelph, Ont.—Ed.

Manufacturers of Fuse Plugs

In June 15 issue name of Northern Mfg. Co., Montreal, was inadvertently given as the manufacturers of fuse plugs. The name should have been the Northern Electric Co., Ltd., Montreal.—Ed.

Trade Inquiries

316. **Catalogues of various products.**—A Port Elizabeth wholesale firm requests price lists and catalogues on any line of goods suitable for wholesale jobbers, mentioning in a special way hardware and iron and steel goods of all kinds, brushware, woodenware, furniture (knocked down), carriage and wagon parts, foodstuffs, folding chairs, organs, and lumber for shelving.

317. **Linseed oil.**—A Port Elizabeth firm of wholesale importers requests prices and full particulars from Canadian shippers of linseed oil.

322. **Catalogues.**—A South African firm, with headquarters in Pretoria, asks for catalogues and price lists from Canadian manufacturers in all lines suitable for the wholesale trade, mentioning in a special way hardware—household, farm, building, and mining—tools, shovels, axes, kitchen utensils, brushware, handles, woodenware, wheelbarrows, paper—wrapping—and bags.

323. **Catalogues.**—A Port Elizabeth firm of wholesale general merchants requests catalogues and price lists on all lines suitable for the wholesale trade and in a special way on hardware of all kinds, lanterns, cutlery, tools, shovels, enamelware, household utensils, stoves, furniture—knocked down—foodstuffs, wire—baling, fencing, and netting—iron and steel in bars and rods, bolts and nuts, nails, woodenware, stepladders, handcarts, and samples of paper—wrapping and grease-proof—also bags.

324. **Catalogues.**—A Durban firm of importers requests catalogues on any line suitable for the wholesale general trade, in a special way on hardware of all kinds, tools, axes, shovels, pickaxes, household utensils, iron and steel goods of all kinds.

THE CLERKS DEPARTMENT

MASTER QUALITIES IN THE MIND OF CHAS. M. SCHWAB

Director General of the U.S. Emergency Fleet Corporation is a Man of Tact, and Above all of Imagination —But There's Something Else

IMAGINATION has been considered a poetic faculty only, and there have been hard-headed business men with whom the word never had any place at all. Of late, imagination has been associated very closely with successful salesmanship, and in this connection the fact that Charles M. Schwab possesses the gift in high degree is notable. You remember that when Schwab sped to Britain soon after the declaration of war with Germany that trip was said to express in action the highest form of imaginative salesmanship. Its results have been figured of course in millions. Before long they may reach billions.

Imagination is found in these days of big business, not only connected intimately with salesmanship, but also with executive work on the hugest scale. Again the imaginative powers of this prince of executives, Charles M. Schwab, come into the calculations of keen observers regarding his character and achievements. Here is what "Holland" has to say of Mr. Schwab in the *Wall Street Journal*.

"Another quality which is essential, if there be the greatest executive achievement, is imagination. Mr. Schwab possesses this quality. He is able to picture forth in his mind's eye what are to be the visible results of great undertakings. He saw in an instant almost what the achievements of the United States Steel Corp. were to be, not only in our home markets, but in a little while, in the world's markets. When he took hold of the Bethlehem Steel Co., he saw what the future of this corporation was to be, and his imagination has served him well, since what he foresaw some fifteen years ago is now an established fact."

His Visions of To-day

Schwab's imaginative faculties are busy to-day fleet-creating. Poets can vision argosies of the purple twilight borne on the seas of dreamland. Schwab's imagination not only pictures the fleets but speeds the vigorous creative forces of his executive mind into the tremendous activity that spurs men and machinery on to build and launch the vessels—to float the fleet he has visioned—is visioning to-day.

"It will be only a few days," says Holland, " before Mr. Schwab knows where, how and when the different materials which are required for ship construction are to be found and he will, furthermore, formulate, intuitively perhaps, a plan by which these material resources can be in the best manner and also in the most speedy way utilized for the construction of the ships.

Undoubtedly he is to have full power. He is a man who would not assume stupendous responsibilities involving the construction of a very great fleet and the expenditure of many millions of money unless he had also the necessary power with which to enforce those acts, whereby big responsibilities can be fully met. They said in Washington that Mr. Schwab had been commandeered by a certain implied power similar to that of eminent domain, whereby the Government assumed command of his services.

"Here are Your Ships"

"That is, of course, no more than a picturesque way of setting forth the manner in which this great intellectual and executive force has been brought into the service of the people in addition to the service which he has already been in various ways performing. With Mr. Schwab in command and with the whole resources of the country at his disposal, and without any banking financing needed, he should be able in a few months to say to the Administration at Washington, 'Here are your ships. My work is done. You are to use the ships in such way as seems expedient to you and with use of that kind I have nothing to do.'

Tact Does It

Mr. Schwab furthermore possesses tact in an unusual degree in dealing with men and especially with men who deem themselves to be of high authority. He has the power of persuasion. For this reason it will be possible for him speedily to mobilize all of the various factors which enter into our shipbuilding proposition.

"A somewhat colloquial comment frequently made on the day when announcement came from Washington that Charles M. Schwab had suddenly been appointed Director-General of the Emergency Fleet Corporation was this: 'If Schwab can't do the thing, then it cannot be done.' In the days that have intervened since that appointment, the view that was taken by all who know Mr. Schwab personally and by many who know only of his achievements, that he is perhaps the one man in the United States who can achieve all that is sought in the shipbuilding programme, has been emphasized.

"One of the gratifying features associated with this sudden selection of Mr. Schwab is to be found in the evidence furnished by the appointment that there is now thorough understanding of the necessity, if this Government is to do big things in these days of war, that there must be called to its assistance men who have achieved great success in industry and especially men who have taken no more than a remarkable interest in political or partisan activities.

"Mr. Schwab demonstrated nearly 20 years ago, when still a young man, his executive capacity for handling great propositions. For from one point of view and, relatively speaking, it was as difficult to organize quickly and adequately the so-called billion-dollar Steel Corporation as the proposition which Mr. Schwab now has consented to undertake in behalf of the nation and for a salary of $1 a year. As president of the United States Steel Corp. it was commonly understood that he received a salary of $100,000 a year and there were no accusations that he did not earn the money.

Unerring Judgment

"He had, as his first business as president of the Steel Corporation, the co-ordination of various corporations, some of them large, which had been independent and which as a whole represented all the features of the iron and steel industry of the United States. It was almost an original proposition, although it had been in part worked out by the Federal Steel Co. of Illinois. These various corporations were established in many cities and in several states. Mr. Schwab, with swift and unerring judgment and skilful administration, thoroughly mobilized all these various subordinate corporations so that in a few months the great machine moved smoothly, without friction, and the many thousand employes, from the high-salaried officers down, felt the spirit of enthusiasm and co-operation which this young president was able to infuse into the entire system.

"Of course, as Director-General of the Emergency Fleet Corporation, Mr. Schwab's responsibilities are greater and in the aggregate the work which he must do will be in far larger proportion than was that associated with his achievement in speedily establishing upon a firm foundation the United States Steel Corporation. But he is to bring to this national work precisely the same executive qualities and that unusual and almost mystic mental equipment which distinguish him. It is impossible to analyze the intellectual qualities which are the possession of men of extremely great executive capacity. Not much more can be said than that these men accomplish this, that or the other great thing. It can, furthermore, be said that they were masters of strategic mental resources, so that there was constantly suggested to them as though by intuition or inspiration the way by which difficulties could be surmounted.

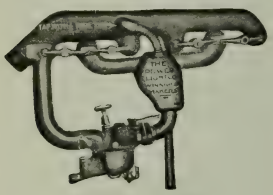
"That was the quality of mind which the late J. P. Morgan possessed, and in this respect Mr. Schwab has often been spoken of as resembling that great organizer and financier."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

POWERLIGHT MANIFOLD

The Powerlight Company of Winnipeg, Man., is placing on the market a new article in the Powerlight manifold, which it is claimed gives greater efficiency from gasoline. In one test that was made with this manifold on a Ford



Powerlight Manifold

car it is stated the mileage obtained on a gallon of gasoline was 35.9. The Powerlight manifold consists of two cuplike iron pieces, as illustrated, which clamp together where the intake joins the manifold, making a practically heat tight chamber, with a little asbestos packing between the two pieces. Two bolts hold the heater in place and the heat is obtained by drilling and tapping a ⅜-inch iron pipe size hole into the exhaust pipe of the manifold. Into this hole is screwed a street elbow, and connecting with this elbow and the top of the heater is a flexible steel tube which causes the heat from the exhaust to enter the heater at the top, and from the lower part of the heater is a similar flexible steel tube carrying away all the heated gases.

MOTOR AND TRANSMISSION GREASE

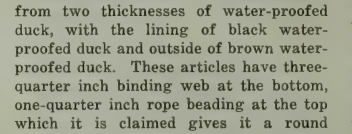
The Motor Mica Products Company, 566 W. Washington street, Chicago, Ill., is placing on the market some new products in the shape of motor mica cup grease, transmision and differential grease and tire powder. For the cup grease it is claimed that it is made of the purest selected fats and highest grade mineral oils, properly compounded to give the best results from all conditions. It is asserted that it prevents hot bearings, saves lubrication cost from 35 to 50 per cent. and saves wear and tear. It is claimed for it that it is antifriction and anti-carbon, that it saves the horse's strength and the wagon's wear.

Motor mica grease is a grease designed for use in all transmissions and differentials except those designed for light oil lubrication. It is claimed for it that it is the most satisfactory lubricant for electric gears, shift mechanisms and reverse gears of power boats. It is asserted that it is useful for filling the change speed gear case and the wheel and brake hubs of motorcycles. Motor mica tire powder is designed to prevent inner tubes from sticking to tires and to eliminate over-heating. It is claimed for it that it will not stick, cake or harden. It is put up in a convenient shaker tube of an attractive orange color.

Motor Mica Cup Grease

COLLAPSIBLE CANVAS WATER BUCKET

The Powers Manufacturing Company of Waterloo, Iowa, is introducing two new articles in their collapsible water bucket and basin which is designed along the lines of the bucket and basin used by the United States War Department. It is stated these articles are manufactured from two thicknesses of water-proofed duck, with the lining of black water-proofed duck and outside of brown water-proofed duck. These articles have three-quarter inch binding web at the bottom, one-quarter inch rope beading at the top which it is claimed gives it a round shape. A web handle is sewed two-inch from bottom as an aid to easy pouring. The bucket holds 9 quarts, is 8 inches in diameter and 12 inches high, weight 12 ounces. The basin is 4½ inches high, 8 inches diameter, holds 3 quarts, weighs 7 ounces.



Canvas Bucket and Basin

PATHFINDER COMPASS

The Pathfinder Company, 318 W. Lombard Street, Baltimore, Md., is placing before the trade a new compass which it is stated has a threaded post on the back with a small nut, so that they can

Pathfinder Compass

be readily attached to any other article such as a soldier's wrist watch, an automobile gauntlet, lapel of a coat, a dog collar for hunters or to other articles. It is stated these compasses are made of solid brass, heavily nickel-plated and with an unbreakable crystal. They are sold on display cards, 24 to a card.

NEW AUTOMOBILE HEADLIGHT

C. Kloepfer, Limited, 44-50 Wellington street east, Toronto, is placing before the Canadian trade the Rite-Lite headlight for automobiles which it is claimed is scientifically designed to overcome all the difficulties experienced in the use of powerful electric headlights. The principle used in this headlight is that of the camera lens, which it is claimed is a new departure in construction.

In the principle of a camera the view of a large landscape is transmitted through a small lens of not over one inch in diameter and the incoming light is evenly distributed over a plate up to ten inches square with such evenness that no appreciable difference is observed on the remotest corners of the plate. In Rite-Lite, it is asserted, similar results are obtained by the action of the powerful reflectors forcing the light into the darkness through a diffusing lens which diffuses over an area of at least 100 feet in width by five hundred feet in front of the car. In order to obtain a longer range of light, it is stated, a small bull's-eye of clear glass is placed in the diffsuing lens, which causes projected rays and intensified light on the road for over five hundred feet in front of the car.

In Rite-Lite two-thirds of the entire lens is made of green and orange shades of glass and one-third of white, which is the diffusing lens. In action, it is claimed, these different shades are blended into a soft light which does not cause a sharp contraction of the pupil of the eye when meeting the car.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

TURPENTINE provides the sensation of the markets for the week in an advance of 10c per gallon, with every indication that further increases may become effective within the near future. Supplies are only fair and difficulties in securing further stocks seem to be multiplying almost daily. Delays over the railroads, with no intimation being given out by shippers on the sailing of ships, throws a cloud of uncertainty over the question of future arrivals.

The increasing strength of the pig lead market as evidenced in a series of advances during the past two or three weeks has resulted in new prices at higher levels being named on white lead in oil. The continued high market on linseed oil is also, it is intimated, a contributing factor in this latest advance, which amounts to 50c per 100 pounds.

Wire nails have undergone revision upward, present quotations ranging 10c per 100 pounds above last week's figures. Wire rods are unobtainable from the United States mills, and Canadian plants are experiencing considerable difficulty in maintaining output. These elements provide for a very strong market on nails and even higher figures may be named in the near future.

The strength of the sheet situation is shown in higher prices being named on corrugated sheets during the week. This is in line with predictions given in HARDWARE AND METAL last week, and will very likely extend to metal ceilings, siding and shingles. Eavetrough and conductor pipe are being held at unchanged levels for the present. Black steel sheets show an advance in some quarters ranging from 25c to 50c per 100 pounds over former figures.

The number of miscellaneous items to be revised this week is somewhat smaller than usual, but the tendency throughout is upward. Extension ladders have made an advance, along with blow torches, fire pots, sash weights, sleigh bells and vises. A heavy sale of guns and rifles is reported, with a slight firming of prices in some quarters; stocks are becoming pretty well depleted, retailers showing a desire to cover for their fall requirements. Business is seasonably good.

MONTREAL MARKETS

MONTREAL, June 20.—Changes have been considerable, including a number on auto accessories. These are getting short in some respects and naturally there are and will continue to be advances. The steel markets are steady and firm with upward tendencies promising. School slates, fishing lines, roofing nails, rifles, rope clips, lamp black, Norway iron, lead, spelter, and hose clamps are marked higher, while there is likely to be an advance on certain lines of chains and also on washboards on which the prices are withdrawn. Trading conditions have somewhat quieted down. Notwithstanding this there is a fair movement of small goods, and the only complaint made by the trade is that of their inability to secure goods wanted. Stocks are fair in some commodities and the jobber having these is not looking for a market.

Auto Jacks, Pumps Register Higher Prices

Montreal.

AUTO JACKS, PUMPS.—Automobile jacks are higher. This applies to that known as "The Cracker Jack," and the new price is 30c each higher than the old at $1.80. Discount allowed the trade is 33 1-3 per cent. Manzel engine-driven pumps for Ford tires are up to $12 each from $10.50; a special discount is allowed the dealer.

Waxes and Cleaners; Channel Rails Advance

Montreal.

WAXES, CARBON REMOVERS, RAILS.—Among the auto accessories to change this week are various lines of prepared wax used in polishing cars. These are reduced about ten per cent., and the same applies to carbon remover and stop-squeak oils. Channel rails are advanced somewhat, the percentage being anything but uniform. Some of the comparative prices are as following, the old price quoted first: No. 6094 $7.63-$7.93; No. 6092 $5.33-$7.20; No. 6093 $6.67-$9.55 and so on. From these prices a discount of 33 1-3 per cent is given.

Pliers Advance; Valve Grinders, too

Montreal.

PLIERS AND VALVE GRINDERS.—Pliers known as "Superb" are up from $1.23 to $1.50 per pair; vest pocket pliers from 77c to 90c, and thin nose from $1.07 to $1.27 per pair. A discount of 33 1-3 per cent. applies. Universal valve grinders also are higher and cotter-pin extractors selling before at 12c each are now 13½c. A special discount is allowed.

Connecting Rod Wrenches, Socket Wrenches, etc., up

Montreal.

ROD AND SOCKET WRENCHES, ETC.—Changes have been made representing advances in the price of connecting rod wrenches. These revisions apply also to cylinder head, tension spring, and also to spark plug wrenches. They approximately are 10 per cent. dearer than before. Socket wrench sets also are up and this will run from 10 to 12 per cent. Double-end wrenches are in the advance list, too, including the small adjustable style. Special discounts apply. A variety of extension bar socket wrench sets is included in the new revised list and also some universal joint socket brace, Mossberg socket and Mossberg brace wrenches. Illustrative of the advances in Mossberg sets the following will be a guide. No. 10 old price $1.65, new price $1.84; No. 49 $5.70-$6.25, and No. 17 $2.59-$2.85.

Advanced Prices for Storage Batteries

Montreal.

STORAGE BATTERIES, SPRINGS.—Advances are in effect for Eveready storage batteries. It is now necessary to add 10 per cent. to the Canadian list with the usual trade discount applying. There is a scarcity in certain springs for use on Chevrolet cars caused by the difficulty in securing special steel used in their manufacture, this requiring to be 3 inches wide.

Bright Chain, Washboards, Wire Rope Clips are up

Montreal.

CHAIN CLIPS, WASHBOARDS.—Advances are made in bright coil harness chain and other lines of chain. Prices for the present are not available, new lists being promised for the immediate future. Wire rope clips are moved higher, too, the following being the new prices and representing an advance of 5c per dozen; ¼-inch jap'd 70c, galv. 80c; 5-16 inch jap'd 95c, galv. 95c; ⅜ inch galv. $1.10; ½ luch jap'd $1.30, galv. $1.55; ⅝ inch jap'd $1.65, galv. $2.10; ¾ inch jap'd $2.50, galv. $3.20; ⅞ inch jap'd $3.30, galv. $4.25, and 1 inch jap'd $3.75, galv. $5.00. Wash board prices are withdrawn and new quotations will be available in the immediate future.

Slates, Hose Clamps and Fish Lines Higher

Montreal.

SLATES, HOSE CLAMPS, FISH LINES.—Children's school slates are advanced about 15 per cent. all through, effective at once. Hose clamps also are higher, and the average percentage of increase is 15 per cent. Fish lines of the S. I. cotton variety are considerably higher also, this being about 25 per cent. over previous quotations.

Rifles are Higher; Pistols, etc., Go Up

Montreal.

RIFLES AND GUNS.—While there are no wholesale changes recorded for the week on arms, there is likely to be a general revision of the prices ruling heretofore on revolvers, rifles and guns of all kinds. This week revision is made in some lines of Winchester rifles and these are as follows: No. 699 from a list of $18.50 to $20.50; No. 698 from $40 to $48; No. 711 from $23.50 to $25.50; No. 7110 from $25 to $27, and No. 723 from $25.75 to $27.75. An extra 5 per cent. is to be added to these list prices for the dealer's costs.

Big Advance Lampblack; Also Roofing Nails

Montreal.

LAMPBLACK, ROOFING NAILS.—Considerable revisions upward are made in the price of lampblack. The ¼'s are selling now at 45c per pound, and were before quoted at 25c; the ½'s at 36c per pound, and these were 20c before. The supply of one pounds is very short and in one quarter these are altogether withdrawn for the present. American felt roofing nails are up to $11 per cwt. in less than keg lots, and to $10 in full kegs, while another make is selling on the basis of $9 per keg.

Wire Nails and Wire Steady; Demand Fair

Montreal.

WIRE AND NAILS.—Changes have not been made for either wire or nails and a fair amount of business is passing. One retail dealer that is also doing some jobbing states that the city trade is fine and this is a comforting contrast to what has obtained for some weeks past. Wire nails are firm at $5.35 base per 100 pounds; cut nails at $5.60, and smooth steel wire is steady but unchanged at $6.25 per 100 pounds.

HANDLES MAY GO HIGHER

During recent weeks there has been much advance in the price of handles. This, it was thought, would be ample to cover the market for some time.

In speaking with a large importer of these goods in Montreal, HARDWARE AND METAL was informed that this class of goods, while now high, would further advance. The reasons given are several.

The United States Government, in particular, is at present employing immense quantities of handles for the use of her troops. Millions of pick, shovel, axe and other handles are required and this is an unusual demand upon the available supply of material used in the manufacture of these.

Then again, the supply, particularly of hickory, and which is so much depended upon for the better grade of handles, is not as great as the demand calls for. It is really growing less each year and with the great tax now upon it the supply will be smaller as time passes.

A factor lost sight of by many also is that of the necessity of using up other woods for various war work. All this has a bearing on the output of handles. This informant was of the opinion that they would be much higher—and this ere long.

Dearth of Fuel Oils; Coal Oil, Gasoline Steady

Montreal.

COAL OIL AND GASOLINE.—The steady demand for fuel oils continues. Importers state that they have recently had many enquiries from those who customarily buy elsewhere. This reflects the fact that there is not as much fuel oil to be had as is desired, and as a matter of fact much more could be used. Gasoline is steady and the request for this active. Coal oil is unchanged and in steady demand, seasonably speaking. Prices: Motor gasoline, 34c gallon; coal oil, Palacine and Electroline 22c, and Royalite 19c.

Supplies Stoves Being Made up for Fall

Montreal.

STOVES AND WARES.—While the present volume of business is not heavy there is little diminution in the efforts of the stove makers who continue to lay up stocks against the fall demand. There is material on hand some of the manufacturers say to keep them working in the foundries, and a certain amount of material is being received from time to time from outside sources. The general lines of graniteware, pieced ware and general shelf goods are selling fully as well as this season of the year could be expected to record. No changes of price were made, but the tendencies are firm.

Rope Market Steady; Binder Twine Moves

Montreal.

ROPE AND CORDAGE.—While there is not a great deal of added interest to the rope situation the whole position is characterized by firmness. The ease with which supplies used to be obtained has now vanished and of many sizes it is harder to get what are required each week. It will not be a surprise to see prices higher before long. Some movement is still reported of binder twine. The heavy supplies to the trade in the West have reached there and what is now moving is going nearer to dealers. Pure manila rope is based still at 39c per pound; British manila at 33c, and sisal at 27½c per pound.

Norway Iron Firmer; Iron and Steel Steady

Montreal.

IRON AND STEEL.—There was an advance of $1 per 100 pounds on the part of one jobber for Norway iron. This still brought the price within the quotation given below, but the commodity is ruling with a firm undertone. Steel and iron bars too are steady and firm. An advance for these would not be at all surprising. In the meantime there is a fair amount of business obtaining from outside points particularly.

Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 20-0 21

Dwindling Supply Sheets; Prices are Unmoved

Montreal.

SHEETS AND PLATES.—Although there are no supplies available from without the schedules at which various

sheet sellers are offering have been unchanged. There is one thing generally conceded, and that is that the likelihood of getting further supplies in from the United States is a very remote possibility. Some have hinted that the available supplies on hand are ample for some time to come and there may be some truth in this. There is a fair volume of trade for sheets, particularly for those of regular gauges that can now be supplied.

BLACK SHEETS—		100 lbs.
10 gauge	$9 50	$9 00
12 gauge	9 25	9 65
14 gauge	7 25	9 00
16 gauge	7 45	9 15
18-20 gauge	7 50	9 25
22-24 gauge	8 00	9 60
26 gauge	9 70	9 75
28 gauge	....	9 90
10¾ oz. (28 English)	10 80	10 75

GALVANIZED SHEETS—	
10¾ oz.	$10 00
28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05
20 ga.	8 85
18 ga.	8 85
16 ga.	8 70

All Lead Products Have Strong Undertone

Montreal.

LEAD PRODUCTS.—As pointed out last week there was a very firm tone to the market and this firmness still continues. The pig lead position will be likely to affect the price of manufactured lines if it advances much more, and some revisions may be made in the near future. Trading operations are fair but the business is confined quite closely to immediate needs, users not wishing to carry stock at the somewhat advanced prices ruling.

Lead pipe, lb.	....	0 14
Lead waste pipe, lb.	....	0 15
Lead traps and bends	Net list

Do., broken lots	....	....

Lead and Zinc Firm in Old Material List

Montreal.

OLD MATERIALS.—There is much firmness in the old metal markets on the two important items of lead and zinc. These are somewhat in better demand and the supplies are not large. The firmness also is in sympathy with the market for pig lead. Heavy lead pipe is quoted at 7c to 7⅜c per pound. The fact of there being an embargo against the export of some of the old metal lines has served to make less fluctuation of price for the home market is the only one available to those who have trading to conduct.

Tea lead	0 07¼	0 07⅜
Heavy lead pipe	0 07½	0 07⅜
Yellow brass	0 12½	0 13½
Red brass	0 22½	....
Light brass	0 08	....

No. 2 busheling	13 00	14 00
Old rubbers, boots and shoes	0 08	0 08¼
Overshoes, lumbermen's rubbers boots	0 07	....
Bicycle tires	0 04¼	....

Spelter Very Firm, so is Pig Lead

Montreal.

INGOT METALS.—There is a very strong market this week as applying to spelter although there was a somewhat easier feeling in New York early this week. Lead too is very firm, and there seems to be less offering.

Copper.—The usual good condition still prevails, there being a good volume of business at the unchanged price of 29c to 30c per pound.

Tin.—It is difficult still to get any tin for immediate use. As a consequence there is none to be had without paying a high pricee, and this holds at around $1.25, with $1 per pound quoted on the basis of supplies to arrive. It is reported that some lines may be placed on a fixed basis.

Spelter.—In sympathy with the United States markets the position of spelter here is very firm. While the latest reports do not indicate a higher basis some think this quite probable. Price 10½c per pound.

Lead.—There does not seem to be a great deal of lead available and as a consequence there is another advance recorded in the United States markets. Even at this the offerings are reported very light. Price here is around 10c to 10½c per pound, and strong at this.

Antimony.—The market is firm, but since the recent heavy deals were consumated there has been little trading. Prices hold at 13c to 13¼c per pound.

Aluminum.—Little to report on this metal. Trading is light and price remains at 50c per pound.

TORONTO MARKETS

TORONTO, June 20.—Quotations during the week show many lines under revision and advances are provided for in each instance. Corrugated sheets are higher in price and other lines affected include blow torches, grindstones, sleigh bells, mill board, hand bells and step ladders. A very ready sale has been noticeable for rifles and guns and jobbers' stocks are practically exhausted. Pig lead and spelter show advances for the week.

Business continues in very good volume in all lines. Retailers report fair business for screen doors and windows and auto accessories are moving out very freely.

Blow Torches Make Further Advance

Toronto.

BLOW TORCHES.—A further advance in prices applying on blow torches and fire pots has been named and quotations now available on some of the better selling numbers are as follows: Blow torches, No. 32, $9.00 each; No. 17, $9.40 each; No. 123, $8.60; fire pots, No. 20, $9.28 each; No. 21, $11.88 each.

Grindstones Revised; Mill Board Too

Toronto.

GRINDSTONES, MILLBOARD.—Revised prices have been issued on grindstones during the week which provide for advances in these. The present scale of quotations for 40-lb. stones and over is from $2.25 to $2.50 per 100 pounds, while 40-lb. and under sell at $2.50 to $2.60 per 100 pounds.

Asbestos mill board selling at 14c per pound has reached a considerably higher level, following the trend of other hardware lines.

Extension Ladders Up; Other Lines Revised

Toronto.

EXTENSION LADDERS, OTHER LINES.—Quotations on extension ladders are being named at a new basis than that formerly ruling. This shows little variation over former figures, the 16 to 32-ft. selling at 20c per foot, the 34 to 40-ft. at 22c, and the 44-ft. at 24c. Common household stepladders have also been revised, a substantial advance being provided for in new quotation of 19c per foot.

Gem razors have been changed in price, $13.50 per dozen being new figure established. Red end scythe stones at $5.60 gross, cast washers at $5.95 per 100 pounds. and Dover sad irons No. 60 at $21.00 dozen sets are other lines to be revised upwards during the week.

Prices Advance on Hand and Sleigh Bells

Toronto.

HAND, SLEIGH BELLS.—Prices have advanced on hand bells this week, the present range of prices being as follows: Nickel plated No. 2, $3.25; No. 4, $6.00: No. 6. $10.00; No. 8. $15.00; No. 10, $26.40 dozen; brass No. 2, $2.85; No. 4, $5.50; No. 6, $9.35; No. 8, $14.00 dozen.

Sleigh bells have also come in for a change in price, quotations now ruling showing up about 15 per cent. over last year's figures.

Vises Go Higher; Valves and Tools

Toronto.

VISES, VALVES, TOOLS.—Prices are in process of correction on practically all lines of vises, the new figures to show an advance of about 10 per cent. all

the way through. A revision in bolt stocks and dies is looked for in some quarters though the amount is not stated—it will be an advance. Casters are another line on which new prices at about 10 per cent. advance are now in effect.

Quotations on Jenkins globe, angle and check valves should read 12½ per cent. advance on list instead of 12½ per cent. discount. The discount applying on lumbering tools is given out as 5 per cent. in place of 15 per cent. which appeared in last week's issue.

Guns and Rifles Selling Freely; Sash Weights

Toronto.

GUNS, RIFLES.—A very free movement of available supplies of guns and rifles is apparent since the recent order-in-Council prohibiting further imports, and jobbers' stocks are becoming pretty well depleted. Some jobbers report that they have been only able to take care of their booked orders and have not solicited any further business. An endeavor to equalize distribution as much as possible is being made. A tendency towards firmer prices on some lines is noticeable.

An advance in sash weights has been named during the week, the solid being quoted at $3.90 per 100 pounds and sectional at $5.50 per 100 pounds.

Stoves and Ranges Slow; Enamelware Firm

Toronto.

STOVES, ENAMELWARE.—There is little business being done in stoves and ranges and the market shows no revision during the week. Prices are very firm and the question of future supplies hinges on raw materials available. A very good movement of summer lines continues, though difficulty in taking care of gas stove trade is reported.

Enamelware and tinware are holding very firm and revisions in some lines upward in the near future seem quite within the realm of possibility. Business is very satisfactory for this season of the year.

Gasoline Supply Easier; Heavy Demand Continues

Toronto.

OILS, GASOLINE.—One large dealer reports that they have been able to catch up on gasoline deliveries and in that respect the situation is easier. Prices have held firm, 33c per gallon showing no change, and the demand is very heavy.

Coal oil is also in good demand and unchanged range of quotations continues, the Royalite selling at 18c and Palacine at 21c per gallon.

Lubricating oils and greases for automobile use are in big demand and interest is being manifested in lines used during the threshing season.

Advance of 10c Keg Made in Wire Nails

Toronto.

NAILS. WIRE.—The long heralded change on wire nails outlined and followed up in HARDWARE AND METAL for some little time past has finally been put into effect. Quotations are now to be made at $5.30 base per 100 pounds, representing an advance of 10c per keg. That this is the peak is questionable in some quarters and another 15c advance is freely hinted at. A fair movement is in progress though indications are that retailers' stocks are in very fair shape to take care of present demands. No change has been made in cut nails, the base holding at $5.65 per 100 pounds.

Smooth steel wire has held firmly at $6.25 per 100 pounds base and no revision in this quotation is looked for at the present time. The demand is only fair.

Little Movement in Cordage; Twines Strong

Toronto.

CORDAGE, TWINE.—The demand for cordage is rather limited at the present time, though some interest is noticeable in hay fork size and some sales of this have been completed. Quotations are firm, pure manila selling at 39c per pound base, British manila at 33c and sisal at 27½c.

Twines are reported very firm, due principally to scarcity of material. There is very little hemp twine offering now and jute is reaching high levels. Stocks on all lines are rather confined to a narrow range.

Iron and Steel Bars Holding; Light Demand

Toronto.

IRON AND STEEL.—Iron and steel bars are holding steady in an unchanged market, and little of interest attaches to these items. The demand is within rather narrow channels and jobbers are able to take care of the present demands of the trade quite easily. Quotations range as follows:

TORONTO—		Per 100 lbs.
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75
Horseshoe iron	....	5 50
Tire steel	....	5 70
Mild steel	....	5 50
Norway iron	11 00	13 00
Toe caulk steel	....	6 25
Sleigh shoe steel	....	5 50
Band steel, No. 10	....	5 75
Do., No. 12	....	6 00
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Corrugated Sheets Go Higher; Trough Firm

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—A revision upward in galvanized corrugated sheets is provided for in new lists established in some quarters, which is in line with predictions made in HARDWARE AND METAL last week. That this new list will be generally adopted and that painted will also come under revision within the next few days is considered probable. New list is shown along with previous figures below.

For the present it is thought that eavetrough and conductor pipe will remain unchanged, though how long the present scale of prices can be maintained is problematical. This likely will largely depend on how quickly present stocks are absorbed. Prices appear in current market quotations.

TORONTO— Corrugated Sheets—	Per 100 Sq. Feet Galvanized	Painted
No. 28 gauge	$ 8 25-$ 9 00	$ 6 75-$ 7 25
No. 26 gauge	9 00- 10 00	7 75- 8 25

No. 20 gauge	19 00- 21 00	16 50- ....
No. 18 gauge	23 00- 27 00	20 00- ....

Discount 7½ per cent.

Black Sheets Revised; Few Sheets Arriving

Toronto.

SHEETS, PLATES.—Revised prices on black sheets have been named in some quarters which provide for an advance of 50c per 100 pounds in some gauges and 25c in others. Stocks on hand are fairly complete though from all sources indications are that there is comparatively little moving towards Canada in either black or galvanized. It will not take long under present conditions to bring existing stocks down to a comparatively low level. Galvanized sheets have held at advances recorded last week with a fairly good demand reported. The present range of quotations follows:

BLACK SHEETS—		Per 100 lbs.	
10 gauge	....	10 00	$12 00
12 gauge	....	10 10	10 00
14 gauge	7 45	7 90	8 40

U.S. 28		9 20	9 45
U.S. 26		8 90	9 15
22 and 24		8 75	9 00
16		8 45	8 70
14		8 35	8 60

Light Supplies Wrot. Iron Pipe and Boiler Tubes

Toronto.

WROUGHT IRON PIPE, BOILER TUBES.—Stocks of wrought iron pipe are growing lighter every day owing to the difficulty manufacturers are experiencing in getting through supplies of raw material. Prices are very firm and that higher levels may be reached has been hinted at in some quarters. Prices shown in current market quotations are unchanged for the week.

Boiler tubes are increasingly scarce and stocks have dwindled to the vanishing point with apparently little prospect of their being replenished. Quotations are unchanged on the following basis:

Boiler Tubes—	Cold Drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Lead Products Very Firm; Solder Steady

Toronto.

LEAD AND ZINC PRODUCTS.—A further advance in pig lead has firmed

the market on manufactured lead products to that extent and manufacturers indicate that should the metal go much higher they will be compelled to advance their lines. The demand is only nominal at the present time. Solder remains firm and unchanged with a fair amount of trading in progress. The present range of prices is given herewith.

Lead pipe, lb.	0 14	....
Lead waste pipe, lb.	0 15	....
Lead traps and bends	Net list	
Lead wool, lb.		0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼

Solder, wiping, lb.	0 54½	0 56
Solder, wire, lb.	0 65	0 70
Zinc sheets, per lb.	....	0 26

Old Material Business In Stagnant Condition

Toronto.

OLD MATERIALS.—Business can be termed stagnant. There are no elements of interest attached to the markets here, and trading is at a very low point. Dealers seem to feel that improvement must come though when it is not possible to determine. Prices are unchanged.

Tea lead	$0 04½	....
Heavy lead pipe	0 07	0 07½
Yellow brass	0 12	0 13
Red brass	....	0 21
Light brass	....	0 09½

No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Waste and Oakum Holding Steadily

Toronto.

WASTE, OAKUM.—A fair amount of new business is offering in waste, and manufacturers are busy filling contracts on hand. Prices have held firm and unchanged for the week, as shown in current market quotations.

Oakum is rather quiet at the present time, orders being none too free and quantities rather limited. Prices shown in current market quotations are unchanged.

Cement in Fair Demand; Plaster of Paris Steady

Toronto.

CEMENT, PLASTER OF PARIS.—A fair volume of business has been passing in cement and June trading is showing up fairly well from all accounts. The market here is very firm, and that higher price levels may be reached seems quite within the realm of possibility.

Plaster of Paris is rather quiet, orders being none too plentiful. Stocks are in fairly good shape and prices, which appear in current market quotations are unchanged.

Lead and Spelter Reach Higher Levels

Toronto.

INGOT METALS.—Prices on lead and spelter both show an upward tendency during the week, though this is not due to heavy demand. Primary points report a very good trade and markets show strength. Some tin is arriving with quotations on these supplies and spot stocks same as noted last week. A heavy consumption of copper is reported with production equal.

COPPER.— Reports from United States points indicate a heavy consuming demand but producers are equal to this and no shortage is reported. Conditions locally are unchanged, the price holding firm around 29-30c per pound.

TIN.—Little of interest has developed during the week on this market. Supplies are expected to reach here at almost any time, orders being accepted on tin to arrive at $1.00 to $1.15 per pound, while spot offerings still range around $1.35 to $1.50.

SPELTER.—The market is somewhat firmer. A fairly steady demand, with a gradual depletion of stocks owing to certain producers withdrawing from the market, are factors. Prices locally range from ¼ to ½c higher at 9¼c to 9½c per pound.

LEAD.—Consumption at United States points and for Allied account is considered heavy and the market shows increasing strength. This has been reflected locally in an advance of ¼ to ½c and whereas ½¾c is named in some quarters, most sellers are asking 10c per pound.

ALUMINUM.—There is no change to record in the situation during the week. Price locally holds firm at around 50c per pound.

ANTIMONY.—This market has shown some strength under an increased demand. Primary points report a somewhat quieter tone. Locally the price is unchanged at 16c per pound.

PIG IRON.—There is little to be said in regard to pig iron. The demand is far in excess of supply and commercial requirements are receiving comparatively little attention. Reports from United States points indicate increased production, but the demand has not yet been overtaken.

LONDON MARKETS

LONDON, June 20.—Prices on all lines are very firm and several advances are recorded. Lines affected during the week include sash weights, roofing nails, wire nails, step ladders, pine tar, apple parers and grindstones. Business here continues good. The demand for seasonable lines is still strong. The demand for guns and rifles from the retail merchants to the jobbers is good. Most jobbers are selling their stocks in small lots in this way, making them go as far as possible.

Wire Nails Make 10c Advance; Rope Firm

London.

WIRE NAILS, ROPE.—In line with firm tendencies noted in HARDWARE AND METAL in regard to wire nail situation, an advance of 10c per keg has become effective during the week, with a further increase being talked of. The new base as provided by this advance is $5.30 per 100 pounds. Cut nails are unchanged, the base price being $5.60 per 100 lbs. Rope shows no inclination to change in price during the week, quotations holding firm as follows: Pure manila, 39c; British manila, 33c; New Zealand hemp, 33c; sisal, 29½c base per pound. Indications are that merchants have their stocks in good shape for the buying season.

New Prices on Grindstones; Tie Out Chains

London.

GRINDSTONES, TIE OUT CHAINS. —Revised prices have been issued on grindstones which call for an advance of 25c per 100 pounds over former quotations. The new basis of sale established is for 40 to 200 pounds $2.50, and less than 40 pound $2.60 per 100 pounds. A splendid sale of tie out chains is in evidence. Prices remain unchanged, lists being as follows: 1/0 x 20 ft., $16.50; 1/0 x 30 ft., $23.00; 1/0 x 40 ft., $30.00; 1/0 x 50 ft., $37.00 dozen; these lists subject to a discount of 50 per cent.

Step Ladders Go Higher; Roofing Nails

London.

STEP LADDERS, ROOFING NAILS. —An advance in the price of step ladders has become effective during the week. The high price of wood and difficulty in securing, along with heavy producing costs have entered largely into this increase. New quotations on the shelf-lock are being made at 18c, and the Ontario at 23c per foot. Extension ladders are also higher in price, lengths up to 32 feet selling at 20c per foot. A decidedly stiff advance has been made in the American large head roofing nails which are being quoted at $10.00 per 100 pounds in 100-lb. kegs, while in 25-lb. boxes the price is $10.25.

Apple Parers Advance; Small Bore Rifles Firm

London.

APPLEPARERS, SMALL BORE RIFLES.—Apple parers which have remained stationary for some time have undergone revision upward, the new price on the genuine Hudson being $12.00, and on the Little Star $8.75 per dozen. Small bore rifles are enjoying a fairly good sale and prices are holding firm and unchanged. Quotations on the Stevens' rifles are given as follows: No. 14½ Little Scout, $5.25; No. 26 Crack Shot, $6.25; No. 17 Favorite, $9.25;

No. 27 Favorite, $10.00, and the Marksman, $7.75 each.

Pine Tar Goes up; Bluestone Strong

Toronto.

PINE TAR, BLUESTONE.—A new price has been named on pine tar which represents an advance over previous quotations, the pint tins now selling at $1.50 dozen. Bluestone is also very firm locally, and a price of 17c per pound is named. This is a very high figure, but it is said warranted by present conditions. A very good sale of bicycles continues to manifest itself, and no change in quotations is noted, the Victor remaining at $33.50 each.

New Price Named on Sash Weights; Lawn Hose

London.

SASH WEIGHTS, LAWN HOSE.—New prices have been named on sash weights which represent a substantial increase over previous quotations. The solid are now being quoted at $4.00 per 100 pounds, while the sectional are selling at $5.50. A very fair sale of lawn hose is reported. Prices hold firm at levels ruling for some time past, which are as follows. Prices are per foot:

No. 33 3-ply x ½ in., 9c ft.; ⅝ in., 10¾c; ¾ in., 12½c. No. 44, 4-ply x ½ in., 11c; ⅝ in., 12¾c; ¾ in., 14½v. No. 55. 5-ply x ½ in., 13c; ⅝ in., 15c; ¾ in., 17c. Corrugated, ½ in., 15¾c; ⅝ in., 18¾c; ¾ in., 21½c; 1 in., 31½c. Corrugated less 5 per cent. in full reels of 500 ft.

Turps up Another 10c; Linseed Oil Firm

London.

TURPENTINE, LINSEED OIL.—The turpentine market shows increasing strength and this is revealed in an advance locally of 10c per gallon. Primary points show a very strong market and this will naturally be reflected here. The demand continues in very good volume and the supply is still within narrow limits. Present prices are: 1 bbl. lots, 95c; 2 to 4 bbl. lots, 94c; 5 gal. lots, $1.00 Imp. gall. The linseed oil situation shows no change. Supplies are none too plentiful and prices are firmly maintained. The demand continues fair. Quotations being made are: 1 to 2 bbls. raw, $1.90, boiled, $1.93 per gal.; 3 to 5 bbls. raw, $1.89, boiled, $1.92 per gal.; 6 to 9 bbls. raw, $1.87, boiled, $1.90 per gal.

White Lead in Oil Makes 50c Advance

London.

WHITE LEAD IN OIL.—An advance of 50c per 100 pounds has been made in prices on white lead in oil. The increasing strength of the lead market as noted during the past three or four weeks along with the high prices maintained on linseed oil are factors in the establishing of this new price. Quotations are now being made for pure at $16.75 in ton lots and $17.10 per 100 pounds in less quantities.

Glass in Light Demand; Putty Firm

London.

GLASS, PUTTY.—A very limited demand is noted in respect to window glass, and no item of particular interest is to be remarked in this market. Quotations are being firmly maintained, single and double diamond taking a discount of 25 per cent., while cut lights sell at 10 per cent. Putty is also dull and uninteresting. The demand is light and prices firm, standard in drums selling at $5.55 per 100 pounds, and pure in drums at $7.55.

WINNIPEG MARKETS

WINNIPEG, June 20.—Market prices on all hardware lines are holding firm and the past week shows but one advance of any importance, this being recorded on turpentine which jumped 15c gallon. The next month, however, will see many changes as just at present new prices are being prepared by many U. S. concerns to take care of the additional 25 per cent. advance in freight rates effective June 25th, and as soon as new shipments arrive higher prices are to be expected.

Owing to the embargo on wire coming into Canada a serious shortage of barb wire is going to result. Winnipeg stocks are reported as very low, and any further supplies will have to come from Canadian mills. Business in general continues fair, while harvest tools show heavy shipments in preparation for the coming harvest.

Fire Pots, Torches Move Freely; Very Firm

Winnipeg.

FIRE POTS, TORCHES.—Fire pots and torches continue to move freely, while prices hold on all lines. However, reports indicate that further advances may be expected. Prices now ruling on a few of the more familiar lines are as follows: Blow torches, No. 32, $8.25; No. 38, $7.40 each. Fire pots, No. 71, $14.00; No. 72, $12.80 each.

Shovels, Scoops Hold Firm; Good Sale

Winnipeg.

SHOVELS, SCOOPS.—Good movement is reported on all lines of shovels and scoops with prices holding firm. Stocks in general are reported to be well assorted. To-day's ruling prices are given herewith:

Shovels.—Fox & Olds, doz.—DH. sq. pt., $13.50; DH. rd. pt., $13.50; LH. rd. pt., $13.50; LH. sq. pt., $13.50. Bull Dog, and Jones, doz.—DH. rd. pt., $15.50; DH. sq. pt., $15.50; LH. sq. pt., $15.50 LH. rd. pt., $15.50.

Scoops.—Black Cat, and Crescent, doz.— No. 4, $17.00; No. 6, $17.50; No. 8, $18.00; No. 10, $18.50. Moose & Jones, doz.—No. 4, $18.25; No. 6, $18.75; No. 8, $19.25; No. 10, $19.75.

Barbed Wire, per spool—

Barb Wire Getting Scarce, Heavy Demand

Winnipeg.

BARB WIRE.—A heavy demand continues on barb wire with only a limited quantity on hand, and stocks will soon be depleted owing to the embargo previously mentioned. Other lines of wire continue to move freely and on these no shortage is reported. Prices on all lines are holding firm and are quoted at the following figures:

	F.o.b. Ft. William	F.o.b. Winnipeg
Lyman, 4 pt.	$4 95	$5 25
Glidden, 2 pt.	4 80	5 10
Baker, 2 pt.	4 75	5 05
Plain twist per 100 lbs.	4 95	5 25
Plain gal., per 100 lbs., No. 9	5 65	6 05
No. 12	5 85	6 25
Coil spring, 100 lbs., No. 9	5 70	6 10
No. 12	5 95	6 35
Bale ties, single loop, 14 gauge, per 100 lbs.	7 25	7 65

No. 10		6 80
No. 12		6 95
No. 14		7 15
No. 15		7 25
No. 16		7 40

Higher Prices Looked For on Dry Batteries

Winnipeg.

DRY BATTERIES.—New prices are being prepared on dry batteries, showing an advance of approximately 5 per cent. These will put into effect on the Columbia the coming week. Prices now ruling on this line are as follows:

No. 6—Less than 12, $43.25; less than 50, $39.25; less than 125, $38.25; full barrels, $35.75 per 100.

No. 8—Less than 12, $108.50; less than 25, $96.00; less than 50, $93.00; full barrels, $89.50 per 100.

Wrot. Iron Pipe Very Firm; Getting Scarce

Winnipeg.

WROUGHT IRON PIPE.—Prices continue to hold firm on wrought iron pipe owing to the fact that a serious shortage is reported in certain sizes. Reports emphasize the inability of the mills to get raw material. Prices still in effect are as follows:

Wrought Iron Pipe—	Black	Gal'v'd
¼ inch	$6 08	$8 42
⅜ inch	6 16	8 50
½ inch	7 83	9 63
¾ inch	9 95	12 38
1 inch	14 67	18 27
1¼ inch	19 88	24 75
1½ inch	23 76	29 57
2 inch	32 04	39 78
2½ inch	51 30	63 59
3 inch	67 05	83 16
4 inch	100 62	.....
3½ inch	84 92	.....
4½ inch	116 10	.....
5 inch	135 00	.....
6 inch	174 60	.....

Higher Prices Looked For In Saddlery Hardware

Winnipeg.

SADDLERY HARDWARE.—Reports from manufacturers of snaps, buckles and other lines of saddlery hardware indicate that an advance is anticipated in the near future. This is said to be necessary owing to increasing costs of raw material and production costs. Prices in the meantime remain at quotations ruling for some time past.

Turpentine Up 15c; Linseed Oil Steady

Winnipeg.

TURPENTINE, LINSEED OIL.—New prices just announced on turpentine show the heaviest advance during the past year, being 15c per gallon. This is due to the shortage of labor and increased demands for transportation. New prices now in effect are given herewith: Barrels, 95c per gallon; ½ barrels, 98c gallon; 5-gallon lots, $1.00 gallon; 1-gallon lots, $1.00 gallon; plus the usual extra for containers.

No change is recorded during the week on linseed oil, prices holding firm at the following figures: Raw oil, $2.00 gallon; boiled oil, $2.03 gallon, barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, June 20.—While the steel producers are not altogether clear as to some points in the new regulations as to the distribution of pig iron and steel products, adopted by the War Industries Board under date of June 6, they feel fairly familiar with the general bearing of the regulations.

One very interesting point seems clear in the minds of most steel producers, to the effect that the distribution of any surplus material that may develop after the preference list (the recognized "more essential" classes of commercial consumption) has been taken care of, cannot occur at present, or until the War Industries Board issues its promised revised list of the preference purposes. The list embodied in the resolutions of June 6 is an old list, compiled without particular reference to iron and steel. When that list is promulgated the distribution of surplus steel can occur, but only upon written consent of the Director of Steel Supply.

A Queer Point

The tying up of surplus steel goes farther than the actual shipment; it appears to relate to the finishing of steel that may have been produced. The regulations refer not merely to material existing, but also to the use of "manufacturing facilities." Therefore leading steel producers make this interpretation, that if in the filling of a Government order they chance to produce an "off" heat of steel, which cannot be used for the order, they must hold the heat in ingot form until instructed by Washington what finished forms to roll it into. Obviously such a thing cannot be carried far, in point of time, as ingots cannot be stored to any great extent, and also it is expensive to let them cool and heat them later for rolling.

Not Enough Yet

The authorities at Washington continue to insist that there will not be nearly enough steel, at least for months to come. Many steel producers adhere to their view formed long ago that the war industries cannot possibly consume all the steel, and that there must be a surplus eventually. Of course they merely hold the opinion and cannot allow it to modify their conduct, and thus they are merely carrying out the regulations. Some of them have the thought, however, that the intensive shipping of steel against the war activities will in its own due time bring the surplus to light, in the form of some of the war industries finding them well stocked with steel and expressing a willingness to have shipments to them curtailed. Meanwhile the producers have nothing to do but "play the game."

Pig Iron Supplies

From the current trends it would appear that even if some steel products should eventually become more plentiful, and no one can say that the balance of probability is really in that direction, it would not follow that pig iron would become more plentiful, for the iron foundry, for instance, not engaged in war work. The best estimates that can be made of capacity are that there is 43,000,000 tons of pig iron capacity and 47,000,000 tons of steel ingot capacity. While steel is made from pig iron, in general, there is normally much scrap used, and that scrap is scarcer than usual, hence it takes a larger proportion than usual of the pig iron to keep the steel works running, and the steel works are going at a less proportion of their capacity than are the blast furnaces. There is practically no new construction except in connection with the war, and that means that old bridges and buildings are not being torn down. The railroads are doing but little in rail

Continued on page 62.

replacements, and they are wrecking very few cars and locomotives, and thus the railroad scrap lists are small. The Pennsylvania Railroad (east of Pittsburgh) is running only about 10,000 tons of scrap a month. Then, too, a great deal of steel is going abroad, to be fabricated there, and the scrap resulting does not come out here.

Steel Production

The statistics of steel ingot production in May are somewhat disappointing. Pig iron production, as noted in last report, was at the rate of 40,400,000 tons a year in April and at the rate of 40,900,000 tons a year in May. There was an increase, even though it was not as great an increase as had been expected. Now the steel ingot figures appear, showing that while the rate in April was about 42,650,000 tons a year, the rate in May actually dropped to about 42,300,000 tons a year. The production of finished rolled steel runs about 75 per cent. of the ingot production, the difference being scrap, mill scale, etc., so that finished rolled steel was produced in May at the rate of about 31,600,000 gross tons a year, or about 3,000,000 net tons a month.

War Requirements

At the Institute meeting May 31, J. Leonard Replogle, Director of Steel Supply, stated that the unfilled war orders on the books of steel producers, plus orders he had practically ready for placing, amounted to 16,800,000 net tons. Since then news has come out of additional requirements, for early placing, involving some 3,000,000 tons more, and making 20,000,000 tons in all.

The vital question, of course, is the rate per month at which this steel will be required. If the Government were simply buying farther ahead, as its plans are developed, the mere increase in total tonnage would mean nothing. That the trade at large has no definite idea is quite certain, and one can go farther than that, and observe that there is a hint that the highest authorities as yet know very little. This hint is contained in a paragraph in the War Industries Board's resolutions of June 6, in which distribution of pig iron and steel products to the preference list was decreed. It will be recalled that on May 17 a committee was formed, of a few members of the War Industries Board and a larger number of men, leading representatives of the iron and steel industry, to determine, among other things, this very question, the prospective rate at which steel could be furnished and the prospective rate at which it would be required. In the resolution of June 6, however, the committee is given instructions as if it had not reported any very definite findings as yet, and it is asked to recommend, if possible, ways by which steel supply can be increased.

There is no definite hint as to what the War Industries Board will do in the matter of iron and steel prices, a subject it must decide by the end of next week, as the present set prices run only through June 30. There is a strong presumption that reductions, and perhaps considerable reductions, will be desired, particularly as the Government is taking such a large proportion of the output that taxing excess profits is not enough to equalize. On the other hand there are arguments as to increased costs, and indeed a great increase since the original price basis was decided upon, September 21, 1917, and there is also the argument that the last ton of steel possible is desired, and even if the best positioned producers do make large profits the poorly positioned producers are also needed, when six months ago it did not appear that the war needed them. The familiar argument in some quarters then was that if 75 per cent. of the iron and steel industry was given a profit, its output would be amply sufficient to conduct the war work in all its phases. That is no longer the case, for the consumption that does not help directly or indirectly to win the war has become relatively small.

The Robert Simpson Company, Limited, Toronto, the second largest department store in the Dominion, has established a bicycle sales department. The company has already had several displays of wheels in its windows.

WEEKLY PAINT DEPARTMENT

Paint Trade and Brush Trade Linked Up

Customers Should be Reminded That They Need a Brush—Often They Overlook This Item Until They Come to Paint—Good Arrangement of Paint Stocks Obviates Possibility of Selling Wrong Article

PAINT sales and brush sales are linked together in an indissoluble tie. Where one goes the other should go. Many a customer will thank the dealer for suggesting that he needs a brush, for it often happens that the customer will not think of the brush until he comes to apply the paint. Suggestion that a brush is needed invariably strikes the purchaser with the idea that the dealer knows what is what. For he knows how to anticipate his needs in the matter of a brush. Such anticipation of his needs will often save the customer another trip to the store and forestall the possibility of his attempting to put the paint on with the stub of an old brush that is bound to spoil the job.

A well organized paint department will have the brushes in prominent display places. One aggressive hardware dealer has his stock of brushes arranged in drawers immediately below the paint stock, which is on shelves well up toward the front part of the store. Each one of those drawers is labeled with the kind of brush and the price at which they sell. In the centre of the paint display is the display of the various kinds of brushes, neatly arranged in a wall panel behind a sheet of glass. This display of brushes is always in view and the customer can hardly escape seeing them. To see them is to be reminded, perhaps, that he needs a brush. With the brush stock kept in drawers the chance of their becoming dust-covered is removed. They always look fresh and clean when shown to the customer.

ARRANGEMENT OF PAINT STOCK

The well arranged paint stock will be arranged in groups or in sections. Thus the oil stain will not be mixed with the stock of varnish stain, or the wood enamels mixed with the stock of iron enamels. Each will have its particular place and will always be kept in that particular spot. This arrangement does away with the possibility of error in handling goods. When they are placed side by side it is very easy for a clerk unthinkingly to pick up the wrong article. When the error is discovered the customer may have the article at home or even may have the application made. These are all factors which eventually help or mar trade.

The arrangement of the surplus stocks of paints is also another important point in the selling of paint. One successful dealer has his stock of extra paints arranged in the basement in exactly the same positions in which they are located in the paint display in the store. When a line runs down it is an easy matter to make a trip to the basement to replenish the supply. He can almost replenish his stock in the dark, so systematically is his stock arranged in this respect. This saves time—and time is an important factor in these days when there is a shortage of help in almost every hardware store.

KEEPING RECORD OF STOCK

The paint department can be conducted on a good business system or it can be allowed to run itself. When it is allowed to run itself it usually runs amuck. If it does not run amuck it runs to the minimum of sales. One of the points that greatly assists in keeping the stock in a well-ordered and systematic manner is a record book for stocks that are running low. One prosperous paint dealer keeps an order book always handy on the shelf ledge of the paint department.

As soon as any line gets down to a certain minimum, perhaps half a dozen cans, note is made that the stock is running low. When the representative of the manufacturer calls it is easy for him to tell at a glance the lines that he requires. If the paint traveler does not call in time before the order should be placed it is in a handy way to pass on to the manufacturer through the mail.

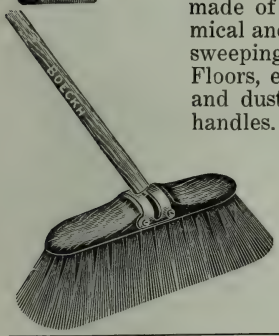
The dealer who never has to tell his customers that he is out of a particular line stands a very good chance of keeping their trade permanently. For they will not have occasion to try elsewhere in order to get a line that they may urgently need at the time he happens to be low on that line.

The Merits of Boeckh Brushes
always appeal to the Buying Public

The Buying Public always shows confidence in Boeckh Brushes by buying them.

Boeckh's Paint and Varnish Brushes have selected bristles of unusual elasticity and resiliency that are held firmly and can't come out, and the user is assured of a good-wearing, satisfactory job.

The "CLEAN SWEEP" with "Screw Lock" Handles made of selected Grey Fibre, is a sanitary, economical and serviceable broom. Specially adapted for sweeping Carpets, Linoleums, Oil Cloths, Hardwood Floors, etc. Gathers forward every particle of dirt and dust. Buffed blocks, adjustable "screw lock" handles. Sizes 10, 12 and 14 inches.



The merits of these brushes are sure to appeal to the Buying Public.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 20.—The feature of the markets this week is that of the very strong place turpentine continues to occupy. The demand altogether exceeds the supply, and it is impossible to figure out when there will be more available in anything like adequate amount. Linseed oil is obtainable now in better supply, but still there is no surplus. There was an advance of 50c per 100 pounds in the price of white lead in oil, and this follows the position attained by pig lead, and is in accord with the tendencies already outlined in HARDWARE AND METAL. Putty is very firm; so is shellac, and advances have been made recently by several makers in the latter product. Trading conditions have continued favorable, and the season has been longer than usual this year.

Shellacs Very Firm With Upward Tendency

Montreal.

SHELLACS.—Firming tendencies are still threatening in the shellac markets, and advances have been made by various paint makers. There is probability that prices will be very fully maintained all around, and further revisions would not be surprising. There is a fair demand and some request again for munition purposes will tend to make the activity greater in the near future.

No Trouble to Get $1 for Available Turpentine

Montreal.

TURPENTINE.—It is very little trouble to sell turpentine if one has it to offer these days. The fact is that there is none to speak of in sight. Some have secured quantities of wood turpentine, and for most purposes this is all right, it being of a darker shade and of less refined nature than the grade known as pure. At this writing it is not clear what the trade may expect, for the situation in the South seems to be more or less beclouded, and what supplies can be counted upon for the next few weeks is very uncertain indeed. The trade hopefully expects improvement, and if the regulations to be made regarding naval stores are more stringent than at present it is at least hoped that turpentine will be still available. Some have asked and readily received as much as $1 per gallon, but even at this there is little to be had.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	....
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

Linseed Oil Resting Easier, But is Steady

Montreal.

LINSEED OIL.—There is this to say, which will be encouraging to the trade, that there is more oil to take care of orders that have been waiting the ability of the paint men to fill. The situation is better, although there is really no surplus here. Steady crushing has been permissible with some because of the receipt of seed from the West. As pointed out before the supply of seed has not been such as to promise an easing of the price for oil. The slight reductions made by some, as before pointed out, were in accordance with the usual procedure each season after the peak of the early trading was passed.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 4 barrels	$1 79-$1 86	$1 81½-$1 88½
5 to 9 bbls.	- 1 78	- 1 80½
10 to 25 bbls.	- 1 77	- 1.79½

Putty Very Firm But is Unchanged

Montreal.

PUTTY.—The putty market is a strong one, but there is still evidence that the present basis will not continue, and that an advance may shortly be made. The strength of the oil market and the scarcity of whitings may provide for an advance in the near future. In the meantime quantities are selling as follows:

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.70

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

Fifty Cent Advance in White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The strong position of the pig lead market is responsible this week for an advance of 50c per 100 pounds in the price of white lead in oil. Even at this it rules strong, and the combined high price of linseed oil has had some bearing in this advance. Business is just fair, and sales are made on the following basis:—Five-ton lots, $16 per 100 pounds; ton lots, $16.50, and smaller lots, $16.85. The usual differences apply for the special brands of the different makers.

Mixed Paint Firm; Sales are Made

Montreal.

MIXED PAINT.—The position of mixed paint is quite unchanged, and there is very fair business still. In common with some other lines there is a noticeable falling off, although business has kept moving better the present season than it did a year ago. This is accounted for to a certain extent because of the shortage in the early part of the season of basic materials. Manufacture was thus held back for a few weeks, and the distribution of orders was consequently spread over a longer period. Prices are very firm on all lines.

TORONTO

TORONTO, June 20.—Turpentine has furnished the feature of the markets during the week in an advance of 10c per gallon over previous quotations. White lead in oil is also higher in price. The advance amounting to 50c per 100 pounds. This is said to be due to the increasing strength of the lead market noticeable during the past three or four weeks. Colors in oil and some dry colors are also quoted higher. Business continues splendid, and from all sources a satisfactory volume of trading is reported.

Linseed Oil Follows Unchanged Course

Toronto.

LINSEED OIL.—There is nothing new to report in the situation during the week. The market is holding firm and the seed market shows little variation during the past few days. Supplies of seed are not coming through to provide for an accumulation of stocks but the trade generally is being taken care of quite satisfactorily. Prices on oil show no variation, raw in 1 to 2 bbl. lots selling at from $1.86 to $1.90 per gallon with the usual differentials for boiled. Trading is fair though not heavy to retail sources.

	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 bbls.	$1.86-$1.90	$1.88½-$1.93
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

The Paint That Is Guaranteed

The familiar "3-can display" of B-H "English" Paint this Spring, as usual, dominated the boards in every poster town in Canada. In all our newspaper and farm paper ads—and we carried on a campaign in every local paper where we had an agent—the reader's attention was directed to this sign, which has become the trade-mark of B-H products, and is known from coast to coast.

The big feature about B-H "English" Paint is the guarantee that goes on every can over our President's signature.

B-H "ENGLISH" PAINT

70% Pure White Lead (Brandram's Genuine B.B.)
30% Pure White Zinc
100% Pure Paint

High in price as white lead has become, we cannot afford to use less of it, for if we did, it would necessitate the removal of the guarantee from our cans, and to do that, would injure the reputation these paints have acquired by reason of their superior ingredients. It is by using Brandram's Genuine B.B. White Lead and Pure White Zinc in such liberal quantities that we have been able to produce a paint that truly excels in covering capacity—and stands the severe climate test of Canada in a way that spells true economy for all who use it.

Ask for particulars of our Agency proposition.

Turpentine Makes Jump 10c Gallon

Toronto.

TURPENTINE.—Furnishing a feature every week seems to be the role of turpentine, and an extra thrill is supplied this week in a jump of 10c per gallon, the biggest weekly advance to be recorded for a long period. The question of transportation grows increasingly difficult and consequently supplies are being nursed along as carefully as possible to provide as wide a distribution as can be secured. Shipments by all-rail route are slow in coming through and shippers are not allowed to state when boats are leaving, so distributors locally are completely in the dark as to when goods in transit may reach destination. Stocks at the present time are only fair and are growing lighter.

	Imp. Gal.
1 barrel	$0 88-$0 95
2 to 4 barrels	....
5 gallon lots	1 05

White Lead in Oil Goes up 50 Cents

Toronto.

WHITE LEAD IN OIL.—Interest in this market centres in an advance of 50c per 100 pounds in practically the entire list. The metal market on lead has shown greatly increasing strength under the influence of heavy demand during the past three or four weeks and is the main element in this advance on white lead in oil. The continued high market in oil is also a contributing factor and new prices it is indicated are warranted by conditions. The demand shows no improvement but a fair amount of trading is being done. Pure, in ton lots, is now selling at $16.75 per 100 pounds, with smaller quantities quoted at $17.10. Some brands carry a slightly different range of prices as will be noted in current market quotations.

Mixed Paints Selling Freely; Very Firm

Toronto.

MIXED PAINTS.—A splendid sorting business on mixed paints is reported from practically all sources, retailers indicating sales as very heavy and this is reflected in movement from manufacturers' and jobbers' warehouses. Prices have been firmly maintained at figures shown in current market quotations.

Glass is Unchanged; Putty Very Steady

Toronto.

GLASS, PUTTY.—Glass business is within rather narrow channels at the present time, the demand being easily taken care of by dealers. Prices shown in current market quotations are fully maintained. There is a comparatively small amount of trading being done in putty and no item of particular interest attaches to this market. Prices are firm and unchanged as follows: Standard bulk in casks, $4.60; 100-lb. drums, $5.35-$5.45; bladders in barrels, $5.50-$5.70 per 100 lbs. Pure putty takes an advance over standard of $2.00 per 100 lbs.

Colors in Oil Advance; Light Stocks Paris Green

Toronto.

COLORS IN OIL, PARIS GREEN.—A revised list of prices, applying to practically the entire range of colors in oil, has become effective and represent substantial advances all the way through. Some lines of dry colors have also been revised. New prices will be found in current market quotations. Distributors of Paris green intimate that stocks are none too heavy. Booked orders have been taken care of but a heavy sorting demand during the next month would soon absorb present supplies. Prices are firm at figures shown in current market quotations.

Trade Inquiries

224. **Paints and Varnishes, Fencing and Baling Wire, Wire Netting, Iron and Steel Goods, Hardware, Lanterns, Cutlery, Enamelware, Shovels, Tools of all Kinds, Furniture, Fodostuffs, and Grocery Proprietary Lines.**—A South African wholesale firm requests catalogues and price lists, also samples when possible, of the above lines. These are mentioned in a special way, but they are interested in any line of goods suitable for the wholesale jobbing trade. The furniture must be of a kind which can be shipped in a knocked-down condition.

226. **Hardware.**—A Pretoria firm of wholesale importers requests catalogues, price lists, and samples when possible of any Canadian line of hardware, household, building or mining, also household utensils, wire (barbed and plain), and wire netting.

228. **Wire.**—An Orange Free State firm of wholesalers requests samples and prices of barbed and plain wire, galvanized and plain finish, also mosquito nettings.

229. **Agricultural and Dairy Machinery and Implements.**—A South African dairy specializing in agricultural and dairy requirements, requests correspondence, catalogues and price lists from Canadian manufacturers of cultivators, ploughs, harrows, seed drills, chaff cutters, grinding mills, harvesting machinery, cream separators, churns, milk cans, piping and fittings, pumps, foot valves, and strainers, sluice valves, rods, cylinders, and other farm machinery and implements.

231. **Hardware, Washing Machines, etc.**—An Orange Free State wholesale firm requests catalogues and price lists from Canadian manufacturers of hardware of all kinds, also from manufacturers of stoves, axes, shovels, washing machines, and household utensils.

234. **Hardware and Household Utensils.**—A Johannesburg commission agent, with branch offices in the principal centers, is prepared to take up Canadian agencies on hardware of all kinds and household utensils of every description.

236. **Electric Household Utensils.** — An Orange Free State firm, specializing in electric goods, requests catalogues and price lists from Canadian manufacturers of electric stoves, heaters, irons, toasters, and others electrical material.

238. **Tools.**—A Johannesburg commission agent, with long experience in carpenters' tools, is prepared to take up the representation of a Canadian range of these lines. Catalogues and price lists are requested in the first correspondence.

239. **Locks.**—A Johannesburg commission agent specializing in hardware seeks the representation of Canadian-made locks and other door and window metal furniture.

347. **Iron and steel, agricultural implements, typewriters, sewing machines, paper, chemical products, nickel, copper, silver, wood for construction, railway material, oil, benzine, skins and furs**—A French mercantile firm, with branches in France, Switzerland and Belgium, the head of the firm now being in the French army, wishes to arrange with Canadian manufacturers and exporters for a general agency in France, Switzerland and Belgium after the war. A member of the firm is willing to visit Canada with a view to arranging special agencies. The firm has in its organization departments for handling the above and would like to arrange for the exclusive representation of Canadian manufacturers.

349. **Hardware, iron and steel goods, barbed and plain wire, enamelware, lanterns and tools of all kinds.**—A Durban, Natal, firm of commission agents is prepared to accept agencies on commission basis only from Canadian manufacturers of the above.

351. **Catalogues.**—A wholesale hardware firm in Port Elizabeth requests catalogues and price lists from Canadian manufacturers of builders' and household hardware, spades, shovels, pick-axes, tools of all kinds, brushware, paints and varnishes, lanterns, cutlery, household utensils, stoves, iron and steel bars and rods, spring steel and iron, enamelware, woodenware, handles, step-ladders and other lines suitable for the wholesale trade.

356. **Belting.**—A South African firm, making a specialty of engineering goods, is prepared to take up the representation of Canadian-made balata and leather belting.

361. **Shovels and pick-axes.**—A South African engineering firm is prepared to take up the representation for South Africa, or purchase outright for Natal, coal shovels, square-mouth, and pick-axes. Immediate correspondence requested.

362. **Copper wire.**—A South African engineering firm requests samples and prices in sizes 8, 10, 12, 14 and 16, of hard-drawn copper wire.

363. **Incandescent lamps.**—A South African firm specializing in electrical material will purchase or act as agents for Canadian manufacturers of incandescent lamps, 100, 110 and 200 volts and bayonet caps, candle-power 16, 25, 32, 100, 200 and 400.

364. **Electrical material.**—A Durban firm of engineers, specializing in electrical goods, requests correspondence from Canadian manufacturers of electrical fittings and materials.

367. **Hardware, etc.**—A South African wholesale firm, making a specialty of hardware and kindred lines, asks for price lists, catalogues and when possible samples, from Canadian manufacturers.

369. **Catalogues.**—A Port Elizabeth firm of wholesale importers in hardware and kindred lines, asks for catalogues and price lists from Canadian manufacturers of hardware of all kinds, tools of all kinds, lanterns, enamelware, fencing and baling wire, wire netting, household utensils, stoves, shovels, pick-axes, bar iron and steel, paints and varnishes, piping and brushware.

372. **Iron and steel products.**—A Johannesburg wholesale firm requests catalogues and price lists from Canadian manufacturers and shippers of iron and steel forges, wire nails, plates and angles, bolts and nuts, bar iron, piping, pipe fittings, boiler tubing, wire, dog spikes, shafting, spanners, rotary pumps, drilling machines, mining tools, mining material, shovels, handles, brass and copper sheets and rods and machinery in general.

373. **Catalogues.**—A Pretoria wholesale firm requests catalogues and price lists from Canadian manufacturers of hardware, brushware, dairy machinery and implements, furniture (k.d.s.), woodenware, tools, handles, cart and carriage material, washing machines, wire of all kinds, samples and price lists of wrapping paper and paper bags.

Drastic Moves to Keep Money in Canada

More drastic embargo measures are on the way at Ottawa, for as THE FINANCIAL POST says in a strong front page article this week:

"It is not believed that the present List under Embargo will be sufficient to right the Exchange situation."

Highly important economic points affecting the actual business in which you personally may be engaged in Canada to-day are discussed thoroughly in this leading article. Secure a copy of THE POST, and at the same time make the acquaintance of a business newspaper in which you will find real enjoyment, and many a pointer to practical advantage. Just run over this list of contents of the June 15th issue of THE POST:

Canada and U.S. Crop Outlook is Unprecedented.

Australia Open to Canadian Newsprint Mills.

Broad Spirit at Canadian Manufacturers' Convention.

Canada Badly Needs an Institute of Research.

Regulation of Salmon Profits Now Proposed.

Profits of Banks Show Advance for Past Year.

Elaborate Plans for Rebuilding Halifax Homes.

How Embargoes Will Affect Our Imports.

Extensive Use of Trade Paper in This Country.

Fire Safety Starts at Home.

Conserving Natural Gas Will Affect Our Industries.

Saskatchewan Got Good Price For Its Big Issue.

Edmonton Has Scheme to Save Tax Delinquents.

Saskatchewan Municipalities are Prosperous.

Recommend That Government Develop Lignite.

Tariff Protection Necessary For Prosperity.

The last mentioned article is a verbatim report of the important address of S. Parsons, retiring President of the C.M.A., and embodies immensely important Canadian business matters. Many other articles in this number of THE POST are reported from the C.M.A. Convention at Montreal. Send for a sample copy of THE POST right now, and you will realize that as a Canadian Businessman's newspaper THE FINANCIAL POST is thoroughly fit and efficient to help your purposeful progress.

The MacLean Publishing Co.,
153 University Ave., Toronto.

Send me THE FINANCIAL POST each week till further ordered. I will send subscription price ($3.00 per year, or $1.00 for four months' trial subscription) on receipt of bill.

Reasons Why You Can Place Your Orders for Babbitt Metals With Us

1. We are the largest manufacturers of Babbitt Metal in the Dominion of Canada.
2. All our Babbitt Metals are made under the supervision of a skilled metallurgist.
3. Our facilities for manufacturing are superior to any other firm in the Dominion.
4. We can buy larger quantities of raw material than any other firm and can therefore give favorable quotations.
5. All raw material is tested for purity before being used. Anything not coming up to our high standard is rejected.
6. When satisfied that our raw material is right we melt thirty-five tons of metal at once, thus making thirty-five tons of any one grade at one heat. During the process of melting many tests are taken and checked up in our laboratory to absolutely guarantee a uniform alloy. After the alloy is satisfactory, the metal is poured, but before being passed as perfect the Babbitt Metal is tested on a friction testing machine and must stand up to severe tests before being passed as O.K.
7. Our Babbitt Metals are lower in specific gravity than most all other metals of similar grades. Our Imperial Genuine is the highest grade of Babbitt Metal manufactured and is lower in specific gravity than any other genuine babbit manufactured. It contains no lead.
8. We manufacture for some of the largest and most discriminating users of Babbitt Metals in the Dominion.
9. We guarantee our Babbit Metals to give excellent service.
10. We can deliver promptly from stock and guarantee a uniform alloy.
11. Our prices are as low as is consistent with the high quality.
12. Dependability is our motto.

We Manufacture All Grades of Babbitt Metals. Write for Complete List.

—the hall-mark of quality in paints, varnishes, enamels, stains and finishing material

Canada's emblem—the *Maple Leaf*, never stood higher in the estimation of the Empire than it does to-day. Never before has our trade emblem stood for more than it does to-day.

It is the identification mark, the trade-mark, of Canada's tried and proven quality paints and varnishes, etc. It stands between you and your customers as a guarantee which means absolute mutual satisfaction.

MAPLE LEAF PRODUCTS "make good because they're made good."

(Continued on second page.)

Stephens' will dominate a successful Paint season

To-day in the West Stephens House Paint is the popular Paint.

Its covering capacity and reliability has caught the confidence of the Westerner and——it sells.

It sells WELL because, as dealers say, it is undoubtedly the best all-round Paint for every purpose.

It suits the needs of the West

Dealers in the West who are not now Stephens' representatives should write for a proposition that exactly suits them; because it means money to them.

Tear this page out now and write.

A Steady Flow of Re-orders For *You*—

The Meakins line has just the right flexibility for easy manipulation—and there are no filling bristles to agitate the user. No dissatisfaction follows in the wake of Meakins sales—to spoil repeat orders as well as business in other lines later.

Meakins quality **assures** your customer an extra measure of ideal brush service—and it means a steady flow of re-orders for you.

Our catalogue shows a very extensive line.

Write for it—pick out the lines you want—then order from your jobber.

Meakins & Sons, Limited

HAMILTON, ONTARIO

Warehouses: WINNIPEG, TORONTO, LONDON, MONTREAL

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware and Metal.

Men who are capable of managing a retail hardware business are not easy to find. The position requires a high type of ability. Above all, it requires a man who recognizes opportunities and who knows how to make the most of them. That type of man in the hardware business is almost invariably a reader of HARDWARE AND METAL. There were fifteen replies to the advertisement shown here. It was a point in favor of all the applicants that they were in the habit of reading HARDWARE AND METAL.

What's Wanted

Almost every week you want something which you could quite easily secure by consulting with your fellow Grocers.

Perhaps you need a clerk. The best of them read Canadian Grocer and watch the "Wanted" page for new opportunities.

Possibly you want to buy or sell a grocery business. Canadian Grocer's subscribers are the best prospects in Canada. Talk to them through our columns with a want ad.

Or do you want to sell or exchange some surplus stock? Here again the Want Advertisement can help you.

Cost: 2 cents per word for first insertion; 1 cent per word for subsequent insertions of the same ad. Box Number 5 cents extra.

The New Metal Worker Pattern Book

This is the most elaborate and complete work that has ever been brought out for the use of sheet metal pattern cutters. It is printed from new type with a new and improved arrangement, especially convenient for reference and study. Parts of a former edition, entitled The Metal Worker Pattern Book, which have been utilized in its preparation, have been re-written and simplified and later methods embodied. 218 problems are now given, 75 of which are entirely new. A Treatise on Pattern Cutting as applied to all Branches of Sheet Metal Work. By George W. Kittredge. 430 Pages; 744 illustrations; Size, 10 x 13 inches. Cloth bound, Price, $5.00. Sent postpaid only on receipt of price.

BLACK FENDER ENAMEL No. 1

"the varnish that lasts longest"

Is a BLACK COLOR VARNISH designed for use as a finishing coat on Fenders, Bodies or Hoods of Automobiles.

It is a very strong **"BLACK"** black in color.

It will stand the HEAT and last as long as you care it to last.

Makes a BLACK spot on all other Black Enamels.

A coat of DOUGALL SEALING PRIMER BLACK and a coat of BLACK FENDER ENAMEL No. 1 give a remarkable finish.

Write to-day for our literature and proposition.

Every Motorist Knows Polarine From Its Advertising

POLARINE advertising is appearing now in scores of newspapers, magazines, motor magazines and farm papers, educating the motoring public to its qualities as an automobile oil. Polarine already lubricates a majority of Canada's 200,000 automobiles.

This great demand for Polarine is your opportunity. You can make 33 1-3 per cent. profit, and more according to the quantity you buy, on all your sales—and you will find this oil a rapid seller.

Polarine Motor Oil in your store will bring you the patronage of the automobile owners of your community. This is the trade you want. They're liberal buyers of other things that you sell—supplies for their garages and their homes. You can attract automobile owners to your store and satisfy them by carrying the most reliable motor oil on the market—Polarine.

It comes in two grades—Polarine and Polarine Heavy; put up in barrels, half barrels, 1 and 4 gallon sealed cans, a special half gallon size for the Ford car, and 12½ gallon steel kegs equipped with a reversible faucet.

Write us at Imperial Oil Bldg., 56 Church St., Toronto, for further information on our dealers' proposition and for a copy of the new booklet on Polarine for Automobile Lubrication.

This Gasoline Curb Pump Attracts Business Day and Night

THERE'S a pulling power about this handsome Gilbert & Barker T-208 curb pump that will show you increased trade. Its appearance attracts by day; its illuminating sign directs the motorists to your place at night.

The T-208 pumps the gasoline from the tank, filters it, and measures it accurately in Imperial gallons, half-gallons, quarts or pints; counting each gallon as delivered into the automobile tank. A meter records all the gasoline pumped up to 100,000 gallons and then repeats.

Discharge is made through an 8-foot length of ¾-inch metallic hose. A hose-draining device completely drains the hose after each operation and a hose hook securely holds the nozzle in place when not in use.

A tumbler lock securely fastens either or both of the heavy, unbreakable pressed steel doors. This pump is strongly built to resist wear and weather and is handsomely finished in red enamel baked on.

Write for our catalogue of gasoline and oil storage equipment for progressive dealers. Full information can be secured from Imperial Oil Limited.

Mr. Dealer: Sell This Fence

Establish a trade that will stay with you and at the same time will show a substantial growth. Compare this strong, rustless, unyielding fence alongside flimsy netting, and every poultry raiser will flock to your store. Note the close spaces at bottom that turns the small chicks and keeps out intruders.

SEND FOR LITERATURE

Get our catalogue of fencing for all purposes. Every foot of it guaranteed. Write today for agency in open territory. Our fence in every instance backs up our advertising.

Salesmen Wanted

Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

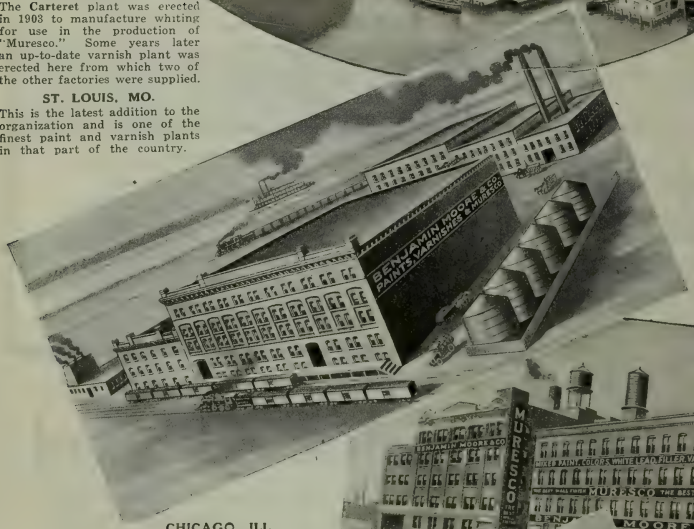
CARTERET, N.J.
The Carteret plant was erected in 1903 to manufacture whiting for use in the production of "Muresco." Some years later an up-to-date varnish plant was erected here from which two of the other factories were supplied.

ST. LOUIS, MO.
This is the latest addition to the organization and is one of the finest paint and varnish plants in that part of the country.



Showing the Growth of "A FAIR DEAL FOR EVERYONE"

CHICAGO, ILL.
This plant was established in 1897 for the manufacture and sale of "Muresco" and the Benjamin Moore & Co. products. It has been enlarged several times.

CLEVELAND, OHIO
Established in 1904—one of the later additions to Benjamin Moore Co.'s chain of plants located in the U.S. and Canada.

Four of the six busy Moore plants.

Has never known a depression in 32 years

(Established 1883)

BROOKLIN, N.Y.
The Brooklyn business had its inception in 1883 in a little plant 40 x 50 feet, but has since grown to proportions making the present immense plant necessary. This is the home of Benjamin Moore & Co.

TORONTO, CAN.
This is the Canadian home of Benjamin Moore & Co., established in 1906, where a steadily growing business in "Muresco" and Moore's House Colors has been conducted.

This plant has been enlarged three times in the twelve years to take care of the growing business.

FOR thirty-two years the business of Benjamin Moore & Co. has gone steadily ahead, despite the fact that there have been three distinct severe trade depressions in Canada.

There is always a reason for everything, and the reason for this record is the solidity of the foundation on which this business is built—the policy of the firm.

The Benjamin Moore & Co.'s business has been conducted along the following lines:

"A fair deal for everyone."
"The giving of value received."
"A recognition of the value of truth in the representation of our products and an effort at all times to keep the standard of our goods up to the highest possible mark."
Our leading products are:

Moore's House Colors, Moore's Floor Paint. Mooramel—the excelling and enduring enamel.

Sani-Flat—the ideal flat oil paint. Moore's Perfectly Pure Oil Colors.
Muresco—the best wall finish made. "4 T 5" Varnishes.
Also Japans, Japan Colors, Carriage and Auto Paints, Cement Coating, Enamels, Stains, Fillers, etc.

Half-Holiday Guide for Travellers

HARDWARE AND METAL has prepared in the form of a 12-page booklet, a list of approximately 250 towns and cities in Canada, giving details regarding early closing and weekly half-holidays.

These will be supplied free to manufacturers, wholesalers or travellers. This guide has been prepared for the convenience of travellers, and its use will assist travellers to arrange their trips in such a manner that loss of time will be eliminated to a great extent.

Send for your supply of copies now. HARDWARE AND METAL is always glad to co-operate with travelling salesmen, and judging by experience gained in previous years, the 1918 booklet will be found of even greater value than those issued in past years.

"NOT A FIRE MENACE"

The Matches with no "after glow"

When she asks for Matches hand her

EDDY'S "SILENT 500"s

THE SAFEST MATCHES IN THE WORLD

The humble match, by reason of the high tax recently imposed upon it by the Dominion Government, can no longer be looked upon as belonging with the smaller articles. Its added dignity makes it even more a matter of business for the merchant to give his customers good match value.

It stands to reason that with about a 60-year start the EDDY COMPANY can make better matches than any other firm in Canada—and when you consider that the EDDY COMPANY'S numerous Pulp Industries can take care of all the Spruce, Balsam and other woods, so that only the most carefully selected Pine is used in the Match-making, and that the plant is equipped with the most modern machinery—then you can believe that EDDY'S MATCHES ARE CANADA'S BEST.

Stocking a Good Line of EDDY'S 30 to 40 Match Brands will Prove a Paying Investment

Eddy's Fibreware, Washboards Paper and Paper Bag Products are of the same

Metal and Glass Prices out of reach—Stock Eddy's Indurated Ware

Wash or Baby's Bath Tub
4 sizes

Eddy's Indurated Ware is seamless, cannot fall apart, shrink, or become water-soaked.

Always having been a popular seller, it is the more so just now when war conditions have sent prices of competing lines sky high.

Let us help you make money by featuring Eddy's Fibreware this season.

Barrel Cover
2 sizes

Washboards

Sell this washboard, that is better than zinc, glass or wood. Your customer will show appreciation of your boost long afterwards. It is Indurated Ware, of course.

Other lines of Indurated Ware include butter pails and pails of all kinds, tubs of all kinds, barrel covers, cuspidors, etc. Indurated Ware is wood pulp moulded under enormous hydraulic pressure and baked at extreme heat.

A patent double-dipping process gives the Finish, which makes the Ware of a Glossy Rich Appearance, and renders it impervious to liquids.

Butter Pail for Delivery and Storage Purposes

Write direct or ask the "Eddy" representative for our catalog containing the full line.

If you sell matches, do not forget that the Eddy is the best selling match made.

PARLIAMENT BUILDINGS, OTTAWA

Tenders wanted for "Hardware."

SEALED TENDERS will be received by the undersigned until Noon, July 2, 1918, for the hardware required in the reconstruction of this building.

All Tenders are to be based on the supplying and delivery to the site of all hardware included in the Schedule of Quantities as required and described by the Plans, Specifications and Schedule for Hardware.

The work of this contract shall be proceeded with as indicated in the schedule or as may be directed and in such a manner as to ensure the completion thereof by **June 1, 1919.**

Plans, Specifications, Schedule and any other information required can be obtained at the office of the General Contractors, **P. Lyall & Sons Construction Company, Limited, Ottawa, Ontario.**

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works; for a sum not less than five per cent. (5%) of the amount of the tender, which will be forfeited if the parties tendering decline to enter into a contract when called upon to do so. If the tender is not accepted the cheque will be returned. If the tender is accepted an additional cheque for a sum equivalent to five per cent. (5%) of the amount of the tender must be deposited before the contract is signed. The total security will be forfeited if the contractor fails to complete the work contracted for.

Payments for material will be made monthly.

Samples must be submitted with tender.

The lowest or any tender not necessarily accepted.

Envelopes containing tenders to be marked, **"Tenders for Hardware,"** and addressed to the undersigned.

SUPREME AMONG WASHERS

The "1900" Complete Line Pays You Best

For over twenty years we have been making washing machines **exclusively.** The best types of washers have been developed and patented by us in this time.

Recently we have perfected two new models representing the highest development the Washing Machine has ever attained.

"1900" Cataract Electric Washer

These most modern washers, as well as the other various "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" Dealers as have proven their worth in their different territories.

"1900" Agitator Electric Washer

Is there a live "1900" Dealer in your district? Would you like to know more about the "1900" line?

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

The "1900" Washer Company
357 Yonge Street
TORONTO

Electrical

Did you know that a refilled lamp is filled from the tip and not from the base?

?

Nine out of ten do not know this

It's a pretty safe bet that nine merchants and their clerks out of every ten naturally suppose that when a lamp is refilled the base is removed and the operation performed from there.

This is not the case, however

How it's done

Instead, there is a hole the size of a 5c piece cut from the tip of the bulb, and with the aid of special pliers the old filament is removed, the new inserted and the connections made.

After this operation a glass worker welds a tube to the opening in the bulb—the air is extracted and the bulb is sealed by melting the tube off, leaving the usual small projection at the end.

Thought they were getting big value

Some merchants have been buying lamps at what they considered a big saving, and not knowing how to tell, were deceived into buying refills, which at their best are only short-lived, some lasting only a few hours. The reason of this is the connections cannot be made tight enough to prevent them working loose. This, of course, causes friction and results in them burning out quickly at the points of contact.

They burn out quickly

How to tell

Don't be deceived when offered lamps at a price which looks like a big saving. **Examine the bulb for a slight elevation just around the tip.** In some cases where it is cleverly done it is only apparent to the touch. In other cases you can readily see where the glass has been welded. Be on the safe side and sell only new lamps that are fully guaranteed—lamps that stand the efficiency test. In other words, sell the

WANTED — A HARDWARE CLERK, ONE with seven or eight years' experience preferred. Apply stating experience and salary expected. Box 306, Hardware and Metal.

WANTED — A FOREMAN FOR TIN AND sheet metal shop. One who also understands roofing and accustomed to the handling of men. Apply Wells & Emmerson, Port Arthur, Ontario.

FOR SALE

FOR SALE — GOOD PAYING HARDWARE business in Havelock, Ont., $4,500 stock in good condition. Will sell at sacrifice for quick sale. $3,600 cash. Will rent building reasonably or sell. Apply H. Buchanan, 1150 College Street, Toronto.

AN OLD ESTABLISHED HARDWARE BUSIness in a border town in Eastern Ontario; reason for selling, poor health. Apply N. Willard & Co., Prescott, Ont.

HARDWARE STOCK AND BUSINESS FOR sale in live town of 800. First-class farmers' trade. Hydro just coming in. Apply Box 360, Hardware and Metal.

FOR SALE—BUILDING AND HARDWARE stock in good live Saskatchewan village. Stock on hand about $6,000. Living rooms above. Good opportunity and terms for right man. Box 726, Hardware and Metal.

HARDWARE BUSINESS FOR SALE. STOCK about $25,000; right on the main street; buildings 25 x 120, two-story; owner retiring. Apply P.O. Box 275, Sudbury, Ont.

HARDWARE AND FURNITURE BUSINESS FOR SALE.

ON ACCOUNT OF THE DEATH OF ONE OF the partners the hardware and furniture business formerly carried on under the name of Stewart Bros., Tilbury, Ont., will be sold. Stock in trade about $10,000; fixtures about $1,500; also store 26 feet wide, fronting on Main Street, 85 feet deep, fronting on Young Street; lot 115 feet long, with alley 12 feet wide at the back. Width of lot at the back, 82 feet. The building is a first-class two-storey brick, and the stock in trade is all new within three years. Business has been established thirty years, and has several first class agencies, including McClary's, Martin-Senour, Plymouth Binder Twine, etc. In addition to the lot there is another lot 66 by 120 feet, with weigh scales and coal sheds and stables. In the meantime business is being carried on as a going concern. Terms cash or approved securities. Applications will be received up to July 1st by Mr. Harry Collins, Chatham, Ontario.

MISCELLANEOUS

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

AN EXPERIENCED SALESMAN WOULD LIKE high grade lines for Montreal and Province of Quebec. Replies to Box 400, Hardware and Metal, 128 Bleury St., Montreal.

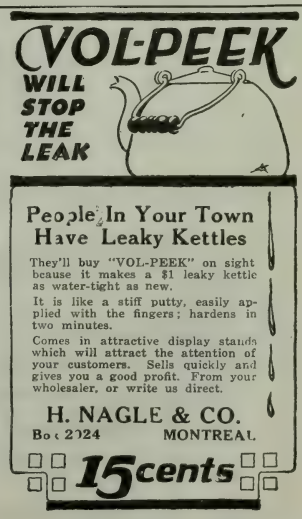
GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

MANUFACTURERS DESIRING REPRESENtation in Montreal and the Province of Quebec are requested to send catalogs and to communicate with Imperial Supply Co., 104 Delorimier Ave., Montreal.



INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

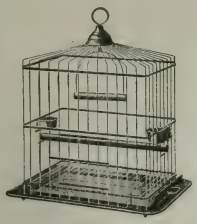
WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.



"HENDRYX"

Parrot Cages

The cage that satisfies both the consumer and dealer at once. The former demands quality, the latter—profits.

The cups are of tinned iron, non-rusting and indestructible.

Order a stock for May and June—the parrot season.

DREADNAUGHT

Steel Hames ***Doubletrees***

Designed and built on scientific principles. The two pieces of selected steel forming the body of Dreadnaught Hames reinforce each other, as do the steel rod and wood of Dreadnaught Doubletrees. They form a perfect Truss—the strongest possible construction. They are mechanically correct. For the heavy pulls and terrific strains of rough spring work they have no equal.

HELP THE FARMERS PLOW DEEP

We need big crops. Equip your farmers with Dreadnaught Hames and Doubletrees so they can do their bit. Write to-day for prices and description of these dependable, profit-making lines.

Ninety Per Cent. of *Garage* wisdom constitutes in being wise in time

Call your builders and motorist customers' attention to the features which recommend the installing of a National No. 806 Garage Door Set.

Clean appearance from the outside — no structural iron work visible, because track and hanger is on the inside —free access to the garage without opening all the doors.

This set opens the doors inwards, preventing any trouble from ice and snow. Its action is easy and certain, without friction or binding. The Hanger operates on a swivel, which permits the wheels to follow the track without sticking. A gentle push opens all doors; a slight pull closes them.

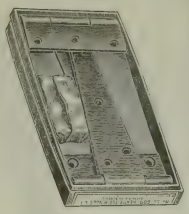
Set No. 806 includes: No. 27 Latch, 1 Swivel Hanger, 6-foot Braced Rail, 4½ pair 4 x 4 inch Jap. No. 505 T.P. Butts, 1 No. 820 Chain Bolt, 1 No. 830 Foot Bolt, 1 No. 5 Pull, 1 No. 30 Safety Hasp (4½-inch) and all necessary bolts and screws.

Get them interested next time they're in your store. They'll be sure to want them.

National Manufacturing Company

STERLING, ILLINOIS

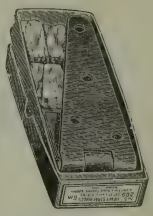
If interested, tear out this page and keep with letters to be answered.



No. S.c. 609

Everybody Likes Strap and Tee Hinges

Packed One Pair in a Box with Screws



No. S.c. 209

Before placing your next order for hinges consider the time wasted loosening bundles, selecting and counting out the screws and wrapping in paper.

Consider the additional customers you can wait on when hinges are already packaged, neatly labelled, ready to hand out.

Consider the advantages of having a clean, attractive stock that can be handled without soiling the hands.

Naturally this time- and labor-saving method appeals to the trade and consumer as is shown from the ever-increasing demand.

In ordering, prefix the letters S.c. to the class number to distinguish from the line of hinges in bulk.

CANADA STEEL GOODS COMPANY, LIMITED

HAMILTON - CANADA

Davidson's Well Known FROST RIVER

Refrigerator shown herewith

Made entirely of Sheet Steel Galvanized

The exterior is Japanned French Grey, beautifully finished with neatly decorated panels and corner scrolls.

The Food Chamber is coated with white enamel, thoroughly hardened and baked on in an oven of high temperature.

All inside parts are removable for cleaning purposes.

The drip pipe for the waste water has been carried outside the body, and does not run through the Food Chamber—as usual in other refrigerators.

Made in three sizes, the largest with double doors.

NOW is the time to get your Orders in for these goods and ensure prompt shipment.

WHAT THE FEATHER DUSTER CANNOT DO

AT best, the ordinary mop and feather duster can only raise the dust to settle elsewhere. An unsanitary method which does little to help the appearance of goods openly exposed on the shelves.

STANDARD Floor Dressing

is different. It **captures** fully 90% of the atmospheric dust and holds it. It is sanitary, non-evaporating, non-gumming. It preserves as well as cleans the surface with which it comes in contact. It is purely mechanical in action.

Properly applied with an ordinary floor sprayer, a single gallon will take care of 500-700 square feet of floor space, and will serve its purpose well for several months without further dressing so long as the surface is regularly swept clean with a hard broom or brush.

Sold in one and four gallon cans and in barrels and half barrels.

GILBERT TOYS

A complete toy department can be stacked with Gilbert Toys. The entire line includes Educational Toys such as Erectors, Electrical Sets, Wireless Outfits, Chemistry, etc. War Toys including Machine Guns, Submarines and Nurses' Outfit. Staple Toys such as Mechanical Wagons, Tumbling Clowns, Motors and many others. There are Gilbert Toys to appeal to boys of every age during the time they are interested in toys. And the range of prices is extensive enough to fit all pocketbooks.

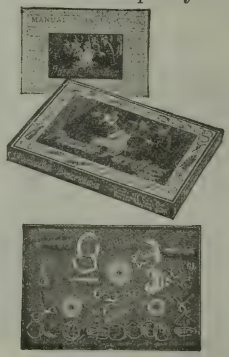
In addition to our big national advertising we are putting Gilbert Toys before the boys in their own magazines. We are keeping them posted on the new ones as they are added to the line and of the improvements made in the older ones. They know Gilbert Toys and they are going to want them this Christmas. Have you placed your order yet?

We'll gladly send catalog or our salesmen upon your request.

MYSTO MAGIC

Dealers who have sold Mysto Magic need not be asked to buy again. They know its sales possibilities. This year the sets have been improved considerably. Smaller sets are packed in the distinctive Gilbert Toy sealed carton, No. 2006 Outfit comes in hardwood cabinet. Order your stock early.

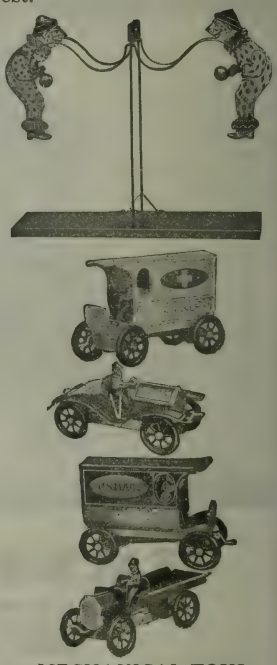
Retails in Canada.....$1.50 to $15.00



PUZZLE PARTIES

Many of our dealer friends write us that Gilbert Puzzle Parties are big sellers to the Red Cross for "our boys" in the service. Thousands of these Gilbert Puzzles are being used by soldiers in hospitals, dugouts, trenches, etc. They make an excellent gift. Are your stocks complete?

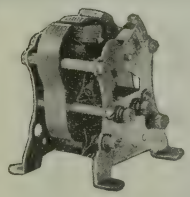
Retails in Canada.....40c to $1.50



MECHANICAL TOYS

This type of standard and well-known toy practically sells itself. No toy department is complete without them. Gilbert Mechanical Toys are sturdily built with strong spring, brightly lithographed in attractive colors. The newest ones, Tumbling Clowns, are unique and will be big sellers. Order yours to-day.

Retails in Canada.....75c to $1.90



TOY MOTORS

Boys know Gilbert Toy Motors. They know they can always depend upon them to do the things claimed for them. Our sales in previous years have proved to us that there is a big demand for them. Each year we add one or two new ones to the line, but you can be sure that each one is built up to the standard of Gilbert quality. Put your order in early to insure good deliveries.

Retails in Canada .....$1.50 to $11.25

Write for new Catalogue of the full line of Gilbert Toys.

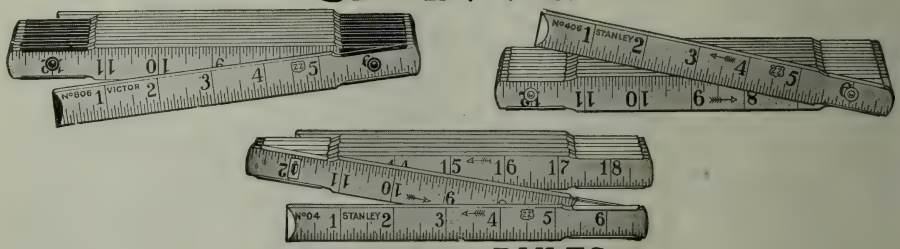
Stanley Tools



"ZIG ZAG" RULES

The term "ZIG ZAG" as applied to folding rules made of flexible wood is a trademark belonging to this Company.

They are made with two distinct types of joints, the Concealed Joint in which there is no hole through the wood, and the Rivet Joint in which the rivet is carried through both wood and joint. Both types contain a stiff spring which holds the rule rigid when open, even in the longest lengths.

Several other patented features add special value to the Stanley and Victor rules.

Made in all standard lengths and finishes. A few leading numbers shown above.

BT

Consider your sales of pump cylinders and leathers

It is an easy matter to make a repair to a BT Pump—to put in a new cylinder or new plunger, gasket or valve leathers. It is such an easy matter, in fact, that an owner of a BT Pump never hesitates to buy a new part when it's needed. He knows he's not confronted with a tiresome, difficult job, and he knows, too, that it'll be satisfactory when completed.

That's why it pays BT Dealers to carry cylinders and leathers. There are not many; our simplified system of Ready-to-Ship Pumps has eliminated all useless and unnecessary parts.

See that your stock is right now.

Displays Developed Accessory Trade

Keys & Co., Hardware Merchants, of Toronto, Are Enthusiastic Over Possibilities of Trade—Kept Goods in View Throughout Year—"Filtered" Gasoline a Drawing Card

Window Display of Keys & Co., Toronto, Showing Attractive Arrangement of Line of Auto Accessories. This firm attributes much of Their Success in Selling Accessories to Displays they have Maintained in Their Window and in the Store Interior.

"IT has been by getting the goods out where the motorist could see them that we have developed our auto accessory department to its present satisfactory basis," stated O. F. Morrison of W. F. Keys & Co., 592 Bloor Street West, Toronto, to HARDWARE AND METAL'S representative recently. "In fact, it has been our experience that to sell goods of any description, the essential thing is to get them out where our customers could see them.

"This is not a new departure in merchandising by any means. We will not lay claim to that. But the fact remains that we have proved how the display helps sales. We now have in mind extensions and alterations which will bear out our attitude in this respect, but of course that is something for the future."

Window Display Attracts

It was an attractive layout of auto accessories in the window which first drew HARDWARE AND METAL'S representative to the Keys store—not the one shown along with this article, but a good one nevertheless. It appeared a couple of months ago when one might say the season was hardly opened. On entering the store the window display was further emphasized by the arrangement of motorists' needs in a show case to the left of the entrance—in full view of every customer who opened the front door.

Getting an Early Start

"Has the sale of auto accessories started already," was the query put to Mr. Morrison. "Indeed, yes, we find the motorist is already getting the fever and

whereas our entire range of supplies has not yet been taken into stock, we want every car owner to know we are on the job and will be ready when he is. It has been our experience that the motorist rarely loses interest in his car, even when it is put away for the winter. And they don't all store their cars by any means. The auto accessory game has developed so rapidly, there are so many new lines constantly being put on the market, that the buying of a car does not satisfy his curiosity. He is just starting to be an enthusiast. Even in the winter, when our sales are confined to a small range of goods, we maintain a display of accessories so that a topic of conversation is always at hand that ultimately brings us results.

Lcation of Store is Satisfactory

The location of the Keys store is within hailing distance almost of a couple of garages, but this is no deterrent in the matter of sales. The question of gasoline sales, in competition with the garage, came up and Mr. Morrison intimated that sales were very satisfactory. For a couple of years, car owners came to the Keys store for gas because it was strained through a chamois before being put into the car. During the last year a filter placed on the measuring pump has served the same purpose and Mr. Morrison indicated that many of his customers bought from them because they wanted "filtered" gasoline. This is only one instance of how customers may be induced to come back. This little point in the handling of gas was a drawing card with many car owners.

Wide Range of Goods Handled

Being located in the city where wholesale stocks can be drawn on easily, Keys & Co. do not carry a heavy stock of accessories but nevertheless they have a wide and well-assorted line. They have made a careful study of the accessory game and any line which may be temporarily out of stock they can procure promptly and with little inconvenience to their customers.

The Interior Arrangement

As mentioned previously, to the left of the store entrance is a showcase in which auto accessories to some extent are featured the year round. However, this case is used for seasonable goods also, baseball supplies, fishing tackle, hunting equipment—whatever the season may be, there is a display of suitable merchandise. But along with all these displays, showing at practically all times, there is space given to the motorists' needs.

How Accessories Have Helped

"It cannot be overlooked for one instant what big possibilities there are in this new field," stated Mr. Morrison most emphatically. "With our building trade suffering to a great extent, we have had to reach out to other lines and no more fertile ground has been broken for the hardware trade than that opened by motor accessories. We started in as a great many dealers must have started—from handling gasoline and oil. The extension of our activities to other lines has been a natural evolution, but we most certainly were hastened in this move by the aggressive campaign by HARDWARE AND METAL. I can say without question that it has been the constant attitude of HARDWARE AND METAL that auto accessories constituted part of the hardwareman's stock which resulted in our adopting this line in its entirety as soon as we did, and we made no mistake. During the past couple of years our sales have shown an almost phenomenal growth in this department and helped out other departments more susceptible to war conditions."

Pushing Other Lines Too

But the other departments are by no means neglected—baseball goods, fishing tackle, housefurnishings, paint and tools are all displayed and moving in very good quantities. Counter cases, open shelving, display tables, and drawers, sampled, are arranged with merchandise in such a way that the goods catch the eye and open the purse.

Paint to the Fore

The paint display is arranged across one corner of the store, the shelving being built to fit the different sized containers and counter display cards, color cards and hangers are used to advantage. Because the paint display is across back of the store and part of one side, counter cards and little assortments are brought to the front counters where the idea of paint cannot be overlooked. The window is used to display paint also and splendid results are obtained in the sale of this useful commodity. Sales this year have been particularly heavy, customers showing a desire to try out the painting game themselves.

Making Use of Tables

The tables, which extend across the centre of the store, are used for different classes of goods as the time of year may dictate. Here the boy may find his roller skates, his hockey skates, his baseball glove or mitt; here the angler may select his rod, reel or landing net; here the lady of the house may find a can opener, soap shaker or many of the little items which cost so little but do so much towards lightening the day's work. In plain sight and constantly working, these are displays which create interest and the actual sale is that much easier.

Has Selected Mailing List

The trade of this store is localized to a great extent, but nevertheless a very nice mailing list has been worked up which this firm uses to send out advertising matter. "We might print hand bills and trust to boys to deliver them," said Mr. Morrison, "but our experience in this respect has not been encouraging, so we have developed what might almost be termed a select list of customers to whom we send advertising through the mails. We find it much more effective and the monthly accounts we render give us an opportunity to include circulars or other matter at no added cost for postage."

Goods Not Hidden in Corners

The Keys store is not an unusual hardware store, but it is a good type. One cannot help being influenced by a store which believes in and practices its belief in displaying its goods, changing the arrangement frequently to freshen up their appearance and make use of the window to catch the eye of the man on the street. Having the goods is quite essential but keeping them out of sight is not the way to inbuence sales and there are no corners hiding seasonable lines in this store. The goods are up and out there, where people can see and be reminded of their needs. It's a good plan, too. The customers appreciate it and will respond. Merchandise stored away in the cellar or under counters collecting dust is eating up the profits. Get it out, keep it moving and the bank balance should show on the right side of the ledger.

Plan Reductions in Heavy Hardware

The jobbers of heavy hardware in the United States have under consideration a plan whereby a number of varieties of re-enforcing bars, pulleys, crowbars, shafting, cast-iron pipe, bolts and nuts and other lines can be eliminated as unnecessary during the period of the war. The War Industries Board of that country has authorized the following statement in connection therewith:

Representatives of heavy hardware and supply jobbers met with the conservation division to discuss the question of cutting out for the period of the war unnecessary sizes and varieties of articles carried by them.

Tentative plans were made for reducing the varieties of re-enforcing bars, pulleys, crowbars, shafting, cast-iron pipe, wrought-iron pipe, davits, bolts and nuts and other materials carried by heavy hardware jobbers.

The trade was requested by the conservation division to draw up a specific programme indicating the varieties and sizes of the different articles through which production can advantageously be confined during the war.

Rubber Goods are Now Restricted

The War Trade Board of the United States has decided that after June 25 no license for the importation of manufactured rubber goods will be issued by that body. All outstanding licenses have been revoked. Articles containing not more than 5 per cent. of rubber may be exempted. This is in line with a recent order that restricted the amount of raw rubber that could be imported into that country. It became necessary to restrict the manufactured article as well as the raw materials if the tonnage space was to be conserved.

Manitoba R.M.A. Convention

Good Attendance of Members and Some Outstanding Addresses — Great Enthusiasm Displayed—Many Important Matters Under Consideration

THE annual convention of the Manitoba Branch of the Retail Merchants' Association was held in Winnipeg last week, with a large attendance of merchants from all parts of the province. There was a great array of talent from across the border to address the merchants at their different gatherings, and some addresses were delivered that sent the delegates away with a new enthusiasm and a new outlook on the problems they are compelled to face.

At the opening session an address of welcome was extended by Sir James Aikins, who praised the work of the organization and expressed his pleasure at being able to speak to such a body of men as the Retail Merchants' Association.

Sir James' address was followed by the annual reports of the provincial officers. J. W. Kelly, president, outlined the activities of the association for the past year.

PRESIDENT'S ADDRESS

There are greater problems facing us today in the conduct of our business than in any previous generation. Not the least of them is our peculiar position as the point of contact between the mounting costs of all commodities and the consumer. It is in your store and my store where the householder first feels the pinch of every new tax upon his purchasing power. It is a situation pregnant with trouble for the storekeeper who is not alive to the sensibilities of his customers.

Then there are the problems peculiar to each line of business in the curtailment of certain products, the shifting of markets of supply, the uncertainty of deliveries, the changing of quality standards, all of which call for the application of keen business ability and careful finance to meet them to the best advantage. And there is the problem of competition with the big mail order houses. But above all, the chief problem of every retail merchant is to see that he keeps abreast with the great evolution of business. Successful business to-day is the outcome of service. In the race of competition, the prize goes to him who serves the people most. In business, as in every other form of life and endeavor, the elements of construction and destruction are unceasingly at work. Constructions—which is co-operation with one's fellow merchants in upholding the principles of right, and eliminating that which is wrong, and co-operation with one's customers in building and improving one's service and in dealing with them justly.

Destruction—born of suspicion of one's fellow merchant, generating fear and jealousy and malice—the product of dishonesty.

Let us unite in eliminating all business methods that will not stand the test of keen, modern day analysis—methods which will ultimately impair confidence, weaken business integrity and lower its standards. Let us found all our business on honor and integrity, and build with a steadfast application of those principles to our every dealing.

In referring to the work carried on by your Executive Board during our tenure of office, I shall only touch the fringe of a few of the matters which it was our prerogative to deal with, as our secretary will review the year's work in more detail.

I would like to mention a few things, however, which might claim special attention. A Committee on Mutual Fire Insurance has been studying the possibilities of such a service for our members, and a report from that Committee will be laid before the Convention for your consideration.

Re Dominion Board

In regard to the Dominion Board meeting held at Ottawa on April 16th, 17th and 18th, a number of very important matters were dealt with, but these will be brought before the Convention in special reports by Mr. Horace Chevrier and Mr. J. A. Banfield.

THE NEWLY ELECTED OFFICERS

George Markle, president.

A. J. Box, Souris, vice-president.

A. F. Higgins, second vice-president.

T. A. Connell, treasurer.

J. H. Curle, secretary.

J. W. Kelly, C. F. Rannard, Horace Chevrier, J. A. Banfield, and A. F. Higgins, representatives to Dominion Board

Current Events in Photograph--No. 25

THE AMBULANCE TRAIN

Back of the fighting lines, back of the field hospitals, lie the clearing stations where the poor human wreckage of battle is sorted out. Here science steps in to alleviate suffering, and every known convenience is made available. In the photo is shown one of the long hospital trains taking the wounded back to "Blighty" and comparative peace.

Re Commercial Education

We are quite proud of the progress that has been made in this respect. As some of you may know, in February, 1917, a few of our leading Winnipeg merchants visited the Short Course at Minneapolis, put on by the University of Minnesota, and they were so impressed with the importance of such a course that steps were immediately taken to institute such a course for the merchants of Manitoba.

In July, 1917, representatives of the various commercial bodies of Winnipeg were brought together with the Council of the University of Manitoba with the result that an Advisory Committee on Commercial Education was appointed, and a great many of you know the splendid success which attended their efforts.

I would like to take this opportunity of mentioning the splendid service rendered by some of our members. Mr. G. W. Markle, President of the Winnipeg Branch, and Mr. Fletcher Sparling, General Manager of the Hudson's Bay Co., should receive special thanks for the yeoman service rendered your association in this very important undertaking.

The evening classes throughout the winter of 1917 and 1918 were well attended, and the short course put on in February for the entire membership of the Province was also well patronized considering abnormal conditions. While the work accomplished so far has been highly satisfactory, we are looking forward to very much greater success when the entire membership becomes seized with the importance of this work. Our University should be greatly complimented for the manner in which the work was undertaken.

Re Community Building

Your Board realized the great necessity for the development of community spirit, if we are to retain the rural town and keep the young man and woman satisfied to remain on the farm. One half of the population of Canada live in the cities. The other half mostly dwell there in their mind. This should not be the case in an agricultural country such as ours.

It would be a calamity to our Province if these rural communities should be forced out of existence. Representative retailers, such as Wm. Iverach and H. L. Montgomery have been working with the Social Service Council and representatives of other organizations of the province, with the idea of promoting community work more vigorously under a competent secretary, qualified to unite the people of the rural districts of Manitoba.

We are to hear Mr. D. B. Harkness, the secretary, and Mr. F. H. Middleton, his associate, who will devote his entire time to this department.

Re Taxation

Our association has given a great deal of time and effort towards the adjustment of our present system of taxation, so that there may be that equality which should feature a fair system. The taxation requirements for individuals or firms engaged in trade in Manitoba are not uniform, and so long as that condition exists we must continue to work for a change. We are pleased to say that our association will be represented on the committee being appointed by the Provincial Government, to act as a Board of Enquiry into present methods with a view to receiving a report and recommendations for introduction in our province.

Joint Committee of Commerce and Agriculture

The formation of this Joint Committee has resulted in much good. It has brought the representatives of the farmers' organizations and the commercial interests of the West together in a new way. Many of the problems peculiar to each have been considered and are being solved. We are greatly indebted to Mr. W. T. Devlin who has represented the association on the Joint Committee. The newly-appointed representative, Mr. Wm. Iverach, is a man well-fitted to follow up the work already done by Mr. Devlin.

We sent representatives to the Regina meeting in March, where the question of co-operative trading of farmers' organizations and locals was fully discussed, and a committee suggested for its consideration. I hope that provision will be made for a discussion on this subject during the Convention.

I would like to suggest to our members the great importance of organization, and I take the liberty of quoting from an address given by Mr. L. H. Lewis, vice-president and general manager, Perkins Dry Goods Co.: "The Badge of Sanity is the Ability to Organize."

Organization is the spirit of progress, and the spirit of progress is by far the greatest asset an individual can have. We are living in an age of organized interests, men get together to discuss things and to better conditions. They are doing it in a spirit of progress.

The idea of the brotherhood of men is no idle, empty dream, and this idea of brotherhood is coming about, not through the preaching of ethics of morality, but it is coming about as a matter of self-preservation and because men are learning more and more each day the cleaner and better way of playing the game of life.

The strength of unity is too evident to admit of dispute. Few things do more to retard the natural progress of a business, or of man individually, than lack of harmony —and where there is a lack of harmony there cannot be real co-operation, and since co-operation is the keynote of success, it stands to reason that without it success cannot be achieved.

There are two chief reasons for lack of co-operation: one is that men do not agree on what is best to be done; the other is that selfish motives deceive men into thinking that they can accomplish more and get along better by going it all alone.

The remedy for the first is comparison of views, exchange of ideas, and the establishment of the right idea of thinking in the

Current Events in Photograph—No. 26

WOMEN FORESTERS OF ENGLAND

Of all the occupations forestry has generally been regarded as one of the most strenuous, one that required the greatest amount of strength and stamina. In England women have taken up the work. The photo shows the forestry corps of the women's land army are now working at Heathfield, Sussex, tree felling and wood cutting for the supply of telegraph poles and trench supports for Government and army uses.

minds of all. The remedy for the second is the knowledge that the common good is also the real good of the individual. Selfishness is but another name for ignorance.

I take this opportunity of saying a few words in regard to the sterling qualities of your worthy secretary, Mr. Curle, who has only one aim in life, and that is the betterment of the conditions of the retailers. He is consitent and persistent in the work of the association—in season and out of season, day and night, ever alert to your interests in that tireless energy which few men possess.

J. H. Curle, secretary of the association, spoke in detail of what the association had endeavored to do during the year to assist and protect the merchants of the province. Mr. Curle's report was in brief as follows:

SECRETARY'S REPORT

The activities of the Manitoba Board have been numerous and varied during the past year. Changing conditions have introduced new duties and added many details which required constant and careful attention. New problems have come to those engaged in trade, more particularly to dealers handling foodstuffs. Consequently there were many enquiries, numerous requests for information and co-operation from the sections affected. We have endeavored to serve all such promptly and willingly. Conditions have made it more difficult for the inefficient man to continue in business. In these days, if a fair return is to be had on capital invested, the general management of a retail store must have careful attention and be organized to produce a maximum of efficiency. Food and men will win the war. Merchants have been and are now assisting the Canada Food Board and its representatives in conserving food for overseas, and in promoting the use of substitutes, such as fish for beef and bacon, cornmeal, graham and rye flour for white flour. More men (clerks, bookkeepers and drivers) have volunteered from the retail trade than have enlisted from any other class in the community.

With a view to releasing additional men the "Cash and Carry" system has been adopted by a few. Co-operative deliveries have been introduced in many places and in Winnipeg many of the merchants have reduced their deliveries to one per day over each route. Retail merchants have contributed liberally to the Red Cross, Red Triangle and other Patriotic Funds, and while the war has reduced profits and destroyed the business of some, they are bearing it with good grace. The Publicity Section of the Canada Food Board is receiving hearty co-operation from the divisional representatives and their associates. There has been an earnest desire on the part of the Dominion and Provincial officers of this Association to assist the Government of the Dominion as far as possible to "carry on" at home while our men fight for liberty at the front.

In having the Dominion Secretary, Mr. E. M. Trowern, in office at Ottawa, our Association is favorably situated to render service to the various departments of the Government when such is required, and also guarantees for the retail trade that protection so necessary when legislation is constantly arising which affects some branch of the trade. The service which the Dominion Secretary has rendered all the retail merchants of Canada during this year has never been so fully appreciated nor so well understood by the officers and members. Through consultation with the Canada Food Board and War Trade Board the Inland Revenue Department and Special Committees of the Government with our representative committees he has been able to direct the course of legislative measures so that no injury would be done the retail trade. For example, the minimum fee for licenses to sell food was reduced from ten to two dollars. What does this mean when applied to the Dominion? When a war tax was suggested on certain goods handled by retailers. the Dominion Secretary with his intimate knowledge of the retail trade was of great assistance in reviewing and revising the application of these taxes. Note:—Tea was exempted up to 1,000 lbs., and the tax of 10% was confined to such articles of adornment (jewelry) as were purchased between October 1, 1917, and April 30, 1918, less the sales for the said period. The latter was of great importance to retail jewelers. Permission was obtained whereby firms who were carrying stocks which were unsalable in Canada were allowed to export these woollens to the United States where a ready market was found when the United States entered the war.

Returned soldiers now receive allowance with which to make their own choice of wearing apparel instead of being obliged to accept civilian clothing as formerly granted.

The Dominion Board considered many important questions at their meeting held in Ottawa on April 16, 17 and 18, 1918. One of the most important was the revision of the constitution so as to provide for Eastern and Western Boards and Executive Councils which shall in future constitute the Dominion Board, and the Dominion Executive Council. The Eastern Executive Council shall consist of four representatives, viz., one from Ontario, one from Quebec, one from New Brunswick and one from Nova Scotia and Prince Edward Island (one). The Western Executive Council to consist of one representative from each: British Columbia, Alberta, Saskatchewan and Manitoba. This arrangement provides for more frequent meetings and reduces the expenses of traveling. The expenses of the Dominion office are to be equally divided between the East and the West. The per capita tax of the West is to be placed in the hands of a Western treasurer.

Transient Traders' Act

The Transient Traders' Act and an amendment to the Municipal Act. Transient traders, hawkers, peddlers or anyone taking orders from or selling direct to the consumer is required to secure a license from the Provincial Government and pay $5 for same. Having obtained this license, the holder must report to the proper officer of the municipality in which he desires to trade. The penalty for failure to comply with either of these requirements is fixed at an amount not to exceed $50.00.

The Repair Shops Act

This Act provides that goods left for repair may be sold if not called for by the owner within a reasonable time after they have been left with the dealer. Copies of the Act have been mailed to all members.

The Amendment to the Shops Regulation Act

This amendment provides for the passing of by-laws by municipalities whereby stores carrying groceries, although not grocery stores, shall be required to close at the hour at which grocery stores are required to close.

Amendments to the Act for the Recovery of Small Debts were drafted and presented to the Government. These provided for enlarging the jurisdiction of the magistrates. The Government did not see the wisdom of granting this request until the Act in its present form has been given a fair test.

During the year, while a great deal of time has been devoted to the consideration of Orders-in-Council, the members generally have taken advantage of the special services which the Association offers through the Insurance Department, the Traffic Department, the Credit Department and the Collection Department. The membership of the Manitoba Board as of March 31, 1918, is 1,050. This membership is divided as follows: 516 in Winnipeg and district, and 542 in the country.

During the year the executive held 22 meetings.

The Association regrets to announce the loss of the services of N. B. Henry, provincial organizer, on April 1st, and Mr. R. I. Colquhoun, the city organizer, on May 1st. Both of these gentlemen have been of great value to the organization. The officers have been fortunate in securing the services of Mr. A. R. Ivey and Mr. W. Nicholson, both of whom are now busy on organization work.

As the President has referred to many matters, such as Commercial Education, Community Building, Railway Rates and Classification, and as you will hear reports from the delegates to the Dominion Board meeting, the representatives of the meeting of the Joint Committee of Commerce and Agriculture and a special committee delegated to report on a Mutual Fire Insurance Company, I will not make any reference to these. I believe a very earnest effort has been made by those employed by the Association to give service, to place time and effort on those activities which will bring the largest results to the greatest number engaged in the retail trade.

Thomas C. Knapp Discusses Merchants' Problems

The evening session that followed was one of unusual interest. Thomas C. Knapp of the Sheldon School, Chicago, was the speaker of the evening. He dealt with the problem that is facing the merchant to-day. Mr. Knapp expressed himself strongly in favor of co-operation among the different elements of the store. "If you are not having buyers' meetings you don't know you're living, and if you're not having employees' meetings you don't know you're awake," declared Mr. Knapp. "The stores of the future will have to make the work of the employees interesting. They will have to instill in them the desire for self-improvement, the desire to become a greater factor in community building."

"Criticism is beneficial," said the speaker. "I like to have people criticize me. Ninety-nine people out of one hundred will slap you on the back and call you a fine fellow and not mean a word of it." He reviewed from his experience numerous instances in which by studying adverse criticism business houses have prospered wonderfully. He advised strongly the weaving of service features into the advertising of stores.

Intensive Salesmanship

The value of teaching intensive salesmanship was emphasized in detail, an instance being cited where by such a course a large firm raised its sales in a single year from 56c to $1. "The day is coming when the customers will demand efficient service. I can't emphasize too strongly the necessity of the employees getting out to see other stores. It is not necessary to go outside the store's personnel to get people to carry on the instructional work in salesmanship. I can go into any store of 500 employees and find 15 or more suitable persons for such work." Mr. Knapp spoke at length upon the need for co-operation and kindred spirit among the staff of a firm and declared that to accomplish this end the management must "give them knowledge in a common sense way and give them at the same time the opportunity for self expression." He told of one store where the superintendent had formerly been fully engaged in firing and hiring employees and where since the inauguration of such salesmanship training and social life among the personnel of the firm, the superintendent now found that he could devote his working hours to constructive business activities.

The speaker gave a full account of the training in salesmanship as practiced in a certain United States department store where its introduction has lead to great development and prosperity. Monthly and annual store contests, store reports, standardization, store meetings, educational work, shopping in other stores, a filing system of store problems, annual picnic, civic activities, buyers' personal reports, store manuals for each department and the observance of a distinct code of store practices were some of the points in the programme which the store had carried out.

What the Community Club Can Do

At the morning session on Wednesday H. M. Clark of Lakefield, Minn., who for five years was the secretary of the Lakefield Commercial Club, spoke on the benefits that may be derived by a town from a community club. His subject was "What a Community Club Can Do for Your Town."

He told his hearers that the "Club" is not a theory, but a fact, and has been worked out to the greatest advantage. He declared that what Lakefield has done any other town can do, and be greatly improved by the community spirit.

Merchants of the town, though competitors, are able, by way of the club, to meet one another and unite in common cause for the good of their community. Mr. Clark cited, as an instance, the case in Lakefield. When the "Community Club" was formed, competitive merchants discovered for the first time that they could be friends, and instead of fighting one another, they united to work shoulder to shoulder. The merchants of Lakefield, the speaker stated, are now working in unison.

The "Community Club" in Lakefield, is formed into these 16 committees: Agricultural, publicity, entertainment, schools, good roads, fire prevention, membership, officers, finance, legislative, mercantile, civic improvements, public health, auditing, advertising and purchasing.

Besides co-operation among the townsmen, the farmers are also working with the community and are members of the club on the same basis as the others. A rest room has been established in the Lakefield clubroom for farmers' wives and children. One of the greatest benefits the farmers near Lakefield enjoy, the "Farmers' Exchange," was instituted by the club.

The "Community Club" is out to boost its home town with all its energy, and everyone working together makes it easier for the town to go forward and make the best of progress.

Some Resolutions

The balance of the morning session was taken up by a committee meeting of the resolutions committee composed of: Chairman W. T. Devlin, E. Roberts, A. F. Higgins, J. A. Banfield, C. F. Rannard, of Winnipeg; J. Robertson, Brandon; J. Knight, Basswood; L. H. Clark, Melita; H. W. Reimer, Steinback; J. A. More, Souris; J. J. Wilson, Steep Rock; A. O. Beaudry, South Junction. Among the resolutions that were adopted was one introduced by A. F. Higgins, which stated that it was the opinion of the meeting, after making full inquiries into the subject by a special committee, that the rates charged by the Dominion Government for the carrying of parcels by post are not sufficient to cover the cost of same, and that the executive be instructed to request the government to increase the amount to cover the cost of this service.

This resolution passed.

The Supreme Necessity

"Realizing the supreme necessity of greater production, and in order that our soldiers and those of our allies may have an ample supply of food and munitions, be it resolved that the Retail Merchants of Manitoba place themselves and employees at the disposal of the farmers for the purpose of assisting them in every way possible."

The foregoing resolution was passed unanimously, and copies of it were ordered to be sent to every retailer in the province.

During the morning, A. D. Mann, president of the North Dakota Retail Merchants' Association, a guest of the convention, spoke in an interesting manner of the new regulations in prices in the United States and how they were affecting the trade. Mr. Mann said that the "fair food price" set by the government was the greatest thing that has ever been done in the United States for the grocer. It eliminates all suspicion of profiteering from the retail grocer. he declared, as the cost price of each article to the retailer is published side by side with the cash-and-carry price at which he must sell, and also with the credit and delivery price. Mr. Mann also explained the card system governing the buying and selling of both sugar and flour in North Dakota.

Advertising for the Merchant

F. Pratt Kuhn, manager of A. McKim, Ltd., addressed the convention on the subject. "How to Get the Best Results From Newspaper Advertising."

Mr. Kuhn addressed his remarks mainly to the merchants of small towns who have to write their own advertisements without the help of experts and other aid. One point he especially emphasized was that the printed word is not enough, but the merchant must back up his advertisement with his goods, the appearance of his store and windows, his clerks and the personal attention he gives the customer. He must live up to what he writes, and consequently he will become a much better merchant.

Before making an advertisement. Mr. Kuhn advised his hearers to analyse their store, their territory and competition, and to meet the requirements of their customers. He spoke about the appearance of printed advertisements, which should attract the attention and interest of the prospective customers. The speaker stated that the printed word creates a desire to buy and a readiness to accept what is offered, but other things were necessary. Windows should be trimmed in a way to co-operate with the advertising campaign.

There was no better an advertisement than the word of mouth which comes from the satisfied people, and if the merchant lives up to his advertisement and gives his customers satisfaction the news will spread and he will in that way gain patrons.

Banquet to Three Hundred

The banquet held on Wednesday evening was an unqualified success. There were about three hundred guests present, and a number of prominent speakers were present.

Geo. W. Markle, president elect of the association, followed the only toast, that to "The King." Mr. Markle warmly welcomed the United States visitors at the convention. F. P. Mann, president of the North Dakota Retail Merchants' Association, declared in his address "the chief business my association now has in hand is the winning of this war." Mr. Mann then vigorously attacked the mail order business, which, he declared, would, if not beaten "at its own game of advertising," ruin the rural districts. He said that in his state the local merchants now lose one-third, or nearly ten million dollars of the business every year to the mail order men. More frequent change in advertising and more snappy copy were two of the means he advised to fight this competitor.

H. M. Clark, of Lakefield, Minn., spoke on the spirit which is abroad in the United States at war and voiced the assurance to Canadians that his countrymen are "in it to a finish."

Alexander Karr, of Jamestown, N.D., also spoke of America's purposes in the war, and declared that when the struggle is over and the world is made free by Anglo-Saxon arms and Anglo-Saxon blood, "We shall not be two people. We are not two people. We are one."

The Value of Tact in Business

Thomas A. Knapp, of Chicago, related some pointed anecdotes and told of the value of tact in business life.

The Need of Food Conservation

F. W. Stewart, chairman of the publicity section, Canada Food Board, described the work of the board, its personnel, and thanked the merchants for their co-operation through their newspaper advertising "educational phrases" and through their personal assistance.

Mr. Abraham, the final speaker, gave a vigorous appeal for the support of food conservation.

Tuesday morning's session was devoted to routine business largely. Harold Chevrier, Dominion president of the association addressed the convention on the subject, "The Bankruptcy Act of Canada." The convention, while not the largest on record owing to the date coinciding with the Red Cross week in the province, was one of the most interesting and helpful ever held by the association.

Contest for Best Motor Accessory Display

Four Cash Prizes Are Offered :

First Prize—$10

Second Prize—$5

Third Prize—$3

In addition $1 will be paid for each window that does not get a prize but which is good enough to be reproduced.

Automobile Accessories are becoming more and more an important line to the hardware trade of Canada. Already many merchants are handling them. They have found a good profit therein.

Display is one of the essential conditions for the sale of Automobile Accessories. HARDWARE AND METAL is anxious to have evidence of the efforts being put forth by hardware merchants to this end.

Here is an opportunity for hardware merchants and salesmen to enter a contest from which they will reap much benefit. Besides the monetary value of the prizes there is the benefit to be secured from your display.

Dress your window up according to your ideas of a "Selling Window." Then have a photograph taken and submit same in HARDWARE AND METAL'S Contest.

All photos must be at least 5 inches by 7 inches and preferably 8 inches by 10 inches, printed on glossy paper, as the latter kind of paper is best suited to have cuts made therefrom.

Contest closes July 20 and photo must be mailed not later than that date. Winners will be anounced in our issue of July 27.

Dress up Your Auto Accessory Window.
Come into the Contest.

EDITORIAL COMMENT

UNITED STATES Government last week distributed additional orders for steel amounting to approximately 1,000,000 tons. With each additional order commercial users' hopes are expiring.

* * *

AN order for 300,000 kegs of nails was placed for the use of the United States Army in France. The order is the largest of its kind on record and involves an expenditure of more than $1,000,000. There should be a sufficient supply in this amount to nail the Kaiser's coffin tight.

* * *

AN aerial postal service has been inaugurated between Montreal and Toronto. Canada was not long in catching the contagion after the service was inaugurated between Washington and New York. This is undoubtedly a forerunner of a still wider use of aeroplanes for this service.

* * *

CANADA leads all other countries in the per capita production of food materials from farm crops. Canada first with 100 per cent., Argentine second with 80 per cent., and United States next with 64 per cent., is the order in which they run. That is what we should aim to do in the manufacturing lines as well.

* * *

COST of production of pig iron in United States will be increased $1.10 per ton by increase in freight rates on June 25. With additional labor costs bringing increased cost of production up to $1.50 per ton since last price was fixed it would almost seem that higher priced pig iron could be expected some day, some time.

* * *

THE Japanese Government has reached an agreement with the Chinese Government whereby the former is to supply the money and the latter is to do the work in connection with development of iron mines at certain points in China. Japan is to control the output of steel. The Chinese are permitted to be the "hewers of wood and drawers of water" in this arrangement.

LOWER PRICES ON SISAL FIBRE

ONE of the interesting developments within recent days has been the announcement that the Food Administration at Washington has arranged with the Commission Regualadora Mercado de Henequen for the purchase by manufacturers in the United States of 500,000 bales of Mexican sisal fibre at an average price of 16c per pound.

This amount is to be delivered over the period between now and January 1, 1919, at the rate of approximately 70,000 to 85,000 bales per month. At the present time sisal fibre is quoted in the New York market at 19¼c per pound. The difference in price between the price at which supplies for next year's binder twine will be purchased and the present prevailing price is therefore 3¼c per pound.

If operating costs are not increased to offset this advantage there should be a situation favorable to lower prices in binder twine next year. Of course supplies of raw fibre for the present season's binder twine have already been purchased and twine is now in the hands of farmers.

It will be something to look forward to next year to anticipate lower prices for binder twine in view of the record prices that prevailed during the past season. Manufacturers of binder twine will welcome this opportunity of having their supply of fibre assured at a more reasonable figure than they were able to obtain it this year.

BUILDING OPERATIONS MORE ACTIVE

HARDWARE merchants will note with interest the apparent increase in building activity during May of this year as compared with May last year. Reports for some thirty-five cities in various parts of Canada show the amount in May this year as $4,838,953 as compared with $3,833,064 in the same month last year. This is a gain of $1,005,889 for the month, or 26.24 per cent.

For the month of June there will undoubtedly be a corresponding increase as compared with last year. This building activity represents a ground swell in favor of building in spite of the present cost of building. Dwellings are absolutely necessary in some sections in order that industrial development may proceed.

In some districts there is a strong feeling in favor of building activity in spite of present costs of raw materials. There is a certain timidity on the part of the private builder lest he should not be able to dispose of his buildings after he has them erected.

In some sections companies have been organized

to undertake building to the end that employees for certain industries may be accommodated. Where this takes place the private builder will undoubtedly be encouraged. Once the conviction has taken hold that lower prices cannot be expected building operations will undoubtedly be more general.

SUPPLIES OF AUTO ACCESSORIES SUFFICIENT

WHOLESALE dealers in automobile accessories report that they are experiencing no difficulty in placing orders for manufactured articles in the United States. Their greatest difficulty is to get the supplies forwarded by the railways. Manufacturers have been able to make shipments the day orders were received but it often takes weeks before the goods reach this country.

Manufacturers have not yet complained that there is a noticeable restriction in the quantity of raw material available for their purposes. Of course these manufacturers in nearly every instance have anticipated their needs for the present year's business at least.

Wholesale dealers in automobile accessories who have recently started to handle the line assert that their main difficulty is to get the goods delivered, not to get their orders placed. With the restriction in the number of automobiles that will be manufactured during the present year it will be a necessity to allow the manufacture of accessories in order to keep automobiles in use. They cannot be utilized without a certain amount of renewal each year. The automobile has become an essential machine in present-day business organization.

JOBBERS CO-OPERATE IN STEEL SITUATION

THAT the jobbers of iron and steel in the United States are showing the right spirit in co-operating with the Director of Steel Supply is evidenced by the fact that jobbers have undertaken to know accurately the uses to which goods distributed by them are to be put.

A special committee is to be organized to represent all branches of the trade and all sections of the country. This committee is to sit in conference with the Priority Committee, the Director of Steel Supply and other officials of the War Industries Board, who may need its advice in apportioning steel to hardware jobbers, or in maintaining, increasing or reducing stocks.

Jobbers are to make monthly reports of the various classes of steel sold and are to report all orders placed with the mills during the month. The jobbers have agreed to undertake the discouragement of work not immediately essential, the postponement of which will help relieve the non-war demands for iron and steel.

In view of these arrangements it will be seen that the jobbers will not be eliminated but will be a force that will assist in the distribution of iron and steel to those industries which are essential.

WAR DEMAND CLOSE TO MILL CAPACITY

THAT the war demand for steel is close to the capacity of United States mills is indicated by the fact that almost the entire output is being required for war purposes at the present time.

The production of steel ingots in May amounted to 3,256,000 tons as compared with 3,163,000 tons during April. Based on statements made by the director of the steel section of the War Industries Board it is estimated the Government requires at the present time in the neighborhood of 3,000,000 tons monthly.

From these figures it will be seen that the requirements of the Government are running close to the output of the mills. And it is estimated that mills are now producing to the extent of about 90 per cent. of their capacity.

The plan of distribution recently announced by the War Industries Board is meeting with no complaint on the part of those who are affected. After all the needs of the Government are met the left-over steel and iron is to be distributed on a basis of preferential treatment for industries contributing to the war.

There is some chance that relief may come through increased production. United States manufacturers have shown great ability to respond to a stringent condition and there is hope they may do so in the present instance and so give ample supplies for non-essential industries.

FIRE PREVENTION TO REDUCE INSURANCE

AT the annual convention of the Canadian Manufacturers' Association held in Montreal last week, Sir John Willison pointed out that an enormous saving can be effected in the amount paid for fire insurance through a more concerted effort to reduce the fire hazard.

Canada will have to raise $230,000,000 more in revenue now than she has ever done before. One of the ways to make that possible is by eliminating the waste wherever that is possible. Greater care will reduce the fire risk and in that way the insurance companies can afford to give a lower rate.

We have been so wealthy in Canada in the past that we have been prodigal of our resources. We did not even stop to consider a few millions loss in fire each year. "Well, it is gone. Let it go. We have lots more where that came from." That has been largely the attitude. But we have come to the stage where every leak must be dammed up.

REVOLVERS for Doctors is a heading appearing in Saturday's issue of the Toronto Globe. What's the matter we wonder. Have they lost confidence in their little black pills?

Movie Machine Exposes Money-Leaks

Most Insidious Foes of Profitable Business Are Picked Out by the Searchlight of Science For Benefit of Toronto Branch, R.M.A.—Illustrated Address by an Expert

Reported by Staff Representative.

TORONTO, June 27.—In the darkened hall of the Toronto Branch of the R. M. A. on Monday night, June 24, the whirr of a movie machine sounded steadily. On the screen before the eyes of some five score or more of keenly interested merchants, the days of crisis in the store history of "J. White," general merchant, were vividly shown. There were his toils and struggles to keep his business alive; there were his harassed endeavors to secure loans with which to tide over, and there in their dozens were the thieving little leaks by which his honestly earned profits were simply streaming away from him. Those thievish little leaks were recognized by every retail merchant present, and the picture carried its lesson right home to them.

The Lost Customer

Two customers in the store, three clerks and the proprietor to serve them, but the proprietor struggling to serve both well at once. There was one situation. From the customers' side of the counter the audience looked at it, and saw one customer hurry off impatiently without purchasing. Wrong change alleged, and no record or receipt to check the refund necessary to hold business—there was another leak. In came a customer irate at being billed again for an already paid account. The store had no record, but the customer could triumphantly produce a receipted bill signed by "White" himself. Over-weight, waste, short change, complaints, customers estranged through the accounts of White 'Service?' given by displeased customers, C.O.D. charges overlooked and not entered, charge and "goods taken" items forgotten, cash out for goods bought left unrecorded, these and other 'leaks' were all revealed in their natural course of action. It was a movie show with a message and more for the merchant. It was a movie show with a really practical lecture added for the benefit of the whole retail trade. The lecturer was W. F. Brennan, who is attached to the Lecture Bureau of the N. C. R. Co., Dayton, Ohio. The gospel of store organization, and the employment of leak-stopping cash recording systems was of course the answer to the unspoken question, 'How can I prevent such losses in my own store?' To answer the question was, however, left entirely to the business instincts of the audience, and the lecture was most evidently appreciated. Here are some of its principal points recorded for other merchants interested:

Co-operation Not Competition

"Co-operation not cut-throat competition is the key-note of to-day's business," declared Mr. Brennan, and he showed farther on in his address how **"the wholesaler and the banker are both partners of the retail merchant in these days."** He showed how by proper organization of a store the burden of the business can be shared by all the help and the owner so that all the weight need not bear down on the one mind which should be most free of care—namely the owner's. He emphasized at the outset the fact that in 1917 in Canada $18,417,239 had been lost through store failures, 777 stores being involved including as the principal businesses 133 general stores, 239 grocery stores, 62 clothing and furnishing stores, 51 dry goods businesses, and 26 hardware stores. Little leaks for the most part had sunk them all, and the hundreds of other businesses which had failed also.

Price-Cutting Unprofitable

"Price-cutting," said Mr. Brennan, "is a principal cause of failures. Letting your competitor make the price is poor business. Credit is important. Credit is as important as capital in doing business. Good business methods are essential to credit." The lecturer quoted Ed. N. Hurley, who as chairman of the Federal Trade Commission had said: "In the future the business man, large or small, will not be able to get credit on loans unless he is not only sound financially but also able to show that he is conducting his business intelligently."

Store Organization Plan

A store organization plan sketched by Mr. Brennan for general merchants was on these lines: First, the owner with his mind freed from detail work, able to take care of the main problems, and advance business on the broad scale. Then the head clerk supervising other help, assisting in buying, watching credits, and helping in advertising. Then the second clerk, taking 'phone orders (a man with a 'smile in his voice' and a pleasing way of speaking to people for this work). He would also have other duties such as checking taken orders, and serving otherwise.

WINNERS IN SALESMEN'S CONTEST

HARDWARE AND METAL announces this week the winners in the contest for salesmen. Some excellent ideas were turned in and the judges had considerable difficulty in coming to an agreement as to allotment of prizes. Following are the winners:—

First Prize, $10—Howard Crummer, London, Ont., with Cowan Hardware Company.

Second Prize, $5—W. E. Cassidy, Sudbury, Ont., with Robert Horne, hardware merchant.

Honorable Mention—Prize of $1 each:

George F. Snoad, Blairmore, Alta., with Blairmore Hardware Co.
Percy H. Butler, St. John, N.B., with W. H. Thorne & Co., hardware.
Francis J. McIntyre, Whitby, Ont., with J. McIntyre, hardware.
D. MacDonald, Walkerville, Ont., with Long & Wilson, hardware.
John E. Meyer, Ayton, Ont.

First and second prizes were awarded for methods in selling oil stoves. The prize winners and those receiving honorable mention will appear in the columns of HARDWARE AND METAL in the near future.

The third clerk would look after stock, prevent shortages arising, keep tab on slow moving stock, report on condition of stock, etc. To the fourth clerk would be assigned as his specialty window trimming, and the watching of competing windows. The delivery man would deliver, make outside sales, get tips leading to sales, and especially note and report all complaints. (This last is important.)

Percentage of Loss Mounts

Returning to the leaks, Mr. Brennan mentioned the striking fact that one-quarter of a cent loss on each transaction in a store doing a turnover of only $30,000 a year would mean a dead loss of $213.75.

Lack of system as to credit causes losses in three ways. First, through having too much money tied up in credit accounts; second, through extending credit unwisely; third, through forgetting to charge items, and losing charge slips. To reduce losses through bad debts the lecturer recommended that retail merchants "join and boost a good live credit organization such as the R. M. A. provides."

Delivery Losses

Delivery losses are exercising merchants everywhere, as Mr. Brennan indicated. He advised merchants to avoid long hauls, cut out unnecessary deliveries, and watch closely for delivered goods of which no charge record has been made. "Test your delivery costs," he said, and a cartoon showed profit on goods 12 cents, but delivery charges 15 cents, meaning a loss. Mr. Brennan advised that help be educated into saying to customers while wrapping parcels, instead of "Do you wish this sent?" "Do you wish to take this with you?" There is a difference in suggestion which will be found profitable for people are apt to act on the suggestion and carry their parcels.

Profitable Service

Promptness, courtesy (especially to children), accuracy, appreciation of the customer's point of view, desire to oblige, absolute honesty as to the goods, and knowledge of the goods are all features in good salesmanship and store service as pointed out by the lecturer. "A good clerk," he said, "should know: First, what goods the store keeps; second, where they may be found; third, **everything possible about the goods and their prices.**" Especial courtesy should be shown to newcomers to a town or district. It brings business. In handling complaints follow the Golden Rule. Never try to force a sale. Talk quality. Let the customer decide. Educate help to realize that the customer is the 'boss' in the last instance. By that John Wanamaker throve. Show all the goods you can even to the customer who is simply looking around the stock. These hints Mr. Brennan gave to clerks present.

Store Saved from Bankruptcy

Finally the lecturer showed that the modern store owner **knows**, where the old fashioned owner simply **guesses.** And

(Continued on page 40.)

Suggested Headlines for Your Advertisement

ARE you ever at a loss to get the right heading to suit your advertisement? Very much depends upon the striking power of your headline whether or not the prospective customer will read further into your advertisement. HARDWARE AND METAL here offers some suggestions that may help you get the most attractive and catchy lines. Perhaps they will start a train of thought that will enable you to develop still other headlines yourself:

Your Trees Need Spraying

Insure Your Fruit by Investing in a Sprayer

Spray and Make the Bugs Scarce

Spraying Materials for You

Delay No Longer in Getting Screens

Wire Cloth for Repairing Doors

Go Fishing and Forget Your Troubles

Get a Good Steel Fishing Rod

Grass Shears Trim Your Lawn Neatly

Galvanized Clotheslines Never Break

Water Your Garden to Make It Grow

Some Garden Hose Will Help Production

Waxing Brushes Keep Your Floors in Good Shape

EVENTS IN THE TRADE

Business Changes

Theodore, Sask.—P. C. Larson has disposed of his hardware business.

Leader, Sask.—R. Bay has disposed of his hardware and furniture business to Bernthal & Love.

Toronto, Ont.—French Bailey Company has been succeeded by the C. J. French Hardware Company.

Montreal, Que.—Maxine J. Lebeau and Charles A. Lebeau have been registered under the firm name of Lebeau & Lebeau, hardware.

Fire Losses

Newmarket, Ont.—N. F. Bennett, hardware, has suffered loss by fire.

Pembroke, Ont.—Dunlop Co., Limited, wholesale and retail hardware, suffered loss by fire in the recent big fire in that town.

Obituary

John W. Coy, formerly well-known in St. Catharines, Ont., and at one time a hardwareman in that city, died on June 22. Mr. Coy was at one time connected with the hardware firm of Coy Brothers, St. Catharines. Later he became a partner with R. H. Smith in the T. F. Shurley saw works. Later he retired and some seven years ago was appointed deputy librarian in the Ontario Parliament Buildings at Toronto, which position he held until illness compelled him to give up those duties some three months ago. The funeral took place from the residence of his brother, Frank E. Coy, at St. Catharines.

Personals

T. J. Best, of the J. C. King Company iron founders, of Montreal, spent a day in Toronto during the week.

R. J. Lavelle, president and general manager of the Hamilton Whip Company, was in Toronto during the past week.

Incorporations

The Mogan-Jones Company, Limited, has been incorporated to handle hardware and implements in the town of Dinsmore, Sask.

Wiebe Bros. & Walsh, Limited, have been incorporated as a hardware company to carry on business at Estuary, Sask.

The Dominion Sheet Metal Corporation, Limited, has been granted a charter under the laws of the Dominion of Canada. Heretofore the company had operated under a provincial charter. The capitalization of the company has been increased to $500,000 for the purpose of broadening the scope of the company's activities and to provide for future contingencies. The personnel of the officers of the company remains unchanged.

The Auto Accessories, Limited, is a new company that has been organized at Dodsland, Sask., to manufacture a device for automobile lights to permit of the lights being turned when the auto is turned as it goes round a corner. A. H. Mones is president.

W. L. M. JONES.
Manager of Christiansen Implements Ltd., Winnipeg.

Western Firm Now Occupy New Plant

An important change has taken place in the firm of Christiansen Harrow Works, Winnipeg. This firm has moved from their old plant at 331 Austin St. to larger premises near the corner of Owena Street and Henry Avenue. In future they will go under the name of Christiansen Implements, Limited. The manager, W. L. M. Jones, is well known as a manufacturer of implements in Western Canada. Among the lines they manufacture are plow packers, harrow attachments, and other labor-saving machinery for the farm, together with auto truss rods for Ford cars.

Montreal News Notes

T. H. Jordan, of A. C. Leslie & Co., spent several days this week in Quebec City.

Albert Desjardin, for the past eleven years connected with the firm of Lewis Bros., Ltd., has accepted a position as travelling salesman with Frothingham & Workman. Mr. Desjardin was on the road for the former company for four years.

G. B. L'Oranger, hardware merchant, of Three Rivers, was in Montreal this week.

L. I. Matts, of Ferme Neuve, Quebec, was a Montreal visitor to the wholesale hardware trade.

W. F. Duffield, of the Reading Hardware Co., was a Montreal visitor during the present week.

J. A. Paquin, of Ste. Eustache, Que., was in Montreal during the week and visited the hardware jobbing trade.

J. L. Ling, of the Chicago Flexible Shaft Co., was in Montreal this week making calls on the jobbing trade in his firm's interest.

R. C. Misson, sales manager of the Sherwin-Williams Co. Montreal office, returned from a trip to the States, where he visited the company's Cleveland plant.

C. Angers, who has been assistant buyer for Frothingham & Workman and in their employ for a great many years, is leaving, and will engage in ranching in the immediate future.

Montreal Firm to Add Auto Accessories

Recognizing the wide field for the sale of automobile equipment and in keeping with their forward policy, Lewis Bros., Ltd., is adding a very large and complete line of these goods to the stock of hardware carried. In speaking with HARDWARE AND METAL, John A. Fraser, sales manager, outlined that it was the purpose of his firm to carry a very complete and large stock. With a view to carrying out this policy very much more space is being afforded for display, and a competent manager is being secured to assume charge. It is expected that within a few weeks the present stock will be largely augmented and a separate catalogue of automobile equipment will be compiled and issued to the trade at an early date.

Finds Conditions in West Promising

Edward Goodwill, manager of the Thos. Davidson Manufacturing Co., Ltd., returned the first of this week from an extended Western trip. Interviewed by HARDWARE AND METAL, Mr. Goodwill was very agreeably impressed with the outlook from Winnipeg to the coast.

According to Mr. Goodwill there is a general filling up of vacant houses, with a consequent reflection in advances for rent, and if the demand for housing con-

tinues it will be necessary to build more. With a few possible exceptions this was the condition nearly everywhere.

"It looks better in the West than it has for some time," continued Mr. Goodwill. "I would not say that conditions are like those which the West had in boom times, but there is indication of prosperity on many sides. The farmers in particular come into town in their cars, and a great number of these are of the better class. Farm lands have been selling very well, more so than that in the towns and cities."

Asked as to his estimate of the crop outlook, Mr. Goodwill replied that, while rain was needed in many parts, he was sure that the recent rainfall reported from many centres would be timely and have the desired results. "The Edmonton district in particular looked well and the people there are very confident that their crop for 1918 will be a large one. Trade conditions are generally good."

Much Glass Was Destroyed in Montreal

Thousands of dollars worth of glass was destroyed in some twenty-five stores of Montreal and its suburbs during Tuesday afternoon of this week. The explosion of many tons of dynamite near the north entrance to the C. N. R. tunnel, beyond Outremont, occurred shortly after three o'clock, and the force of the impact was felt all over the city and in places miles distant. An electric wire is supposed to have set fire to the shack containing the explosive, and as this was observed by the watchman in time to sound a warning to the workmen engaged nearby, there were fortunately no fatalities. The dynamite was that being used in the large work which has been under construction for several years, but no damage is reported to the tunnel. The merchants suffering loss through broken glass are said to have had this covered by insurance.

Arrangements for Picnic Proceeding

Arrangements for the picnic of the Toronto hardwaremen to be held in Lambton Park on July 17 are proceeding. The various committees are now putting forth efforts to make the affair a big success. The Toronto hardware merchants extend an invitation to all outside hardwaremen to be present on that occasion and join in the merry-making.

New Salvaging Plant For Iron and Steel

The Consumers' Metal Co., Limited, is at present engaged in the establishment of a plant at Montreal for the production of pressed steel billets. In an interview with the secretary, J. Sophus, HARDWARE AND METAL was informed that the plant would be in operation by the middle of August.

At such a time as this, when the conservation of steel and iron is urged by the various war boards, the establishing of such a plant will be of much interest and of considerable benefit to the trade. Such is the opinion of Mr. Sophus, who states that the Government was anxious that the plant should be erected and the salvaging work that it can undertake be made possible at the earliest date.

There is a similar plant in Rochester, New York, and this will be the model for the Canadian plant. Eventually it is expected to cover about two acres, located on the Lachine Canal, at Lachine, Que.

The equipment is capable of handling the heaviest boilers and other scrap that may be secured. Hand and power cranes will be used. Dismantling will be done largely by the use of power tools, pneumatic hammers being employed.

Of interest to the trade in particular will be the reclaiming and re-threading of pipe up to four inches in diameter. This will be tested under pressure before being again sold.

The same company has been engaged in dismantling the "false work" of the huge Quebec bridge, and this required handling pieces weighing 30 tons each in some cases. Forty men were engaged in this from last November to the present time.

The officers are:—President, R. H. Coates; vice-president, Emile Schwartz; and secretary, J. Sophus. Offices are at 14 St. John Street, Montreal.

Rationing Hardware Trade in England

A recent report by the United States Consul at Birmingham shows the condition in the hardware trade in Great Britain at the present time and gives some indication of similar probabilities on this continent as well.

"Supplies of hardware of all descriptions are rapidly becoming scarce in the Birmingham district. While stocks are not yet entirely exhausted, the dearth of many articles that enter into the everyday life of the people is increasing, however, and consideration is being given to the question of replenishing sanitary fittings and appliances, culinary and other domestic utensils, etc. Rationing of selected industries is being extended. For example, bedstead makers are receiving some steel to avert suspension of the civil trade. Little can be done by importation under present conditions to relieve the hardware shortage. The withdrawal of the general license has cut off supplies that were formerly very valuable in easing the situation, and no satisfactory scheme of particular licenses has as yet become operative. A certain amount of export trade is being done, chiefly with the British colonies and dependencies.

"The help of the Midland hardware trade has been sought in devising a scheme for the rationing of hardware, with a view to making better use of raw material available in order that the manufacture and distribution may be more thoroughly systematized. Many manufacturing branches are already rationed, but when it comes to dealing in detail with hardware the articles are so many and various that the application of anything like a rigid control becomes difficult. What the authorities seem to desire is a regulator between the manufacturer and the retailer. At present the problem remains unsolved, but it is being further studied by the hardware trade section of the Birmingham Chamber of Commerce.

"It is felt that the maintenance of certain manufactures is specially important to economic stability and future development, and this aspect of the situation is receiving the close attention of the Board of Trade in consultation with manufacturing and mercantile interests particularly concerned.

"While the tightening of the restrictions on civil trade is making itself felt in those factories and workshops that are not entirely devoted to war production, there is a very substantial amount of business activity in the distributive channels. Some of the large merchant houses are able to command supplies from one source or another on a scale that is surprising, under the circumstances, but they state that obstacles are placed in the way of distribution of available goods to the consumer by the State control, release being contingent upon the satisfactory answering of questions that involve the collection and transmission of considerable information. Thus, particulars are required as to the origin and date of manufacture of goods, the history of which in many cases, particularly where the article is made up of various components, it is impossible to ascertain.

The stricter control of hardware imports has become necessary in the interests of a better utilization of cargo space. The United States is now the only outside source of supply as regards any general range of articles.

During the war the import trade has been exploited by numerous speculators not previously associated with it, and the revocation of general licenses, mentioned above, will enable the authorities to put a check on profiteering by indirect trading. It is not expected that general licenses will be withheld from regular importers who were in business before the war, though it is not known to what extent it may be found necessary to curtail the volume of trade.

Repeated calls for men for the army has involved the closing of many small businesses, and the suspension or curtailment of various departments of the larger manufacturers. It is becoming increasingly difficult to make good displaced labor, particularly in those branches of industry that serve the general trade. The normal radius of Birmingham's industrial interests is being steadily circumscribed. At the same time the amount of unutilized productive power is comparatively small, owing to the merging of all sorts of pursuits into the central stream of munition work.

Hardware prices have more than doubled since the war began. A conservative estimate places the advance during the past year at something like 25 per cent. To gauge the volume of trade now as compared with that of a

year ago it is necessary, therefore, to discount the value as shown in the official trade returns by at least one-fourth. There is the further qualification that the accounts now include articles imported and exported in public as well as in private ownership, except imports for the use of forces on active service. Down to the middle of last year the exports shown included goods bought in the United Kingdom by and on behalf of the Governments of the Allies, but did not include goods taken from British Government stores and depots, or goods bought by the Government and shipped on Government vessels. To what extent the totals are swelled by this enlargement of the scope of the accounts there is no means of ascertaining.

Oil Supplies to Be Apportioned to Allies

The Fuel Administration of the United States has issued the following: The United States Fuel Administration, through Mark L. Requa, director of the oil division, announces the appointment of A. C. Woodman, director of purchases of lubricants of the oil divisions, and J. A. Moffett, jr., secretary of the National Petroleum War Service Committee, as a committee to allocate oil purchases for the Allied Governments.

The object of the appointment of this committee is to accomplish the most equitable distribution of the orders of the Allies for oil supplies throughout the entire industry, and at the same time to make certain to the Allies a prompt and satisfactory source of supply, with as little interference as possible with the requirements of our own industries.

Platinum Reported in Short Supply

The War Trade Board has called attention to the existing shortage in platinum through a letter which has recently been sent out to jewellery manufacturers and dealers. It is stated the platinum requirements of the Allies are much in excess of any production that is expected. Platinum is largely used in contact points for motors and is necessarily in great demand for such uses. Manufacturers or persons trading in platinum or platinum scrap and articles containing more than 25 per cent. in value of platinum are asked to furnish the Director of Licenses with an inventory of their stocks. No platinum can be sold or purchased unless the transaction is first authorized by a license from the War Trade Board.

MOVIE MACHINE EXPOSES LEAKS

Continued from page 37.

with the aid of a second film he pictured the steady strides of the White store to surpassing success following the visit of an expert in store systematizing who up-built again the confidence of banker and wholesaler in the tottering structure of J. White's good business ability, sadly undermined as it was by these preventable losses. The result was the installation through renewed credit of a proper business system, the release of the merchant from drudgery and despair, the renovation of the store, the renewal of custom, and the enthusiasm and vigor of happy ambitious clerks anxious to maintain the reputation of their house for real service.

Presiding over the gathering on Monday evening was D. W. Clark, president of the Toronto branch R. M. A. A cordial vote of thanks was given the lecturer of the evening. Mr. Brennan will be giving his lecture in Hamilton, London, Montreal, etc., and later will go to Western Canada.

HARDWARE LETTER BOX

Manufacturers of Polishing Cloth

Cochrane Hardware, Ltd., Sault Ste. Marie, Ont.—Will you please advise who are the manufacturers of Redio, a new patent self-contained metal cleaning and polishing cloth?

Redio & Co., 66 Fore Street, London, Eng.—Ed.

Vulcanizing Materials

A. J. Bernard, Sydney Mines, N.S.—Kindly inform me where I can obtain necessary raw materials for use with a vulcanizing outfit, such as rubber, fibres, etc.

Gutta Percha & Rubber Co., Ltd., Halifax, N.S.; Canadian Consolidated Rubber Co., Halifax, N.S.; Goodyear Tire & Rubber Co., Halifax, N.S.—Ed.

Trade Inquiries

417. **Catalogues.**—A wholesale importing firm in South Africa, with wholesale stores in several centres, requests catalogues and price lists from Canadian manufacturers of furniture of all kinds (knocked-down state), organs, churns, brooms, brushware, woodenware, handles of all kinds, hardware of all kinds, enamelware, aluminum ware, lamps, cutlery, tools, bolts and nuts, nails of all kinds, wire (barbed, plain and baling), netting and screen wire, iron and steel bars, rods, angles, etc., washing machines, sewing machines, household utensils agricultural implements, including cheap ploughs, dairy implements, paints and varnishes, oils, paper (wrapping and grease-proof), paper bags and any other lines, except dry goods, suitable for a general wholesale trade.

418. **Hardware and kindred lines.**—A Durban importing firm requests price lists and catalogues from Canadian iron and steel and hardware manufacturers, including such lines as farm and carpenters' tools, axes, hatchets, pliers and other shelf goods, also handles (broom, axe and tool).

421. **Catalogues.**—A wholesale importing firm in Durban with branch wholesale stores throughout Natal and the Transvaal, requests catalogues and price lists from Canadian manufacturers exporting any lines suitable for the general wholesale trade, mentioning in a special way hardware of all kinds, household and farm utensils, all kinds of furniture (knocked-down state), pianos and organs, iron and steel goods, tools, including shovels and pickaxes, wrapping paper and paper bags, foodstuffs, proprietary lines, dry goods and all lines connected with the wholesale dry goods trade.

422. **Catalogues.**—An importing wholesale firm, with several stores in South Africa, requests catalogues and price lists from Canadian manufacturers of hardware of all kinds, handles (broom, axe and tool), washboards, woodenware, household utensils, enamelware, boots and shoes, dry goods, furniture (knocked-down state), brushware, foodstuffs, and any lines suitable for the general wholesale trade.

423. **Catalogues.**—A South African firm of import merchants requests correspondence, catalogues, price lists and when possible samples of any line of goods suitable for the wholesale jobbing trade, mentioning in a special way hardware of all kinds, dairy and agricultural implements, tools of all kinds, locks and metal door furniture, lamps, lanterns, paints and varnishes, fencing and baling wire, wire netting, wire screens, household utensils and other kindred lines for the hardware trade.

426. **Rubber goods.**—A Durban firm of merchants desires samples when possible, catalogues and price lists on all classes of rubber goods. They are prepared to purchase for Natal or act as agents for the Union of South Africa.

427. **Iron and steel products, tools, chemicals, leather, paper, agricultural implements, etc.**—A Durban firm of merchants and commission agents requests correspondence from Canadian manufacturers of coal mining material, rails, wheelbarrows, steel plates, shovels, coal mining tools, chemicals (caustic soda, bi-carbonate of soda, phosphoric acid, arsenite of soda), glucose, corn starch, powder, flour, lubricating oils, leather belting, agricultural machinery and implements, wrapping paper and grease-proof paper. Will purchase outright in many of these lines or prepared to act as agents.

430. **Catalogues.**—A Port Elizabeth wholesale firm requests catalogues and price lists from Canadian manufacturers of hardware of all kinds, tools of all kinds, lanterns, spades and shovels, pickaxes, enamelware, household utensils, paints and varnishes, brushware, fencing and baling wire, wire netting, handles, stepladders, woodenware, foodstuffs, wrapping paper and paper bags.

434. **Mop handles.**—A Liverpool firm requires the above, 50-inch by 1¼-inch, in 50,000 lots. Correspondence requested with a view to after-the-war business.

438. **Handles of all kinds.**—A Liverpool firm wishes to correspond, with a view to arranging after-the-war business, with exporters of all kinds of handles, including handles and stems in ash, hatchet and hammer handles in hickory and broom handles in gum or basswood.

439. **Knife-cut and built-up veneers.**—A Liverpool firm wishes to arrange for after-the-war trade with manufacturers of the above.

441. **Enamel hollow-ware.**—A Liverpool firm asks to be placed in touch with exporters of the above with a view to making preliminary arrangements for trade after the war.

442. **Household woodenware.**—A Liverpool firm wishes to arrange now for after-the-war business with Canadian exporters of washboards, ironing boards, pastry boards, clothes pegs, rolling pins, towel rollers, knife trays and other household woodenware.

443. **Broom and tool handles.**—A Liverpool firm wishes to make preliminary arrangements now with a view to post-war business with Canadian firms interested in the above.

444. **Wooden toys.**—A Liverpool firm wishes to get into touch with exporters of the above in order to make arrangements for trade after the war.

480. **Wooden buckets, washboards, etc.**—A Liverpool firm makes inquiry for wooden buckets, washboards, etc., with a view to post-war business.

THE CLERKS DEPARTMENT

HE SAVED MANY MILLIONS ON BRITAIN'S WAR BILL

U. F. Wintour Did it on War Contracts and is Now Known as England's Great Economizer

DESCRIBED tersely by the British Official Press Bureau as "The Man Who Saved England Millions," U. F. Wintour is generally recognized as the great economizer of the British Military administration. As Director of Army contracts he has had the spending of more millions than anybody else in charge of one department directing the war and that his success has been officially recognized by such high compliments is indicative of the great executive ability which he has shown. He has now been appointed Permanent Secretary to the Ministry of Food, and the following descriptive of his past accomplishments is from the British Press Bureau's statement:

The Contracts Department is responsible for everything that the army requires, with the exception of munitions, mechanical transport aeronautical supplies, and certain railway and engineering stores. It clothes and feeds the millions of men who are fighting Great Britain's battles. A year ago there were over 5,000,000 of these men; their numbers are now known only to a few high authorities, but they have increased enormously. It is regarded as the best equipped and best fed army the world has ever seen so it can be realized that looking after the wants of all these men is a job where one can waste £100,000 or so without making much of a stir.

"This was what happened in the early stages of this war when Britain's army was expanding into the first million or two. There was serious waste in food and material in camps, at home, and in France. The great demand for raw material inflated prices and there was fierce competition between manufacturers. Worn uniforms and boots that could have been put to good use and saved thousands of pounds were wasted—all because the task of supplying millions was too vast for men who had been accustomed to looking after thousands only.

"And then Mr. Wintour and other business men came along and employed their business genius with wonderful results. Here is a little list of some of the things his department has bought during the war:—

35,000,000 pairs of boots.
40,000,000 horseshoes.
25,000,000 smoke helmets.
500,000,000 preserved meat rations.
260,000,000 tins of jam.
167,000,000 lbs. of cheese.
400,000,000 lbs. of bacon.
35,000,000 knives, forks, and spoons.
115,000,000 yards of flannel.
105,000,000 yards of cloth.

"The total value of purchases during the war has been over $3,500,000,000, including $1,000,000,000 on behalf of Great Britain's allies, and the present annual value of purchases is about $1,750,000,000, including about $500,000,000 for the Allies—or just $5,000,000 of the $35,000,000 to $40,000,000 a day the war is now costing Britain.

"Mr. Wintour set to work to see how much he could save. He found that so keen was the competition for army contracts that low prices could be secured by competitive tendering. Then he instituted an examination of costings where the requirements were not large compared with the total output of the industry, and during twelve months he secured reductions on contracts for hardware, horseshoes, brushes, and similar articles to the extent of $2,000,000 on a total of $68,000,000, a saving of 4.7 per cent.

"He requisitioned output and got control of raw materials like wool, leather, jute, flax, and hemp. Getting this control was absolutely necessary, for with the world-dearth of wool, which began to be felt at the beginning of 1916, prices would have soared and the heavy military requirements for clothing would have been satisfied only at a preposterous cost. Mr. Wintour estimates that $65,000,000 was saved on the cost of the manufactured article by getting control.

"In nine months in 1915 the army spent $75,000,000 on leather, with the result that there was desperate competition among manufacturers to get supplies of raw material and some form of control was inevitable. The price which the department now allows for British hides is 5d. a lb. below the corresponding world prices, and since 2,500,000 hides (averaging 60 lbs.) are bought per annum, the saving here is over $15,000,000. The control of the Indian kips alone has saved $5,725,000, and this does not include the money from the sales of by-products.

"The control of manufacturing processes in the case of jute has saved $30.000,000; raw jute, over $2,500,000 on half a year's supply.

"On hemp it is estimated $8,750,000 will be the combined annual profit and saving. The purchase of tea in 1917, including supplies for the British Navy, will probably amount to 60,000,000 pounds. The average price for twelve months used to be 10.67d. per pound; the Contracts Department has reduced it to 9½d. and 9¾d. Thus, at a penny a pound cheaper, the saving on tea this year will be $1,250,000.

"The department is now experimenting to see what can be done in the way of producing ammonium sulphate, metal and grease, roadmaking, out of old boots. Threepence a pair has been saved on boots by using a double sole instead of a single one, and a new method of selling condemned boots has produced an extra profit of $50,000, and $1,750,000 is saved every year by the re-issue of boots prematurely condemned. Disused or damaged smoke helmets returned from the trenches to the factories last year produced fresh supplies and effected a saving of $400,000.

"And so our economizer can say that his department has saved his country the following amounts among many others:—

Hardware, etc.	$ 2,000,000
Wool	65,000,000
Leather	20,025,000
Jute	3,250,000
Hemp	8,750,000
Flax	5,000,000
Smoke helmets	400,000
Boots	1,800,000
Barbed wire	1,750,000
Disinfectants	1,500,000
Total saving	$139,325,000

"The saving on disinfectants was effected by getting control of blast furnace oil. Now that Mr. Wintour has joined the Ministry of Food, and is looking after the feeding of 46,000,000 of people, his genius for economizing will have a still more severe test."

PARCEL POST TO TURKEY SUSPENDED

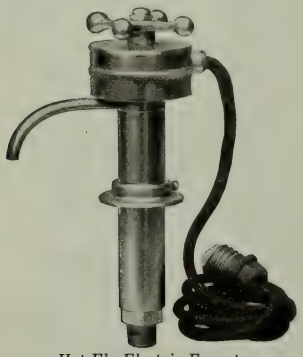
A notification has been received from the British authorities to the effect that the parcel post service for prisoners of war in Turkey or Bulgaria is at present suspended. Until this service is resumed no parcels can be forwarded to prisoners of war in Turkey or Bulgaria and persons desiring to help prisoners of war in these countries are advised to forward remittances to them. These can be sent by means of post office money orders, which are issued free of commission. Particulars as to how to proceed may be obtained from postmasters of accounting offices. Any parcels for prisoners of war in these countries which may be intercepted in the course of transmission will be returned to the senders, providing the name of the senders is given on the parcel.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

"HOT-FLO" ELECTRIC FAUCET

The introduction to the Canadian market is being made of a new hot water faucet. This is designed to meet the demand for a faucet which will deliver hot water through the medium of applied electric current as a heating agent, and it is claimed that it possesses the advantages desired. The fixture is made of brass, is neatly designed and finished in full nickeled effect. Attachment is made to the regular water supply as with an ordinary faucet which it may thus replace. The attachment once made, all that is essential is that the plug attached to the regular cord used be inserted in any electrical socket. This done, the faucet handle is turned and releases the cold water. This will continue to run as cold water until a second turn of the faucet handle makes the electric connection and heats the running water instantly. The volume of hot water obtainable depends somewhat upon the original temperature of the water. The flow is approximately 24 gallons per hour at an average temperature of 110 degrees.

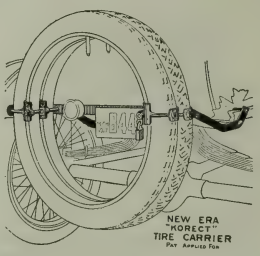


Hot-Flo Electric Faucet

Other features claimed by the manufacturer are that of a thorough insulation, the possibility of using this tap on grounded or ungrounded systems, and a screw adjustment making it adaptable to any water pressure. The Electrical Products Corporation of Canada, 120 Transportation Bldg., Montreal, are Canadian agents.

REAR TIRE CARRIER

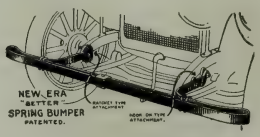
The New Era Spring and Specialty Company, 19-21 W. 62nd street, New York City, is placing on the market two new products in their rear tire carrier and ratchet type attachment for spring bumpers. The new "Korect" tire carrier fastens directly to the Ford chassis. It is asserted there are no holes to drill and that it can be attached in a half hour. It is designed to fit all Ford bodies. It is stated that all weight carrying parts are



Korect Fire Carrier

made of steel throughout, that it is rigid, having no vibration or rattle. It can be made to carry two tires with the addition of the double outfit furnished separately, which can be attached to carrier in very short time. It is claimed for it that it is thief-proof by gripping the rim and circling the casing with locking device.

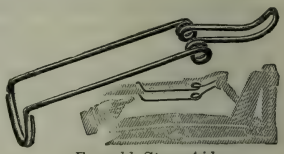
The "Better" spring bumper manufactured by this company is asserted to be designed for cars of the gooseneck frame construction where there is no splash pan. The ratchet disk method is used in attaching and very little time is required to place bumper on car, it is asserted. For cars of gooseneck frame construction equipped with splash pan or extended mud guards the hook-on type of connection is used. By this method, it is claimed no cutting or drilling is necessary as hooks can be used on either top or bottom edge of frame or both top and bottom edges and equipment completed in a very few minutes, regardless of position of splash pan.



"Better" Spring Bumper

FERNALD STEER-AIDS

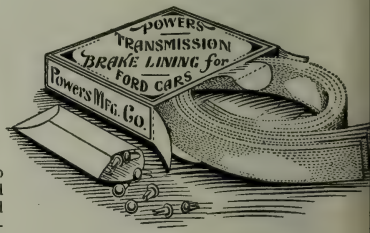
The Fernald Manufacturing Company of North East, Pa., is introducing to the trade a new device which they style the Fernald "Steer-Aids." It is claimed the device can be applied in a very short time without the aid of tools, all that is necessary being to slip one end behind the stearing knuckle and snap the other end over the steering rod. It is asserted they do away with all rattle and racket in the steering rod, keep the wheels in alignment, cut down front tire wear, save bushings and reduce skidding. They are built of tempered steel wire, with a baked japan finish .



Fernald Steer-Aid L

TRANSMISSION BRAKE LINING

A new article is being placed on the market by the Powers Manufacturing Company, of Waterloo, Iowa, in their transmission brake lining. It is stated this brake lining is made of long fibre cotton, Scandinavian weave, and treated with special compound which makes it impervious to oil, grease, water, gasoline, heat or dirt, and gives it a strong grip power and long-lasting qualities. It is asserted that it is chatterless and contains no wires. It is packed three pieces to box with the necessary brass rivets.



Transmission Brake Lining

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

PRICE changes have been quite numerous in hardware commodities during the week, and embrace some very important lines. Builders' hardware of Canadian make has advanced approximately 7½ per cent. Washers and wringers have been increased in price about 5 per cent. New prices on sheep and horse-shearing machines have been announced for next year, and show substantial increases over those prevailing for this year.

Prices have been withdrawn by the manufacturers on all brass goods, such as pet cocks, stop cocks, globe, angle and check valves and compression bibs, which is taken as a precursor of higher prices in these lines. One of the well-known manufacturers has withdrawn prices on hand saws, compass tenon saws, brick trowels, plastering trowels and pointing trowels, and has intimated that higher prices in these lines can be expected. Scarcity of raw materials and higher labor cost is given as the force operating to cause this action.

Other lines in which changes have been recorded include bread mixers, hose clamps, padlocks, latches, keys, handbells, grindstones, soil pipe and fittings, wrenches, galvanized and painted metal shingles, galvanized and painted metal siding and metal ceiling, cistern pumps, railroad chalk and snaps, forges, brass injectors.

In paint materials, white lead in oil again shows an advance of 50c per hundred pounds, due to the steadily firm market in pig lead. Putty prices have been increased 10c per hundred to make provision for increased freight rates. Turpentine was again in firm market, with advances of 5c per gallon recorded in some quarters. Linseed oil held in steady position. Business in ready-mixed paints has been exceptionally good, householders giving evidence that they are in the mood for putting on preservative materials as a matter of conservation. Business in hardware lines has been fair, but midsummer months are expected to show usual quietness in the trade.

MONTREAL MARKETS

MONTREAL, June 27.—It is evident that price revisions have by no means come to an end for there is evidence by reference to the reports for the week that many changes have been made, and it is expected that there will be still more changes in the immediate future. During the week advances have been prominent for builders' hardware lines, and steel goods are being marked up. Lead has ruled firm, and as a consequence other items into which it enters as a raw material have advanced further. Some revisions showing advances were made in lead products. Steel letters and figures, cistern pumps, railroad chalk and snaps, washing machines and wringers, forges and horse clippers, brass injectors and other kindred lines, and a number of lines in auto accessories are marked up, while the only decline is that in a line of spoke brushes. Advances are looked for on some lines of saws and other goods. Trade is reported satisfactory though somewhat quieter.

All Builders' Hardware, Steel Goods Advance

Montreal.

BUILDERS' HARDWARE, STEEL GOODS.—Many lines of builders' hardware are moved up again and the advances are various. Nearly 10 per cent. is added in some instances, while in others the same is around 5 per cent. Some expect that this is but the prelude to advances that will shortly be added to the line aagin. Locks, knobs, bolts, plates, night latches, and many of the regular items are affected and increases are made in several lines of steel hardware too.

Steel Letters, Figures and Cistern Pumps Up

Montreal.

PUMPS, LETTERS, FIGURES.—Advances of about fifty cents apiece are made in the price of cistern pumps of both the open and closed variety. The No. 1 open are now $2.30 each; closed $2.40; No. 2 same styles $2.60 and $2.75; No. 3 $2.85, and No. 4 $3.40 and $3.70. Steel letters are up about 10 per cent. the following prices ruling now: ⅛ in. $2.50 per set; ¼ in. $4.10, and ⅜ in. $6.80 per set. Steel figures at the new prices are: ⅛ in. 85c; ¼ in. $1.35; ⅜ in. $2.30 per set.

Railroads Chalk and Snaps Are Marked Up

Montreal.

CHALK AND SNAPS.—From $1.50 per gross to $1.65 railroad chalk has been advanced this week. There also is a further revision of price for snaps of all kinds and both the japanned and the tinned varieties are likewise affected. The latter revision is around 10 per cent

Slight Advances For Washing Machines

Montreal.

WASHING MACHINES AND WRINGERS.—Advances were made in the price of washing machines through the revision of discounts. The ruling discount for some time has been 40 per cent. but this is now 30 per cent. and 10 per cent. The same applies to wringers, and both changes are immediately effective.

Blacksmith Forges and Horse Clippers Higher

Montreal.

FORGES, HORSE CLIPPERS.—Advances were made in the price of blacksmith forges and this will probably be general with the different makers. On one line it is figured near 10 per cent. for the various styles. Horse clippers

also are costing more money, and the No. 1, a large seller, is listed at $13, with a discount to the trade of 25 per cent.

More Asked For Sash Weights and Brass Goods

Montreal.

SASH WEIGHTS, COCKS, ETC.—Some advances have been made in the price of certain Penberthy goods with the exception of injectors and ejectors and air cocks. The advance is about 7½ per cent. and includes lubricators, glasses, etc. Some further adjustment has been made in the price of sectional sash weights, these selling at $5.50 per 100 pounds.

Gaskets, Tool Bags and Vises Higher

Montreal.

AUTO ACCESSORIES.—Advances are this week made in the prices prevailing for special felt gaskets for use of cars. These are varied, and in some cases about 10 per cent. Samson vises also are up, No. 92 was listed at $7.90 and is now $11.50 trade price; No. 93 was $9.73 and is $14; No. 94 $12.60, and now $16.55, and No. 364 listed at $5.76 previously is now $6.58. Special discounts apply. Tool bags, No. 31309 are up to $2.02 trade from $1.30 with a special discount to the trade.

Double Spoke Brushes Are Marked Lower

Montreal.

SPOKE BRUSHES.—A decline is registered in the price of spoke brushes of the double variety known as "Daisy." Previous prices were, for 48-quantity lots 64c each; for lots of 12, 69c, and single brushes 73c. These costs are now increased respectively to 72c, 78c and 83c each.

Batteries Up And Roller Bearings, Too

Montreal.

BATTERIES AND BEARINGS.—Advances of ten per cent. have been announced for batteries of the automobile starting types. This will be effective at once. Roller bearings of the Hyatt roller type are up very materially, the advances aggregating in some cases 50 per cent. Revisions have also been made in the price of brass pipe fittings for use on cars and the changes represent advances.

Buckets, Cut Outs and Wrenches Higher

Montreal.

AUTO ACCESSORIES. — Collapsible buckets useful to motorists are advanced in price this week and trade price now is 50c from the previous list of 40c. In dozen lots they are advanced from 37½c to 47c each, and quantities of 48 from 23c to 43c. Badger cut-outs for Chevrolet cars are higher, the old trade price of 90c being advanced now to $1.03. Off-set oil funnels are listed at the trade price of $1.07, and were before $1.03. The 33 1-3 per cent. discount applies all around these lines as also to adjustable "S" wrenches now listed at $1.14, $1.44 and $1.74 for the three standard sizes. The latter advance is about 20 per cent.

Ignition Coils, Oilers Flag Holders Higher

Montreal.

AUTO ACCESSORIES. — Advances were registered during the week for vibratorless coil ignition, the trade price advancing from $21 to $27.38. Machine oilers, coppered, are higher too, the increase beibng about 10 per cent. Flag holders for use on the hood of cars are crease being about 10 per cent. Flag advancing to $1.24 each from 83c, and the set of 5 flags from 60c to 97c per set. The two latter items are subject to 33 1-3 per cent. discount.

Barb Wire Supplies Greatly Curtailed

As the result of a question from HARDWARE AND METAL as to their opinion on the barb wire situation the McGregor-Banwell Fence Company, Ltd., stated the case as follows:

"Very recently we were in the market for a large tonnage of barb wire, and one of the largest producers of barb wire in the States replied to us as follows:

"'Owing to the demand of the United States and allied governments we will have very little barb wire for this fall, but if you wish to place an order with us now we would accept it for shipment if and when possible during the last half of this year, with no commitment whatever that any portion can be shipped either this year or next.'

"This practically sums up the entire situation. The United States and allied governments are taking practically the entire production of barb wire in Canada and the United States. The situation is very serious and our personal feeling is that very little barb wire will be shipped to the domestic trade in Canada or the United States as long as the United States government assumes what might be called control of the steel output. Galvanized wire for fencing is in practically the same position and we do not think that any manufacturer will get 25 per cent. of his usual tonnage for next year, and anyone securing 25 per cent. will be very fortunate."

Lead Wool Higher; Sheet Lead Also Up

Montreal.

LEAD PRODUCTS.—Strength as developed for pig lead is responsible for a firming of various prices in the list, and lead wool and lead sheets are revised to higher levels. This is in accordance with the definite tendencies pointed out in HARDWARE AND METAL last week. Somewhat better quotations are made for solder but this is still in a firm position and supplies are not any too large. Wire solder on the other hand has advanced slightly. Trading is fair.

Market is Firm But no Change in Nails

Montreal.

WIRE AND NAILS.—While there is still some business for nails this is not over heavy. In comparing the volume with the past season, however, there is no reason for complaint. Stocks at the present time are large enough to take care of the trade demands, and the undertone is quite firm with cut nails still $5.60 per keg and wire nails $5.35. Smooth steel wire still is $6.25 per 100 pounds base.

Munition Activity Will Sell Fuel Oils

Montreal.

GASOLINE, COAL AND FUEL OILS.—For the present there is a good sale for fuel oil and the market is firm. With munition orders coming this way again there is every indication of a brisk demand for this commodity and supplies are expected to be ample in meeting this. Coal oil is naturally in smaller demand excepting for oil stove use and is unchanged at 19c for Royalite and at 22c

per gallon for both Palacine and Electroline. Gasoline activity is very marked and price still holds at 34c for the motor grade.

Stoves, Enamelled Ware Special Lines Steady

Montreal.

STOVES, WARES.—Little change is reported either in the market demand or in prices on any commodities in the list. There is general firmness on nearly every commodity and the number of orders in hand for future attention is very pleasing to the manufacturer. Materials are his concern and his outlook for getting requirements is hopeful. Not a great deal of activity is reported for stoves or ranges, oil stoves being featured largely just now.

Soft Fibres Advance 4c; Hay Fork Rope Sells

Montreal.

ROPE AND CORDAGE.—It is impossible to tell from week to week what the soft fibre situation will be, for there are many advances. Within the past week four cents a pound has been added to the price and many of the soft fibre lines will be thus affected again. There is a better enquiry and a larger sale now for hay fork rope and the prices are fully maintained for all rope with a firm market. Pure manila base price is still 39c; British manila 33c, and sisal 27½c per pound.

Steel Bars and Iron Hold Steady and Unchanged

Montreal.

IRON AND STEEL.—There is as much activity as the trade might look for at this time. Business is of the routine nature incident to the existing conditions and for the most part supplies are quite sufficient but not excessive at all. The undertone is firm and revisions upward in the near future are not improbable.

Old Rubbers Firmer; Lead and Zinc Move

Montreal.

OLD MATERIALS.—The market for lead and zinc is better and there is a more ready enquiry than for some time past. Prices are held firmly at last week's revisions and some improvement is noted for old rubbers which are bringing as much as 8½c per pound; bicycle tires 5c and automobile tires 5¼c. Other lines are firm but unchanged.

Lead Has Soared Again; Spelter Firm

Montreal.

INGOT METALS.—Lead is still the leading ingot of interest and has considerably advanced again so that the local price holds firm at the quotations made last week. Little further advance is looked for now. Tin is scarce yet but some is looked for ere long. The markets are not over active.

COPPER.—The market is quiet and unchanged at prices quoted last week. Demand is fair but supplies ample to meet all requirements. Price 29 to 30c per pound.

TIN.—Is practically unchanged and supplies are coming forward a little more freely. The London market seems stationary and spot is quoted locally at $1.10 per pound.

SPELTER.—This continues to advance in the United States and prices here are firm in sympathy. Producers are chary about selling forward and consumers have been compelled to advance their bids. Price around 10½c.

LEAD.—Is still very strong and the market has been practically fixed in the United States at $7.75 f.o.b. East St. Louis. Producers will not sell at over this price and are dividing supplies as equally as possible. Price holds firm at 10 to 10½c per pound.

ANTIMONY.—This metal is quiet and demand is not heavy. Local price 15 to 16c per pound.

ALUMINUM.—With United States price on this fixed there is little fluctuation and ruling demand is light at around 50c per pound.

TORONTO MARKETS

TORONTO, June 27.—There has been a steadily upward trend to the market for hardware commodities during the week, quite a number of advances having been recorded. Among the lines included in the upward trend are washing machines and clothes wringers, builders' hardware, bread mixers, hose clamps, sheep shearing and horse shearing machines, padlocks, latches, keys, hand bells, grindstones, wrenches. Prices on brass goods such as stop cocks, globes, angle and check valves and compression bibs have been withdrawn and higher prices are anticipated. One of the well known makers of saws has withdrawn prices and intimation is made that new and higher prices will prevail. Trade is fairly good, but usual summer quiet is expected to prevail during July and August. Shipments of goods from the United States are being still further curtailed.

Washing Machines and Wringers Go Up

Toronto.

WASHING MACHINES, WRINGERS.—Through the changing of the discount on washing machines and clothes wringers an advance of approximately 5 per cent. has been recorded. Discount is now 30 and 10 per cent. from list prices as compared with previous discount of 40 per cent. Practically all makes of washers and wringers share in the advance.

Bread Mixers and Hose Clamps Higher

Toronto.

BREAD MIXERS, HOSE CLAMPS.—An advance of approximately 10 per cent. has been made effective in price of Universal bread mixers. Price at which No. 4 is now quoted is $2.95 each, while No. 8 is quoted at $3.35 each. Clancy hose clamps show an advance by 7½ per cent. Half-inch size is now quoted at $4.40 per gross and three-quarter-inch size at $5 per gross.

All Brass Goods Expected to Be Higher

Toronto.

VALVES, BIBS, STOPCOCKS.—At the time of going to press manufacturers had withdrawn all prices on brass goods such as pet cocks, stopcocks, globe, angle and check valves and compression bibs. It was not intimated as to what the change was likely to amount to but an advance in price is confidently expected. Difficulty in getting raw materials owing to the Allied demands is given as the main reason for the probable change in price.

Sheep and Horse Shearing Machines Up

Toronto.

SHEARING MACHINES.—An advance on list prices of sheep shearing and horse-shearing machines was announced by the manufacturers of the Chicago line during the week. Discount remains the same at 25 per cent. off list but prices have advanced $2. No. 1 ball-bearing horse-clipping machine is quoted list at $13, No. 9 sheep-shearing machine is quoted at $19. Attachment for No. 1 is quoted at $12. Extra cutters No. 276 are priced at 27c each and extra combs No. 277 are priced at 80c each. Heads complete for No. 1 are quoted at $4.70 each. Plates for same are quoted as follows: No. 360, $1.35 each; No. 361,

$2 each; No. 90, $1.35 each; No. 99, $2 each.

Builders Hardware Again Advances 7½ P.C.

Toronto.

BUILDERS' HARDWARE.—A further advance of 7½ per cent. has been announced as effective in the prices of all Canadian builders' hardware, including such lines as door sets, door knobs, door bells, sash fasts, rim locks, mortice locks, night latches and similar lines. In some sections of the larger cities there is a fair amount of building going on at present, but much more is needed. Prevailing prices of all building materials at present are acting as a deterrent, but there is feeling in certain quarters that a start made by some large building concerns would encourage the private builder to embark on building.

Prices on Saws and Trowels May Go Up

Toronto.

SAWS, TROWELS.—There is a strong probability that various lines of saws and trowels will register higher prices in the near future. The makers of the Disston line have announced that all prices on hand saws, compass saws, brick trowels, plastering trowels and pointing trowels have been withdrawn for the present. Intimation is made that higher prices can be anticipated when new prices are given out. Scarcity of raw materials and increased cost of labor is assigned by the manufacturers as the reason for the probable change.

Padlocks, Handbells and Grindstones Up

Toronto.

PADLOCKS, HANDBELLS, GRINDSTONES.—An advance of approximately 5 per cent. has been announced by the manufacturers of Yale & Towne line of padlocks, latches and keys. Handbells is another line to show an upward tendency, new net prices being quoted as follows: Brass—No. 2, $2.85 per dozen; No. 4, $5.50 dozen; No. 6, $9.35 dozen; No. 8, $14 dozen. Nickel-plated—No. 2, $3.25 dozen; No. 4, $6; No. 6, $10; No. 8, $15; No. 10, $26.40 dozen. Grindstones show a higher range of prices in that the lower quotations have disappeared. Stones over 40 pounds and 2 inches thick are now quite generally quoted at $2.50 per 100 pounds, while those under 40 pounds are quoted at $2.60 per 100 pounds. Bi-treadle grindstone remains unchanged at $6.25 each.

Pipe Wrenches Register an Advance

Toronto.

WRENCHES.—Advances have been registered in some quarters on Stillson and Trimo pipe wrenches, the advance ranging from $1.50 on the small 6-inch size to $14.40 on the large 48-inch size. Following are the new prices prevailing on Stillson line: 6-inch, $14 dozen net; 8-inch, $15.60 dozen; 10-inch, $17.40 dozen; 14-inch, $24.45 dozen; 18-inch, $35 dozen; 24-inch, $50.60 dozen; 36-inch, $94.20 dozen; 48-inch, $139.20 dozen. Prices on the Trimo line follow: 8-inch, $15.60 dozen; 10-inch, $17.40 dozen; 14-inch, $24.45 dozen; 18-inch, $35 dozen; 24-inch, $50.60 dozen.

Gasoline Consumption Heavy; Prices Firm

Toronto.

GASOLINE, COAL OIL.—Gasoline consumption is reported heavy, as the finer weather prevailing has been more conducive to motoring. Prices are holding firm at 33c per gallon. There is still some difficulty in getting deliveries by tank car. With the season for use of oil stoves now here the consumption of coal oil is also keeping up well. Coal oil is quoted at 18c and 21c per gallon. Other oils remain unchanged with demand fairly heavy.

Lower Prices on Binder Twine Next Year

Toronto.

CORDAGE, TWINE.—If present indications can be taken as a criterion, and there is every likelihood that they can, there will in all probability be lower prices for binder twine next year. The forecast is based on the fact that the United States has entered into a contract with the marketing agency representing the producers of sisal fibre in Yucatan for the delivery of 500,000 bales of fibre between now and January 1, 1919, at an average price of 16c per pound. The price at which purchases were made for the manufacture of binder twine for present season's twine was around 19½c per pound. It will therefore be seen that the agreed price is some 3½c per pound cheaper. This should make a difference of several cents per pound in the price of binder twine next year. Of course, 500,000 bales will not begin to supply the entire needs for binder twine. If the balance of the crop is arranged on the same basis it is a safe inference that there will quite generally be lower prices for binder twine next year. Prices on Manila fibre have been withdrawn by the Philippine Government pending readjustments which it is thought may be lower. Demand for cordage is fair, with anticipation that larger quantities will be required by shipbuilding interests during the months of July and August. Prices hold unchanged at those given in current quotations.

Nails Hold at Recent Advance

Toronto.

NAILS, WIRE.—Prices on wire nails were firmly maintained at the advance of 10c per keg noted in these columns last week. Quotations are now on the basis of $5.30 per 100 pounds. There is intimation that there may be still further restriction in the amount of steel rods that will be available for the manufacture of both wire nails and steel wire. In the face of this prospect prices are firmly maintained on all wire products. Base prices on smooth steel wire is quoted at $6.25 per 100 pounds.

Iron and Steel Shipments Restricted

Toronto.

IRON AND STEEL.—Shipments of iron and steel from the United States are being guarded closely under the watchful eye of the Government authorities. Canadian manufacturers have not suffered as yet perhaps to the same extent that manufacturers in the United States have. There is a fair sale of iron and steel products in this market but there is small hope that any easier situation is likely to prevail with respect to securing supplies. Canadian steel manufacturers are making deliveries fairly regularly.

Heavy Stoves are Moving Well

Toronto.

STOVES, ENAMELWARE.—Reports from the manufacturer on the condition of the stove trade indicate that there is an unusually large number of heavy stoves such as ranges and heaters being called for at this season of the year. Dealers are evidently anticipating their needs well in advance. Indications are that the number of styles and sizes will be very much limited owing to the shortage of raw materials. Enamelware trade is reported fairly good with prices holding steady.

Metal Shingles and Siding Have Advanced

Toronto.

CORRUGATED SHEETS, METAL SHINGLES, SIDING.—Prices on corrugated sheets held firm at the advance recorded last week. This week an advance was registered in metal shingles and siding to the extent of 50c per square. Galvanized shingles are now quoted at $11 per square and painted shingles at $8.50 square. Galvanized siding is quoted at $9.25 per square and painted siding at $7.50 per square. Metal ceiling is quoted at $7 per square, an advance of 50c.

Discount, 7½ per cent.

Tightening of Import Privileges

Toronto.

SHEETS, PLATES.—There are indications that the import restrictions on black sheets are being drawn still tighter by the War Trade Board. One jobber was refused permission to bring two carloads of sheets forward that had been on order for two years. Prices hold steady with a fairly good demand.

Difficult to Get Pipe Materials

Toronto.

WROUGHT PIPE, BOILER TUBES. —Manufacturers of wrought iron pipe continue to have difficulty in getting supplies of materials owing to the tight situation in the United States with respect to exports of skelp. Number of sizes is becoming still more restricted. Boiler tubes are in limited supply and can be used only when license is obtained to show that they are for essential purposes.

Demand for Lead Products Gratifying

Toronto.

LEAD AND ZINC PRODUCTS.—Wholesalers in some instances report the demand for lead and zinc products very good for this season of the year. In this respect the trade has been gratifying. There is a firmness in solder due to the firm undertone for pig lead. Prices were unchanged during the week.

Tea Lead and Lead Pipe Higher

Toronto.

OLD MATERIALS.—Higher prices were registered for tea lead during the week, price having advanced ¾c per pound. Heavy lead pipe was up ½c and was quoted at 7½c to 7¾c pound. Other old materials held unchanged. There is not very much of a desire to sell on the part of holders at present as there seems a disposition to hold off for higher prices.

Soil Pipe and Fittings Advance

Toronto.

SOIL PIPES, FITTINGS.—An advance in the price of soil pipe and fittings was recorded during the week through the change of the discount. Discounts on 2 in. to 6 in. medium extra heavy pipe is now quoted at 30 per cent. off list, while fittings for same size are quoted at 40 per cent. off list. Eight-inch pipe, extra heavy, together with fittings, are quoted at a discount of 25 per cent. off list.

Lead Market Strong; Stocks Getting Light

Toronto.

INGOT METALS.—The feature of the week has been the continued strength in the pig lead market. Stocks of ingot metals quite generally are not heavy, and will no doubt continue to dwindle.

COPPER.—Market was quiet, though indications seem to point to a slightly easier market for future quotations. Price held unchanged at 29c to 30c per pound.

TIN.—Spot stocks of tin are almost exhausted, but shipment is on the way from England, which will probably arrive in the course of a week. Prices held very firm at $1.05 to $1.15 per pound.

SPELTER.—There is a stronger undertone to the spelter market and prices were higher locally by ½c, making quotations from 9¾c to 10¼c. A fairly good demand is evident.

LEAD.—Market gave evidence of considerable strength during the week, following the tendency noted last week. Prices locally were ½c higher at 10½c per pound. There is a heavy demand for lead at producing points.

ALUMINUM. — Market demand for aluminum is somewhat light, with prices holding steady at 50c per pound.

ANTIMONY.—More inquiry has been noted for antimony in the local market during the week, but prices remain unchanged at 16c.

PIG IRON.—Demand for pig iron still continues heavy for pig iron in view of the restriction on use for non-essential industries in the United States. In the Canadian market prices were unchanged, with a fair delivery being made by Canadian smelters.

LONDON MARKETS

LONDON, June 27. — While price changes have not been as numerous during the week as in similar periods within recent months,still the list is sufficient to show that the trend is still upward. Turpentine, wall paper cleaner, rope halters, grindstones, washing machines wringers, and bread mixers are some of the lines to show increases. Summer lines are all in good demand, with business quite generally being seasonably good. Collections have been quite satisfactory.

Wallpaper Cleaner Up; Floor Wax Selling Well

London.

WALL PAPER CLEANER, FLOOR WAX.—Higher prices were made effective on wall paper cleaner during the week, Climax brand now being quoted at $1.80 per dozen. Prepared floor wax holds steady in price with a good sale reported. Old English is quoted at 32c per pound, Johnson's at 57c per pound, and Edward's at 40c per pound. Summer cleaning operations no doubt account for the demand.

Nails Hold Steady at Recent New Prices

London.

NAILS.—New prices on steel wire nails announced last week have been maintained during the week in firm position. Manufacturers are looking forward to the possibility of still greater restriction in supplies of wire rods. Base price for wire nails is now $5.30 per hundred pounds. Cut nails held without change at $5.60 per 100 pounds base.

Rope Halters Up; Grindstones Also Advance

London.

HALTERS, GRINDSTONES.—An adance was recorded during the week in price of Johnson's rope halters which makes new prices as follows: No. 1, $12.50 dozen; No. 2, $10.92 dozen; No. 3, $9.75 dozen. Richards-Wilcox mounted grindstones is another of the lines to have prices revised in upward direction. No. 300 is now quoted at $6 each, and No. 400 at $6.75 each.

Rope and Glass Steady; Tools and Spades Same

London.

ROPE. GLASS, HARVEST TOOLS, SPADES.—Rope demand is somewhat light with prices holding unchanged at 39c base for pure manila, 33c for British manila, 33c for New Zealand hemp and 27½c for sisal rope. Glass market is steady with no indication of change in immediate future. Single and double diamond are quoted at discount of 25 per cent. off list and cut lights at 10 per cent. off list. Harvest tools are unchanged at 17½ per cent. off list, while spades and shovels are quoted at a discount of 50 per cent. as heretofore.

Paris Green and Cultivators Good Sale

London.

PARIS GREEN, CULTIVATORS.—Now that the season for the use of Paris

green on potatoes is here, there has been a good sale. Prices hold unchanged at 66½c in ½ lb. packages, 64½c in 1 lb. packages, 62½c in 25-lb. drums and 61½c in 50-lb. and 100-lb. drums. Although the gardening season is far advanced there is still a good sale for hand cultivators, with prices holding unchanged.

Spraying Time Results in Good Sale

London.

SPRAYERS, POULTRY NETTING, SCREEN WIRE.—Fruit growers are taking advantage of the present to do their usual spraying, with the result that the sale of sprayers has been good within recent weeks. Prices were maintained at the following figures: Tin well, No. 112, $5; glass well, No. 113, $7; glass well, No. 114, $7.50; painted tin well, No. 115, $9; brass well, No. 117, $12.50 per dozen; compressed air, galvanized, No. 110, $6.75 each. Poultry netting is still quoted at 15 per cent. off list price. Screen wire is also in steady market, painted black in 100-ft. rolls being quoted at $3.50 per 100 sq. ft. and in 50-ft. rolls at $3.55 per 100 sq. ft. Bronze screen wire is being quoted at 14c per square foot.

Demand For Lawn Mowers Continues

London.

LAWN MOWERS, OIL STOVES.—Although the rush for lawn mowers is over there is still a fair demand for them. Prices hold unchanged at a discount of 40 per cent. on Daisy, Star, Woodyatt and Empress. There is a noticeable improvement in the demand for oil stoves, due no doubt to the opening of many summer cottages, which has greatly helped the sale of this line. Prices hold unchanged at $12.75 each for two-burner, $16.50 for three-burner, and $21 each for four-burner.

Good Sale For Prepared Roofing

London.

ROOFING, SOLDER.—There has been a good sale for ready roofing during the past season and the sale continues. Prices have been steadily maintained, one-ply at $1.95 and three-ply at $2.04. Solder prices have been maintained during the week, half-and-half being quoted at 59c per pound.

Washing Machines and Bread Mixers Higher

London.

WASHING MACHINES, WRINGERS, BREAD MIXERS.—An advance in the price of washing machines and wringers was registered during the week through the change of the discount. Where the discount was formerly 40 per cent. off list it is now 30 and 10 per cent. off list, which amounts to an increase of approximately 5 per cent. Another line to be advanced during the week was the Universal bread mixers, four-loaf now selling at $34.65 per dozen and eight-loaf at $39.60 per dozen.

Turpentine Higher; Linseed Oil Steady

London.

TURPENTINE, LINSEED OIL.—Turpentine has been in steadily advancing market during the week, two advances having been recorded which makes the net increase during the week 5c gallon and places the single barrel price at $1 per gallon, with 2 to 4 barrel price at 99c gallon. In five-gallon lots the price is $1.10 per gallon. There is a brisk demand for turpentine at present and the local supply is still limited. Linseed oil maintained a steady market during the week with fair sale reported. Prices are as follows: 1 to 2 barrel lots, raw $1.90, boiled $1.93; 3 to 5 barrel lots, raw $1.89, boiled $1.92; 6 to 9 barrel lots, raw $1.87, boiled $1.90; less than barrel lots, $2 per gallon.

White Lead in Oil up 50c Hundred

London.

WHITE LEAD IN OIL.—Following the advance recorded in white lead in oil last week there has been a further increase in price during the present week of 50c per hundred pounds, making the price of pure in ton lots $17.25 per 100 pounds and in less than ton lots $17.10 per hundred pounds. There is a fair sale of this commodity. Increase is attributed to the firmness in the pig lead market.

WINNIPEG MARKETS

WINNIPEG, June 27. — Price changes for the past week are again very limited but such lines as are affected are of importance to the hardware dealers as they embrace such lines as galvanized and black sheets, turpentine, white lead in oil and solder, advances in some of the above lines being very noticeable. Business is again reported as normal. Reports from some portions of Alberta and Saskatchewan indicate that rain is badly needed.

Sale of Poultry Netting is Heavy

Winnipeg.

POULTRY NETTING.—Sales during the past few months have been particularly good on poultry nettings, due no doubt to the high cost of living which has influenced more poultry raising. Prices on all lines hold firm at former quotations, while stocks are reported to be well assorted. Prices now in effect are as follows:

1 in. mesh, 24 in., $5.95; 30 in. $7.20; 36 in. $8.50; 2 in. mesh, 24 in. $2.90; 30 in. $3.40; 36 in. $4.05; 48 in. $5.25; 60 in. $6.55; 72 in. $7.80 per roll. Banner netting, 24 in. $4.15; 36 in. $5.30; 48 in. $6.25; 60 in. $7.40; 72 in. $8.40 per roll.

Turpentine Goes to Higher Levels

Winnipeg.

TURPENTINE.—Reports from the Southern States to the effect that all labor may be withdrawn from the turpentine industry which is considered non-essential has caused serious advances, prices moving up 30c gal. during the past two weeks and prospects are for even higher prices. To-day's market prices are given as follows: Barrels $1.10 gal.; ½ barrels $1.13 gal.; 5-gal. lots $1.15 gallon; 1-gal. lots $1.15 gallon, plus the usual extras for containers.

Washing Machines and Wringers May Go Up

Winnipeg.

WASHING MACHINES, WRINGERS.—Prices on washing machines and wringers continue firm while shipments are reported as good. Recent advices from manufacturers, however, indicate that further advances are imminent owing to increased freight rates and labor shortage. Prices ruling to-day are given herewith: Washing machines, "Dowswell," $5 each; "New Century B" $10.15 each; "New Idea" $11.35 each; "Snowball" $9 each. Wringers—"Royal Canadian" $51.90 per doz.; "Eze" $56.10 per doz.; "Bicycle" $62 per doz.; "Ajax" $125 per doz.

White Lead in Oil Goes Still Higher

Winnipeg.

WHITE LEAD IN OIL.—Market prices on white lead in oil again show further advances, moving up to 50c per 100 pounds, and prevailing prices are given herewith:

Genuine Elephant, 5-ton lots, $16.95; 1-ton lots, $17.45; less, $17.80 per 100 pounds.

Decorators' pure, 5-ton lots, $16.65; 1-ton lots, $17.15; less, $17.50 per 100 pounds.

Decorators' special, 5-ton lots, $15.65; 1-ton lots, $16.15; less, $16.50 per 100 pounds.

Solder Prices on the Up-grade

Winnipeg.

SOLDER.—Prices on solder have again been influenced by the high market on tin, many of the manufacturers of solder having to purchase in the open market as their old stocks are exhausted with only a limited supply available. New prices just announced are given as follows: Half and half, full cases, 66c per pound; less than cases, 67c per pound.

Black and Galvanized Sheets Again Higher

Winnipeg.

SHEETS.—Recent embargoes on black and galvanized sheets coupled with the limited stocks on hand has been the means of forcing prices to higher levels, the advance on black sheets being approximately 50c per cwt., and galvanized 80c per 100 pounds over former prices, making to-day's selling prices f.o.b. Winnipeg as follows:

Black sheets, 28 ga. $9.45; 26 ga. $9.35; 24 ga. $9.30; 22 ga. $9.30; 20 ga. $9.25; 18 ga. $9.25; 16 ga. $9.45; 14 ga. $9.45; 12 ga. $9.45; 10 ga. $9.45 per 100 pounds.

Galvanized sheets, 10¾ oz. $11.70; 28 ga. $11.40; 26 ga. $11.10; 24 ga. $10.95; 22 ga. $10.95; 20 ga. $10.80; 18 ga. $10.80; 16 ga. $10.65 per 100 pounds.

Hose and Packing go to Higher Levels

Winnipeg.

HOSE, PACKING.—New prices have just been announced by the rubber companies covering hose and packing, and show substantial increases over former quotations due to increased freight rates and labor shortage. Prices now prevailing are given below:

Discharge hose, 1 x 3-ply, 19¼c; wire lined injector hose, 22c; agricultural suction hose, 2 in., 46c; jacketed suction hose, 2 in., 55c per foot; hard rubber suction hose, ½ in. to 1¾ in., 33 1-3 per cent. off list; Canadian spiral packing, 92c per pound; trade packing, 1-16 and over, 28c per pound; under 1-16 in. 42c per pound.

Stocks of Canada Plates Are Low

Winnipeg.

CANADA PLATE. — Canada plate prices continue firm on the local market, with stocks reported as low as dealers are getting supplies in earlier this year owing to last year's shortage. Prices now ruling are as follows:

Half polished. 18 x 21 in. $10 25; 18 x 24 in. $10 25; 20 x 28 in. $10.25 per box.

Full polished. 18 x 21 in. $11.75; 18 x 24 in. $11.75; 20 x 28 in. $11.75 per box.

Coil and Log Chain in Very Firm Market

Winnipeg.

CHAIN.—The demand for coil and log chain during the past few months is reported as very good with prices remaining firm. Recent reports however indicate that further advances are anticipated by manufacturers in the near future. Prices still in effect are given herewith:

Coil chain, 3-16 in. $18.50; ¼ in. $13.65; 5-16 in. $12.20; ⅜ in. $11.00; 7-16 in. $10.70; ½ in. $10.40; 9-16 in. $10.40; ⅝ in. $10.25; ¾ in. $10.15; 1 in. $9.90 per 100 pounds.

Log chain, 5-16 in. $14.00; ⅜ in. $12.80; ½ in. $12.20 per 100 pounds.

Heavy Demand is Anticipated in Wrenches

Winnipeg.

WRENCHES.—Firm prices are being maintained on wrenches of all kinds with stocks well assorted as a heavy demand is expected during harvesting. Prices quoted to-day on the various lines are as follows:

Agricultural, 6 in. $6.50; 8 in. $7.80; 10 in. $9.10; 12 in. $11.70; 15 in. $15.60 per dozen.

Perfect handle, 6 in. $13.50; 8 in. $16.20; 10 in. $18.90; 12 in. $24.30; 15 in. $32.40; 18 in. $43.20 per dozen.

Stillson pipe wrenches, 6 in. $1; 8 in. $1.13; 10 in. $1.25; 14 in. $1.75; 18 in. $2.50; 24 in. $3.60; 36 in. $6.75 each.

Trimo pipe wrenches, 10 in. $1.45; 14 in. $2.00; 18 in. $2.90; 24 in. $4.15 each.

"Always Ready" wrenches, black, No. 1 $4.20; No. 2 $5.75 per dozen; nickel polished, No. 1 $4.50; No. 2 $6.00 per doz.

PITTSBURGH MARKETS

PITTSBURGH, June 26.—Additional ship steel fabricating work is being allotted to Pittsburgh district. McClintic-Marshall Construction Company is to double the capacity of its fabricating plant, the Government financing the operation, the extension to be devoted entirely to the fabrication of parts for ships. At the outset there was little work of this description given the Pittsburgh district except the large orders that have been going through the American Bridge Company's plant at Ambridge. Recently ship work was allotted to the Pressed Steel Car Company, and this is quite significant in view of the fact that this company is making a great many shells and its facilities are also desired for building cars. It is learned that this ship fabricating work is to take precedence over the building of freight cars which is not to be allowed to interfere. Another evidence of the pressure is that the McClintic-Marshall Company is also engaged to do ship fabricating work at Pottstown, in the eastern part of the State, although that is in the recently established "barred zone" which, on account of transportation limitations, is not to be given additional work except in case of special necessity.

Freight car orders recently placed are to be added to nevertheless, as it is understood that the Railroad Administration is planning to buy 40,000 cars in addition to the 100.000 recently ordered, while General Pershing has cabled additional requirements involving perhaps 10,000 or 20,000 cars.

Demand Growing

Shipments of finished rolled steel are now at the rate of about 3,000,000 net tons a month, and a considerable part of this tonnage is going for purposes that are strictly essential although they are not the subject of Government orders. In the circumstances it is evident that the volume of direct Government orders on books or about to be placed is growing, for at the recent dinner of the American Iron and Steel Institute the Director of Steel Supplies stated that there were unfilled orders, or orders about to be placed, amounting to 16,-800.000 net tons.

Recent advices have been of about 3,-000.000 tons additional cropping out and this week's news shows still more tonnage, the rate at which war steel requirements are growing being clearly in excess of the rate at which they are being filled, when that rate is one-half, or somewhat more than half, of 3,000,-000 tons a month.

Delivery Control Working Smoothly

The merchant blast furnaces and the steel mills have now had some experience with the new regulations promulgated by the War Industries Board by its resolutions of June 6. These prescribed a "schedule of purpose entitled to preference treatment," or in other words defined the "more essential" classes of commercial consumption of pig iron and steel products. After priority orders, etc., have been met, material is to be distributed against these purposes, and then if there is anything left, which is rarely the case, it may go to the general trade, although there are some restrictions in that matter also.

The producers report that they have been having little difficulty in interpreting and carrying out these new regulations. Virtually they replace a system of distribution which had been in force for a few weeks by the voluntary act of the producers, though without as clear a definition of the preference cases as is now furnished.

Naturally one thing that appeals strongly to the producers is the fact that when they have occasion to deny a customer any material the responsibility rests not with them but with the Washington authorities. There is a flexibility in the system, moreover, that is pleasing, in that if an issue arises between producer and customer as to whether or not a given lot of material should be furnished, as coming under the preference classification, the adjudication can be left to Washington by the producer referring the customer to the priorities division for a priority certificate. Such a certificate will be given in case the authorities approve of the purpose.

Production

Production of pig iron and of steel ingots in June is expected to exceed slightly the rate obtaining in May, when there was an increase in pig iron over April, but a slight decrease in steel ingots. Pig iron production may be estimated at about 95 per cent. of capacity and steel ingot production at about 90 per cent., perhaps a shade more. In the case of pig iron the restriction is due chiefly to shortage of coke, though labor

WEEKLY PAINT DEPARTMENT

Windows Important to Paint Sales

Striking Displays Catch the Eye and Beget Trade—Window Cards Are Big Help in Drawing Attention to Necessity For Painting—Window is One of Best Advertising Mediums

NEXT to having a good and dependable line of paint to sell the most important thing is to be able to keep that paint moving. Profits are not being made when the paint is standing on the shelves. It should be the endeavor of the dealer to keep the interest of his prospective customers alive on the matter of painting. When the spring season passes and wears into summer there is a tendency to slump down and not press as hard for sales during the summer months.

A window display of paint during the summer months will help keep alive the interest in paints. People who might otherwise be inclined to forget that their buildings need painting will have it brought to their attention by an attractive display. Paint should move the year round and the only way to make it move is to keep talking paint the year round. In this the window display can be made to talk eloquently.

The show window is the best salesman that the merchant has. For it is on duty all the time. One of the first steps toward the making of a sale is to get the "attention" of the prospective customer. If the window has pulling power it will get "favorable attention." It is the entering wedge that counts much toward future business.

LIMITATIONS OF PAINT DISPLAYS

A good display does not consist in simply piling paint cans in the window. Usually they are not attractive in themselves after the manner of a suit of clothes, for instance. More ingenuity has to be used in order to secure the paint window that stands out and compels attention. But in this fact there is an opportunity for making a good appeal through the window card. An effective appeal that was made by one dealer consisted in a neat arrangement of cans in the centre of the window with a window card on either side. One of the cards was headed "A Good Record. Good Paint. Good Property. We have dozens of testimonials like this one. Come in and we will be glad to talk it over with you."

The card on the opposite side of the paint display showed the fac-simile of a letter received from a satisfied customer. It read: "John Jones & Co.: Gentlemen—I painted my house three years ago with your line of paints. It is still in fine condition and will not need painting for another year. But when I paint again you can rest assured that it will be with your line of paints. Yours very truly,—"

WORK OF TRIMMING THE WINDOW

If the dealer does not himself care to be troubled with the trimming of his window he should see to it that some one of his clerks who shows aptitude for the work is assigned to do that particular work. The work is fascinating and interesting because of the possibilities which it holds in the store. The show window is the eye of the store and reflects in no small measure the character of the merchant who carries on business therein. It is well to stand back and take a candid look at your store window occasionally, just in order to see that it is alive. If you are not satisfied with it it is up to you to make it reflect more accurately your character as a business man.

Manufacturers have always shown themselves ready to co-operate with the dealer in this matter of getting effective window trims. To this end many of them have prepared expensive cut-outs and window cards. But it is not well to allow these to remain in the window so long that people begin to think of your store as the "one that always carries the same old paint display." Change your paint windows often. Make them have a new point of interest each time they are arranged.

"There's the paint I like to use!"

Every good painter likes to use a paint of high quality and generous covering capacity.

That's why they buy Moore's House Colors by preference and why "Moore's" dealers find their paint sales growing and their paint customers always satisfied.

Keep your stock of Moore's House Colors displayed.

Benjamin Moore & Co., Limited
WEST TORONTO

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware and Metal.

Men who are capable of managing a retail hardware business are not easy to find. The position requires a high type of ability. Above all, it requires a man who recognizes opportunities and who knows how to make the most of them. That type of man in the hardware business is almost invariably a reader of HARDWARE AND METAL. There were fifteen replies to the advertisement shown here. It was a point in favor of all the applicants that they were in the habit of reading HARDWARE AND METAL.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 27.—Another advance of 50c per 100 pounds in the price of white lead in oil has been the result of the high prices reached on pig lead. This furnishes the feature of the week. As a result there is no telling what may follow in the way of further revisions on mixed paint. Actual costs have been the basis for the advances already made in various lines of painting materials and all markets are very firm. Turpentine is even scarcer than it was and no prices are quoted. Some is expected to arrive soon, but in sympathy with the southern situation it will be high. Oil is steady and even quite firm, with supplies fair. Trade, seasonably speaking, is satisfactory.

Price Still Holds For Linseed Oil

Montreal.

LINSEED OIL.—The crushers are getting some seed forward from the West, but this they are not buying heavily for the reason that the market conditions do not warrant big risks on this. In view of the probable supply continuing to be limited with an accumulation of certain orders still unfilled there is little indication of lower prices. The United States position is firm, with most business transacted being done on an immediate or nearby delivery basis. There is little inclination there to take on future business at a fixed price.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 4 barrels	$1 79-$1 86	$1 81½-$1 88½
5 to 9 bbls.	- 1 78	- 1 80½
10 to 25 bbls.	- 1 77	- 1.79½

Turpentine Scarcer and Higher in South

Montreal.

TURPENTINE.—This is scarcer than ever, and more so than it has been this season. Those who had any supply for distribution a week ago now claim that it is sold out and no prices are being named by anyone. Sales have been made at around $1 per gallon, but at this there seems to be none offering. The question which concerns the trade is what the immediate future may bring forth. It is permissible to say that some turpentine is on the way and improvement is expected, but the assurances from without are not definite. Some use is being made of the substitutes, which are suitable for certain classes of work.

Turpentine—	Per Imp. Gallon
1 to 4 barrels	....
5 barrels and over	....

Small quantities 10c advance over 1 bbl. prices.

May be an Advance Soon in Putty's Price

Montreal.

PUTTY.—That there may soon be an advance in the price of putty is considered a strong possibility. It has been firm lately, and several paint men have expressed their belief that an advance was not improbable within the next few days or so. Cost of raw material is high, and with oil prices much higher than they were when the present putty prices were named a revision upward would not be of much surprise. Prices are firm and unchanged.

Standard Putty—	Per 100 lbs. 5 ton	1 ton	Less
Bulk, in barrels	$4.00	$4.15	$4.35
Do., ½ barrels	4.15	4.30	4.50
Do., 100 lb.	4.85	5.00	5.20
Do., 25 lb.	4.85	5.00	5.20
Do., 12½ lb.	5.10	5.25	5.45
3 and 5 lb. tins	6.85	7.00	7.20
1 and 2 lb. tins	7.35	7.50	7.76

Pure linseed oil putty, $2.00 per 100 lb. advance on above prices.

Glaziers' putty—$1.60 per 100 lb. advance on above prices.

Terms: 2%, 15 days, net 60.

White Lead Now $17; May Further Advance

Montreal.

WHITE LEAD IN OIL.—When the last advance was made in white lead in oil, as reported last week, HARDWARE AND METAL referred to the very firm tone of the market even at this price. Within the week another increase has been made, and the price is now $16.50 for 5-ton lots per 100 pounds, $17 for ton lots per 100 pounds, and for small quantities $17.35. The advances are stated to be based on actual market conditions, and represent the smallest increases possible under ruling markets for pig lead. The price of oil also has been a factor. There is much strength characteristic of the position now held, and consequent upon any further advances made for lead there would be every possibility of higher levels being reached.

Mixed Paint Good Stock at This Time

Montreal.

MIXED PAINT, ETC.—The seasonable demand for paint and specialties is very good. This is the sorting time when stocks need replenishing after the early activity incident to the season when outdoor work is a big factor. Prices are very fully maintained, while some suggest that an advance for mixed paint is a real possibility. Certain it is that with raw costs so high indefinite selling on the present basis could not be maintained. Those having a good stock of mixed paint may be assured it is worth its cost.

Window Glass Steady; Demand For Mirrors

Montreal.

GLASS.—There is some very good demand for window glass. This is going forward to the trade promptly as ordered, and prices are fully maintained. The sale for plate glass is more limited, and little activity in building is responsible for this condition. Considerable activity is reported for mirror plates, however, and prices all around are firm. One jobber looks for a scarcity, while others anticipate that stocks will be ample.

NEW WHITE LEAD DIFFERENTIALS

The freight differentials as applying to white lead in oil shipments made to outside centres have been changed, and is now as follows:

Prices f.o.b. Ottawa are 15c advance over Montreal.

Prices f.o.b. London and Windsor are 30c Montreal.

Prices f.o.b. Toronto and Hamilton are 25c Montreal.

Prices f.o.b. Fort William and Port Arthur are 40c Montreal.

Prices for Maritime Provinces are 30c Montreal.

This schedule has been figured out in accordance with the new freight tariff recently arranged.

TORONTO

TORONTO, June 27.—A number of points of interest are manifest in the paint and oil markets during the week. One is an advance of 50c per hundred in the price of white lead in oil. Another is an advance of 10c per hundred in the price of putty to cover increased charge for freight rates. Turpentine keeps in a steadily upward direction, advances having again been recorded during the week. Sales of paint are reported as exceptionally good. The

Makers of Paints and Varnishes since 1842

TORONTO MONTREAL VANCOUVER

theory is advanced that with the daylight saving householders have a better opportunity to do their own painting, and are taking full advantage of the opportunity. Linseed oil held steady, with sufficient seed arriving for crushers' needs.

Getting Out Back Orders of Linseed Oil

Toronto.

LINSEED OIL.—With supplies of flaxseed coming forward in fairly good volume crushers have been able to make some steady gains on the amount of back orders that accumulated during the period when seed was unobtainable. There is a fairly good jobbing demand for oil. Prices held in a steady position during the week. The price of flaxseed held approximately stationary during the week. Range of prices held at $1.86 to $1.90 in 1 to 2-barrel lots for raw oil.

	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 bbls.	$1.86-$1.90	$1.88½-$1.93
3 to 5 bbls.	.....	.....
6 to 9 bbls.	.....	.....

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Goes to Still Higher Levels

Toronto.

TURPENTINE.—There was a steadily upward move in the price of turpentine during the week in some quarters. The range of prices widened, the price varying from 88c per gallon in single barrel lots, barrel included, to $1 per gallon in single barrel lots, barrel included. This latter quotation represents an advance of 5c per gallon over the price prevailing last week, and establishes a record for turpentine within recent years. The situation in turpentine in the South is one of firmness owing to the curtailed labor supply, which it is estimated will reduce the production this year by 35 to 40 per cent. Shipments are coming through from the South somewhat slowly. There is a fairly heavy local demand.

	Imp. Gal.
1 barrel	$0 88-$1 00
2 to 4 barrels	.....
5 gallon lots	1 10

Further Advance of 50c in White Lead

Toronto.

WHITE LEAD IN OIL.—Following the advance of 50c per hundred recorded last week in the price of white lead in oil another advance has been recorded during the present week, which now makes the selling prices $17.25 per hundred pounds in ton lots. With a steadily firmer market for pig lead and increasing labor costs the corroders have felt the necessity of further increasing the price. Movement of white lead in oil is fair, though not heavy.

Mixed Paint Sales Still Going Briskly

Toronto.

MIXED PAINTS.—Manufacturers report a steadily brisk trade in paints, and jobbers also give optimistic reports. Some wholesalers are frank in expressing their surprise at the volume of paint that is going into consumption. The theory has been advanced that with daylight saving in effect the householder has a greater opportunity to do this sort of work around his home. He is doing it himself, thus eliminating the service of the painter to a large extent. The saving which he is able to effect in the painters' salary can be put into the price of paint, and he accordingly does not feel the higher price which prevails this year as compared with other years. Prices of paints held unchanged.

Freight Rates Cause Higher Putty Prices

Toronto.

PUTTY, GLASS.—By reason of the higher freight rates that prevail on the Canadian lines the price of putty has been increased 10c per 100 pounds, which now makes the price of standard putty $4.70 for bulk in casks, $5.45-$5.55 for 100-lb. and 25-lb. drums, $5.80 for 12½-lb. irons, and $5.80 for bladder putty in barrels. Delivery will be made on booked orders up to Aug. 1 at these prices. Pure putty is $2 higher than standard putty. Movement of putty is somewhat light at present. Glass market holds steady, with demand comparatively light. Plate glass and fancy glass are also unchanged.

WEEKLY MARKET REPORTS

Continued from page 49.

shortage exerts a little influence. There is practically no shortage of coke at the furnaces that are operating, but there are a few that would be blown in if coke were available. So far as the physical condition of blast furnaces goes, it has rarely been better as during the period when coke shortage was causing many furnaces to go out of blast there was extensive relining and the furnaces as a whole are in excellent condition physically. As to steel production, the restrictive influences are, in their order, scrap shortage, pig iron shortage and labor shortage. Supplies of scrap are below normal in proportion to the amount of steel being made as the current outcome of scrap is light by reason of the nature of industrial operations now being conducted and also by reason of shortage of labor for gathering and classifying scrap. The yards are receiving but little, and would hardly be able to find labor to take care of more.

Production is likely to decrease somewhat in the next two months, on account of hot weather, though as to that there were spells of weather in May as bad as any that are usually encountered in the midsummer months.

One striking thing that is being brought out is that with all the regulation as to where material is to go, and which is to take precedence of other material, there is after all little pressing demand for pig iron or steel products that is ignored. The "purposes" not named in the preference list would make a formidable showing, for normal times, involving perhaps 25 per cent. of the total consumption, but by reason of war conditions they have of late been gradually effacing themselves so that their requirements, if they were freely permitted expression, would be far below normal. No producer well acquainted with the situation can be found who places the consumption that is perforce denied at more than 10 per cent. and some place it at less. Even as to these limited requirements there may be a modicum of steel, as the months pass, though at present there is practically none.

PRESS RECEIPTS FOR ADVERTISING VICTORY LOAN

Various estimates have been made as to the amount the press received from the Government in connection with the press publicity for the Victory Loan, but the actual figures paid were clearly set forth in audited statements submitted to the Annual Meeting of Canadian Press Association, Inc., held in Toronto on June 13th and 14th.

The total amount paid by the Government for advertising space was $165,419.81, which was distributed among 1,400 newspapers and other publications. Approximtely $5,000 was spent in the preparation and distribution to the press of a large number of special articles, illustrations, cartoons, etc., which were inserted in the press without charge. The setting of type and making of duplicate plates of the advertisements for the various publications used and the fees paid to the five co-operating advertising agencies for their services cost in the neighborhood of $37,000, making the total expenditure $208,166.09.

As the total cost of floating the Loan was approximately $5,000,000, the Government's expenditure on press publicity represents less than five per cent. of the total expenditure. It is interesting to note also that the press publicity cost only one-twentieth of one per cent. of the total amount subscribed to the Loan.

The press publicity for the Loan was handled by Canadian Press Association, Inc., and the officers of the Association and its individual members co-operated splendidly in making the campaign a success. During three months last Fall most of the time of the president, J. H. Woods, Calgary "Herald," and the office staff, was devoted to the press publicity campaign, and for several weeks the committee of publishers in charge were in almost continuous session. The individual members, on the other hand, contributed, without charge, space in their newspapers and other publications which if calculated at their regular commercial rates, would run up to more than the total amount paid for the advertising space.

Neither Canadian Press Association, Inc., as such, nor any of its officers or committees, received any remuneration for their services in connection with the Loan, those services being given voluntarily, and in the spirit of national service.

He Hates Harris Heavy Pressure

Because he loses his drag in bearings lined with this superior Babbitt. His aim to hold back, waste power and wear out is defeated by the good qualities of

HARRIS HEAVY PRESSURE, "The Babbitt Without a Fault"

All good Hardware stores sell Harris Heavy Pressure with confidence; they know our guarantee is back of every pound.

OUR SPECIAL LINES

BABBITT SOLDER LEAD PIPE SHEET LEAD

We are the largest exclusive Metal dealers in the Dominion.
Our prices are right. Our service excellent.

THE CANADA METAL CO., LIMITED

Hamilton Montreal TORONTO Winnipeg Vancouver.

Here's a Line That Spells Sales

Reed's Plastic Asphalt Roof Cement should find a ready sale just now when weather permits of outside repairs. Leaky roofs that started during the hard winter can now be quickly and permanently repaired, no matter whether of slate, metal, shingle or composition.

This means sales for the dealer—sales without effort, too. All you need do is place this line in a prominent place. It will be its own salesman.

Order from your jobber.

Prices—Ontario, Quebec and Maritime Provinces. .. ....

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

Just where do we stand?

CANADIANS are beginning to wonder where we stand with reference to our place in the Empire after the war. Are we to rank as full partners in this grand, big, going concern? Are we to pay our share of the upkeep of the navy? If not, what is to be our status?

Recognizing the growing interest in this problem, the editors of MACLEAN'S decided to devote the July issue to Imperial topics. It offers articles on various phases of our Imperial problem—articles which will have a particular interest at this time when Sir Robert Borden is in London in consultation with the leaders of the Imperial Government.

The July issue contains, besides, a cluster of other big features—readable, fearless and strong. Here are a few of the best:

Field-Marshal Sir Douglas Haig.

Imperial Topics

- **"Pocketing Our Imperial Pride"** By H. G. Wells
- **"Canada's New Place in the Empire"** By Prof. P. M. Kennedy
- **"Living Up to Our Reputation"** By Agnes C. Laut

The War - -

- **"Your Old Uncle Sam is Coming Right Back of You"** By Lieut.-Col. J. B. Maclean
- **"Stemming the Teuton Tide"** By Geo. Pearson

Fiction - - -

- **"The Strange Adventure of the Open Door"** - By Arthur Stringer
- **"The Three Sapphires"** - - By W. A. Fraser
- **"The Torby Tragedy"** - - By A. C. Allenson
- **"The Magic Makers"** - - By Alan Sullivan
- **"Lennix Ballister—Diplomat"** By Archie P. McKishnie

All the regular features as well: Review of Reviews, The Best Books, The Business Outlook, The Investment Situation, Women and Their Work.

July MacLean's

"Canada's National Magazine"

EMPIRE CLOSETS

Every Merchant Plumber is interested in seeing his customer get the best that the market affords.

It means better profits and satisfied customers.

Empire Vitreous China Closet Combinations are durable, neat in appearance and silent in operation.

Oak and Vitro Closet Outfits carried in stock.

We can make prompt shipment of all lines of plumbing and heating material.

Empire Mfg. Co., Limited
London Toronto

YOU'LL MAKE MONEY ON THESE BECAUSE—

BLACK DIAMOND Tarred Felt
JOLIETTE and CYCLONE Brands
Sheathings, Roofings and all lines of Building Paper are of the best material and sure to secure repeat orders.

Saves money for your customers. They'll reciprocate—by giving you their business in other lines.
We also sell you wrapping papers of all descriptions.
All kinds of Sheathing made at our own mills. Our reputation is behind all these Brands.

ALEX. McARTHUR & COMPANY, LIMITED

The Oribo Mfg. Co., Limited, Winnipeg, is our Sole Selling Agent for the Northwest Provinces

E. Roy,
65½ St. Andre St., Montreal, Que.

C. C. Cartwright,
85 Water St., Winnipeg, Man.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

Economical advantages *alone* should increase Silkstone sales

Added to the appeal that we make for Silkstone Flat Wall Covers on the score of beautiful finish, cleanliness and ease of application, is the *great appeal of economy*

To-day more than ever is the public willing to listen to economy reasons, because the necessity for saving is absolute.

In comparing the economical advantages of Silkstone Flat Wall Colors over Wall Papers, Stephens' Paint Agents can easily swing more sales their way because the advantage is so apparent to the customer. Urge the economy of Silkstone therefore—urge it at every opportunity. It means INCREASED SALES.

If you are not now a Stephens' Agent, tear out this page now and write us for particulars.

It will pay you.

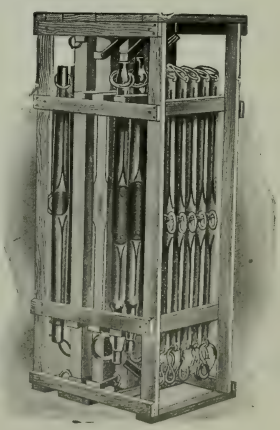
WINNIPEG, MANITOBA

Protected by the Westwo Guarantee

Selling Westwo Painted Waggon, Implement and Plow Sets is satisfactory and profitable. They are made from selected No. 1 quality Oak and Hickory, are carefully painted (2 coats), striped and varnished, and are absolutely guaranteed against defects in material and workmanship. The best way to order Westwo Painted Sets is in crates of six sets. Then you're sure of getting them in perfect condition. —no bruised woods—no marred finish.



Guarantee

All Westwo Sets are guaranteed, and any defective part will be replaced free.

Send to-day for the Westwo folder that describes the various Westwo lines.

CARTER'S

QUALITY
THE BEST

Your customers will need Red Lead to protect the iron work around their homes.

The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of

Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge

They are the best quality you can buy. Made in Canada from the best grade of Canadian Pig Lead.

Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.

Manufactured by
The Carter White Lead Company
of Canada Limited
91 Delorimier Ave. Montreal

"Silent Salesman" B Display Board
Length 54 Inches
[6 Wrenches Each Size

This Is No Free Offer of
Williams' Superior
Drop-Forged Wrenches

It is but another evidence of J. H. Williams & Co.'s policy to make your display and sale of Williams' Wrenches attractive and profitable. We shall be well paid for the board in the increased business we acquire through your use of it, and in the added satisfaction it affords you and your trade.

You Buy the Wrenches
a carefully selected assortment that provides the widest range of usefulness. Their finish and physical qualities are unexcelled and they enjoy a larger consumer demand among mechanics than all others combined.

We have additional Display Boards of this and other types, fully described in our "Silent Salesman" Booklet; it's free, with your imprint if desired.

J. H. Williams & Co.,
"The Wrench People"

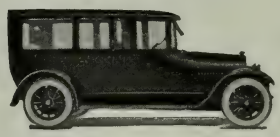
WILSON

Carbon Remover and Engine Primer

A LIQUID STARTER

A Little Added To Gasoline Increases Its "Kick"



A rapid and harmless internal CLEANSER which softens and removes CARBON DEPOSITS from cylinders, valves, spark plugs, etc.

For use in Auto Engines, Motor Trucks, Motorcycles, Boat Engines, Aeroplanes and Internal Combustion Engines generally.

A squirt from a can into a coated cylinder is a never-failing "dispossess warrant" for its carbon deposits.

Its use avoids dismantling the Engine or putting the car out of service. Night treatment, while the Engine sleeps, gives opportunity for reducing carbon scale to powder, which passes through the exhaust when the Engine is started in the morning.

Nothing so simple. Nothing so thoroughly effective and without possible injury. Day treatment accomplishes the same purpose by "soaking" an hour or two.

Forethought suggests that a Car, Boat, Motorcycle or Aeroplane carries a can of

WILSON CARBON REMOVER AND PRIMER

to overcome Engine troubles, threatened or actual, a similar precautionary measure to carrying extra tires and tubes.

A small investment, a big return.

Gives Extra Power to Gasoline.

For use on Autos, Motor Trucks, Power Boats Aeroplanes and Motor Cycles

It's Only Natural That You Would Handle

BISHOPRIC

STUCCO BOARD

—because almost everything else you carry is for the home—and Bishopric Stucco Board is the ideal material for stucco homes.

Architects are recommending Stucco in place of brick and wood, and specifying **Bishopric** Stucco Board because of its durability and economy.

Bishopric Stucco Board saves at least 50% of the time and cost, as compared with sheathing lumber, building paper, furring strips and metal laths—when used as a background for stucco outside or plaster inside.

Let us show how you can make money by handling the Bishopric Line. Write us.

Make Money from Good Pumps---Profit

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift—every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

"KEYSTONE" DANDY

Here is why Keystone Dandy Brushes stand hard work. They have a solid, one-piece hardwood back, and are carefully filled with good, tough material, fastened with steel wire.

Stable Brushes

The whole line of Keystone Stable Brushes is made just as carefully—everything that the stableman needs in the way of brushes.

"A Good Concern to do Business With"

WINNIPEG

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

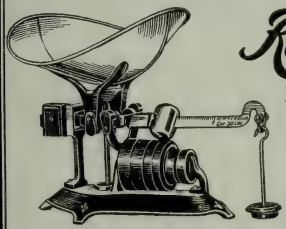
There's nothing like selling the best of everything. Good profits in our handles, too.

J. H. Still Mfg. Company

ST. THOMAS -:- ONTARIO

Stirs up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing—weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the



Renfrew

HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs. Government inspector's certificate accompanies every scale.

Write to-day for literature and attractive selling proposition to

"White"

MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

NEW SAFETY STOVE PIPE

Embodies Trouble and Expense-Saving Features Present in No Other Pipe.

Hardware dealers will make no mistake in ordering sufficient "New Safety Stove Pipe" for next winter's business. Here are a few reasons why it will sell—

Telescope pipe eliminates half lengths.

No wiring needed. Can't be pulled apart.

Automatically locks itself.

Costs same as ordinary pipe. Made in 6 and 7-inch sizes. Made of 29-gauge iron.

Pipe is nested, saving freight rates and storage room in store.

A saving of one length in every twelve ordinary pipes. Can be used along with ordinary pipe.

Patented in Canada and the United States, and "Made in Canada" by Fairgreave & Sons.

Order your winter supplies now.

Advertising makes for better merchandise—

Not only does advertising create a good impression regarding the merchandise advertised but it MAKES FOR BETTER MERCHANDISE. There are added responsibility and written-printed claims to substantiate.

Addition to Electro Service

INQUIRIES from hardware retailers in various parts of Canada, requesting HARDWARE AND METAL to enlarge the electro service to embrace motor accessories have resulted in the following new additions, making in all a total of 412 hardware electros now available through HARDWARE AND METAL'S electro service. These cuts, to be used by retailers in their advertising, are supplied mounted on wood blocks and postage paid, at a cost of 20c each, cash with order. Booklets showing entire assortment of hardware cuts will be supplied free upon request. Address all inquiries to HARDWARE AND METAL, Electro Dept., 143 University Ave., Toronto, Canada.

INCREASE Your Selling Capacity

Our Carrier Service will increase your selling capacity without adding to the number of your salesmen. The statement is concisely, though fully, explained in our four-page leaflet. By its analysis the matter is at once seen—as it really is—to be practical and so simple that it is often overlooked, chiefly through the long and studied arguments of those who are interested in introducing more costly machinery and complicated methods. The leaflet for the asking. Write for it to-day.

Level, grade and perpendicular wire cash carriers, parcel carriers, cable carriers and pneumatic tubes.

YOUR WANTS

are many here below. Use HARDWARE & METAL want ad. page and get rid of a few of them.

"Delta" Files

— we'll help you sell them

TRADE MARK DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

Government May Stop Construction of Eaton's Vast New Mail Order Building

MILLIONS of dollars—$3,500,000 to be exact—is the estimated cost of the huge new mail order building projected by the T. Eaton Company in Toronto. The structure, 400 x 330 feet in foundation area, is to have over a million feet of floor-space, and would be, if constructed according to present plans, the largest single building ever planned in Canada. It has been designed, according to report, solely to enable the T. Eaton Co. to meet the immense mail order competition of the Robert Simpson Company through their big modern mail order building on Mutual Street, Toronto. Or, it may be simply a necessary step due to the immense development of Eaton's own mail order business. Anyway estimates have been called for the structure, and to-day the question is: "Will the Government allow the building to go up?"

Steel and Labor Seriously Involved

Already the Dominion Bridge Company are preparing to roll the steel for the structure. Steel is a precious munition of war to-day. Labor is looking for employment at the highest possible wage-rate and enterprises both patriotic and profit-earning are looking far and wide for labor. So serious is the farm-labor situation likely to become that the Government instituted National Registration and the Registration Cards lay emphasis on farm-work.Will the Government permit the construction of a building which will use enormous amounts of steel, and tax supplies of labor to a great extent?

The Financial Post Deals With This Question and With Others

In THE FINANCIAL POST of June 22nd you will find this question very keenly analyzed. You are interested. Every merchant or business man in Canada is interested. THE POST goes incisively into vital matters that concern business in Canada, the business affairs that bring you money. Here are headlines from the issue of June 22nd. Each one of them indicates a business feature of the week, the information on which will be valuable to you, and all the contents of THE POST are not given by any means. Just note these:—

A 33⅓% Profit or more in every can of Polarine

AND *no other oil sells so well,* because Polarine is:—

—extensively advertised in every part of Canada.

—in constant demand by automobile owners everywhere.

—the kind of oil that satisfies the customer and makes him come back for more.

Our advertising campaign will be continued in full force throughout the coming year. Sign posts, magazines, newspapers and farm papers —all will work to increase the demand for Polarine.

You can cash in on this demand with the signs and booklets with which we are ready to supply you.

You will find Polarine one of the greatest profit-producing products which you can handle. There is a profit of 33 1-3 per cent. or more for you on all sales and your turnover of stock will be rapid.

Polarine will bring the motor car owners — the liberal money-spenders into your store. They are a worth-while class of customers.

Polarine is supplied in attractive sealed cans of gallon and four-gallon capacity, in 12½-gallon steel kegs, half barrels and barrels. There is also a special half-gallon size for Ford cars. It comes in two grades—Polarine and Polarine Heavy.

Write to us at 56 Church Street, Toronto, for full information and our proposition to dealers. Ask for our new book on Polarine for Automobile Lubrication.

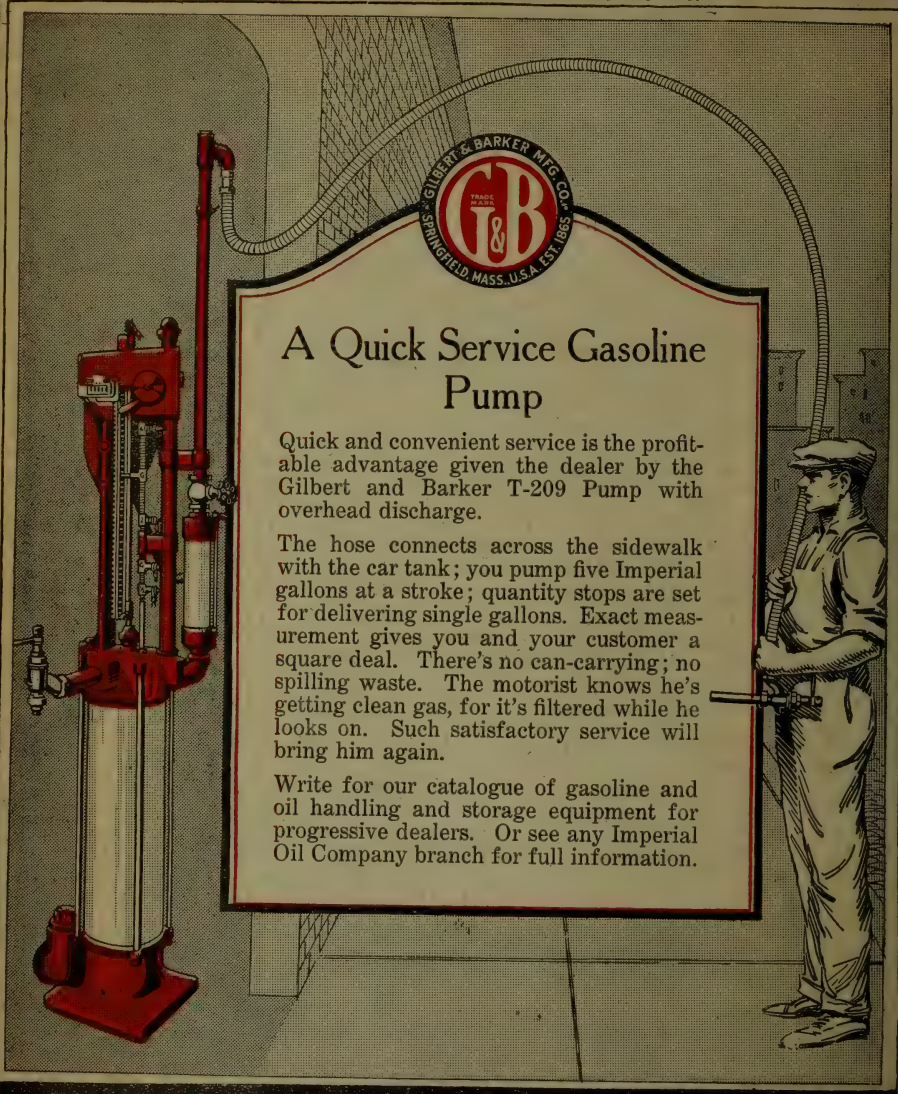
Marketers of *Gargoyle Mobiloils* in Canada

BRANCHES IN ALL CITIES



A Quick Service Gasoline Pump

Quick and convenient service is the profitable advantage given the dealer by the Gilbert and Barker T-209 Pump with overhead discharge.

The hose connects across the sidewalk with the car tank; you pump five Imperial gallons at a stroke; quantity stops are set for delivering single gallons. Exact measurement gives you and your customer a square deal. There's no can-carrying; no spilling waste. The motorist knows he's getting clean gas, for it's filtered while he looks on. Such satisfactory service will bring him again.

Write for our catalogue of gasoline and oil handling and storage equipment for progressive dealers. Or see any Imperial Oil Company branch for full information.

Guaranteed for More Miles Than Any Other Canadian Tire

K & S

When you are handling a tire conspicuous and popular everywhere for service, safety and comfort—when you are handling a tire behind which the manufacturer's reputation and unceasing aim is for maximum quality—

You are handling a tire that is going to win for you customer's confidence, his FUTURE business and his PRESENT business in other lines.

K. & S. TIRES are of brutal strength, infinitely superior under all conditions, and cost less per mile than other makes.

They are positively the highest grade tire manufactured, and are guaranteed for more miles than any other tire made in Canada.

Distributors for Laco Tungsten and Nitro Lamps

North Star Multiples

MR. DEALER

Here's the biggest opportunity you ever had to do a profitable summer business on Batteries:

Made Up as Follows

No. 146, 1 row of 4 6-inch cells,	6 volts
No. 156, 1 row of 5 6-inch cells,	7½ volts
No. 166, 1 row of 6 6-inch cells,	9 volts
No. 246, 2 rows of 4 6-inch cells,	6 volts
No. 256, 2 rows of 5 6-inch cells,	7½ volts
No. 266, 2 rows of 6 6-inch cells,	9 volts
No. 15, Multiple, 15 6-inch cells,	7½ volts

North Star Multiples are unit batteries with from four to twelve individually tested cells. For heavy intermittent ignition — compact, easily handled. Specially suitable for Automobiles, Motor Boats, Barn Lighting and Blasting. Only necessary to connect two wires to binding posts to put battery in operation.

How Many?

North Star Multiple Ignition Batteries do you think you can sell this Spring? Think—decide—then act quickly. Spring automobiling will create a big demand. Be ready to meet it. Be sure and state NORTH STAR MULTIPLES to your jobber.

Canada Dry Cells, Limited, Winnipeg, Man.

Down goes cost of gasoline

The Powerlight Manifold Heater for Ford Cars—Guaranteed to save 25% to 40% on gasoline. The most useful accessory ever put on any car.

Installed in a few minutes.

Price $7 complete with full directions for installing.

Four Outstanding Advantages.

1. The Powerlight Manifold Heater for Ford Cars will save from 25 to 40 per cent. on gasoline, which means more mileage.

2. It heats the gasoline after it leaves the carburetor and as it enters the manifold intake so that it will enter into the cylinders in a dry, intensely combustible state. Every cylinder will receive the same quality gas, for every particle of the gasoline has been thoroughly vaporized and will cause a much better mixture. In consequence, more power.

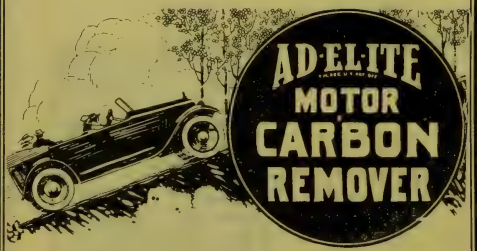
3. It will reduce by 50 per cent. the carbon deposits in the cylinder walls, valves and spark plug, for where there is no heating device of any sort the gasoline enters the cylinders in a semi-liquid state, causing a red, smoky flame. This is especially true of the low grade gasoline of to-day. Result, perfect firing.

4. It will do way with spark plug and valve troubles and lessens the chances of leaky valves, doing away with the necessity of grinding valves or burning out the cylinders, and causes a much smoother running of the engine, therefore, longer life for the engine.

Manufactured by

The Powerlight Co., of Winnipeg

A few good select territories still open.



NO LAY UP

Takes only fifteen minutes, saves about ¼ in gas and oil and increases power and speed.

TEN VITAL FACTS

In times like these it is nice to be sure of some things.

1. You can be sure that Dunlop Tires—"Traction," "Special," "Plain" will "come across" with the greatest mileage ever.
2. That Dunlop Tubes will continue to occupy their conspicuous position for always being the same—always good.
3. That Dunlop Accessories will include everything new that is good and everything good that is old or new.
4. That Dunlop Service will be on a par with Dunlop Reliability — none better.
5. That Dunlop Dealer co-operation will include every method which sound judgment proves will help sell sound tires.
6. That Dunlop Advertising Programme will reach farther and drive home quicker what you continuously seek—**repeat business.**
7. That Dunlop "Traction Tread" will hold its position of being "over the top" of other anti-skids.
8. That "Special" will continue to look for comparison with any other make of tire in a similar class.
9. That "Plain" will go on filling its role of a tire at the price which suits all people on many occasions,and many people on all occasions.
10. That Dunlop will stand back of you and Dunlop Products to the "last man and the last dollar."

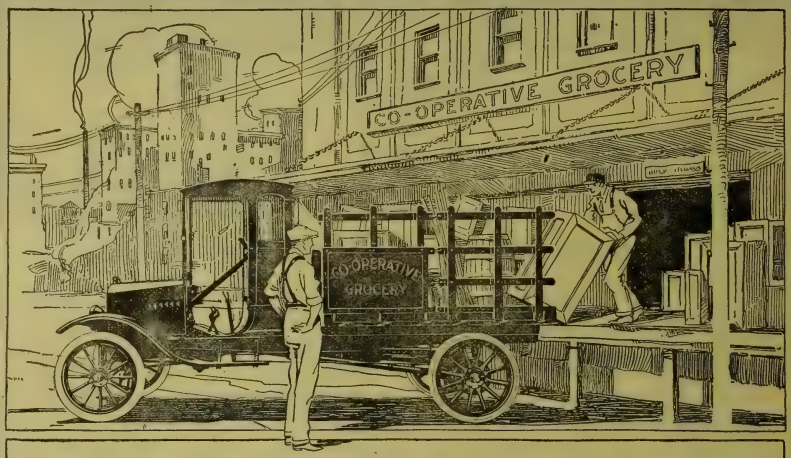
P.S.—Other Dunlop Lines are—High-grade Bicycle, Motorcycle, Motor Truck and Carriage Tires; Belting, Packing, Hose, Mats, Tiling, Heels and Soles, Cements, Military Equipment, Horse Shoe Pads, Rubber Boots, Weather Stripping, Golf Balls, Fly Swatters, Agricultural, Plumbers' and Railroad Supplies, "Houls" and "House" Wire Wheels and General Rubber Specialties.

DUNLOP TIRES



"When Can You Deliver?"

THAT'S the customer's first question, usually. How do you answer him?

Your goods may be superior, your clerks may be courteous, your store attractive, but, after all, unless your deliveries are prompt and dependable, your customers will be disappointed and trade elsewhere next time. Do you realize how many people judge a store by its deliveries?

Is your delivery system on a par with the rest of your business? Does it draw new trade or lose customers for you? Are your horses as suitable for you as they were at one time? If not, why do you persist in being a little behind the times, when a Ford One Ton Truck would be more in line with your other business standards?

Perhaps your deliveries cost you too much. If you are using motor trucks, they may be too heavy for your line of business and therefore too expensive. The Ford Truck uses less fuel when handling a full load than some trucks use running empty.

The Ford One Ton Truck is a money saver, so why not modernize this department of your business at once?

Why You Should Be A Michelin Dealer

No. 11

Michelin Advertising Builds Prestige for You

Michelin advertising is more than mere publicity. It is a conscientious effort to help motorists reduce their tire bills by explaining how to judge tires before buying, and also how to get the most mileage once the purchase has been made.

No matter what kind of tires the motorist uses he will get helpful information from Michelin advertisements.

Consequently motorists entertain an ever growing feeling of friendship for Michelin and for Michelin Dealers.

This feeling of friendship not only enables the Michelin Dealer to sell Michelin Tires easily, but it stimulates every department of his business and gives greater salability to every article he carries

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M. Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

Champion

Dependable Spark Plugs

are more than half sold when the customer reaches your store

The dealer who carries the complete line of Champions does not have to *sell* spark plugs. He simply supplies the demand that we have created.

For years we have been educating users of the dependability of Champions and have backed up that education with the guarantee of "Absolute satisfaction to the user, or free repair or replacement will be made."

An appreciative public has come to realize that Champions mean spark plug reliability and satisfaction —that is why more Champions are in use than all other plugs combined.

That is the best possible reason why you should stock the full line of Champions—the plugs that are in greatest demand—the plugs that the great majority of motorists have come to depend upon for real spark plug service—the plugs that offer you a living profit—the plugs that are backed by a big, live campaign of promotion that has more than half sold Champions to your customers before they reach your store.

Look over your spark plug stock now and order from your jobber a complete line of Champions that you may be in a position to capitalize our promotion when the driving season begins.

Sell Diamonds and help your customers keep down tire "upkeep"

If DIAMOND TIRES were sold at so much per delivered mile, their first cost would be among the **highest.**

DIAMOND TIRES cost less to run.

For, after all, the purchase price means nothing if the tire does not wear well; if it does not cost less to run.

In buying DIAMOND TIRES your customers begin to cut "tire upkeep" from the first minute—and keep on cutting "tire upkeep" the more he runs it.

Give your customer the service he expects.

When you help your customer equip his car with four DIAMONDS you are helping him cut tire upkeep **four ways at once.**

He'll reciprocate. It's bound to get you his business in other lines. Try it.

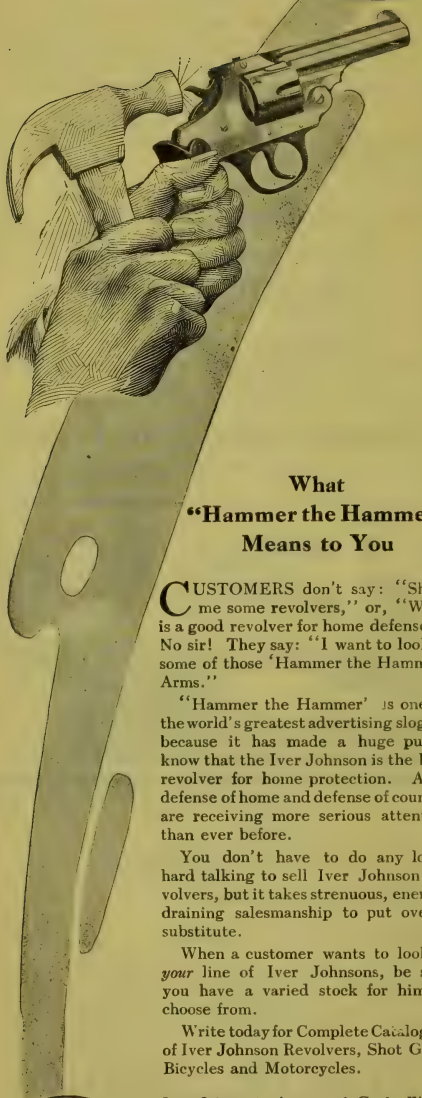
IVER JOHNSON
Safety Automatic REVOLVER



What "Hammer the Hammer" Means to You

CUSTOMERS don't say: "Show me some revolvers," or, "What is a good revolver for home defense?" No sir! They say: "I want to look at some of those 'Hammer the Hammer' Arms."

"Hammer the Hammer" is one of the world's greatest advertising slogans because it has made a huge public know that the Iver Johnson is the best revolver for home protection. And, defense of home and defense of country are receiving more serious attention than ever before.

You don't have to do any long, hard talking to sell Iver Johnson revolvers, but it takes strenuous, energy-draining salesmanship to put over a substitute.

When a customer wants to look at *your* line of Iver Johnsons, be sure you have a varied stock for him to choose from.

Write today for Complete Catalogues of Iver Johnson Revolvers, Shot Guns, Bicycles and Motorcycles.

2 cents

per word for the first insertion is the rate charged for an advertisement on this page. Each figure is counted as a word, and a charge of 5c extra is made when a box number is required.

When more than one insertion is ordered the cost is one cent per word for each subsequent insertion, providing the copy is not changed.

Write your message legibly and state the number of times you wish it to appear.

HARDWARE AND METAL "Wanted" ads get results.

The Cost of Selling

SCARCELY necessary, is it? to protest that you must spend some money, much or little, to keep yourself and your merchandise known to your customers and should-be customers.

This you admit, but—DO YOU FOLLOW CLOSE UP THE LEAD OF YOUR CONVICTION?

Are you spending the money?

Let's look at the cost of close up work in

The FARMER'S MAGAZINE

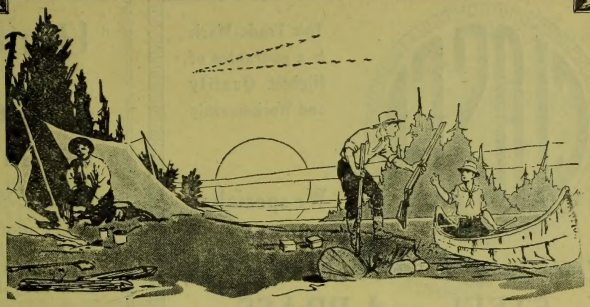
A half-page 12 times will cost you $367.20 ($30.60 per insertion). A full page, $714.00 ($59.60 per insertion).

Not a heavy annual cost to canvass the choicest class of farmers in this country—farm homes of greatest prosperity, progressiveness and capacity.

But—are you keeping a salesman always on the job?

You should—and can, at so low a price.

Write in about it.



Sell DU PONT loaded shells

Sportsmen are keen to distinguish quick, reliable shells. So much of the pleasure and success of shooting depend upon how shells "act." That is the reason why duPont Black and Smokeless Powders, loaded by all leading ammunition makers, have such a high and enviable reputation among experienced hunters for high velocity, penetration and low recoil.

DuPont Powders in bulk or loaded add to the success of your business. Sell them with confidence.

"THE QUALITY BELT"
PLEWES LIMITED, Distributors, WINNIPEG
A good concern to do business with

For Quick Sales
Recently a hardware dealer in Western Canada became overstocked with shotguns. He placed a want ad. in Hardware & Metal. We learned eventually that he not only disposed of his stock, but received several orders that he could not fill. If this man had kept this stock away, it would not only have deteriorated in value, but he would have had to pay taxes, insurance, etc. on it. If you have anything on hand which you wish to dispose of quickly advertise it in our want column. The quick results will make the first cost negligible.
